Review by the Town Council of the Administration Report of the Municipal Commissioner for Bombay for 1885-86.

DURING the year, forty-one meetings of the Corporation and fifteen meetings of Committee thereof were held. The Chairman for the year was Mr. Pherozeshah M. Mehta. For the first part of the twelve months, the Town Council was presided over by Sir Frank H. Souter, KT., C.S.I., C.I.E., who in October 1885, was succeeded by Brigade-Surgeon Henry Cook, M.D., F.R.C.P. There were fifty-two meetings of the Council and fourteen meetings of Sub-committees, besides which there was a large number of attendances for signing cheques and bonds. A leading member of the Corporation and the Council, Mr. Nowrozjee Furdoonjee, C.I.E., died in September of the same year, sincerely regretted by his colleagues.

2. It is a matter of extreme satisfaction to the Council to be able once more to congratulate the Corporation on the highly prosperous condition of its finances. The opening balance was Rs. 10,60,586, being Rs. 7,10,586 in excess of the anticipated balance. Of this, however, Rs. 5,74,132 were due to lapsed grants renewed, so that the balance actually available for expenditure proper, in the year under report, was better than the anticipated balance by Rs. 1,36,454. The total revenue was Rs. 43,83,973, or more by Rs. 4,42,223 than the estimate. It was also more than the actual revenue of the previous year by Rs. 2,60,105. There was a considerable increase in the revenue from Consolidated Rates, Wheel Tax, Licenses, Tobacco Duty, and Halalkhor Cess. The improvement in the yield of Property Rates, generally, must be ascribed to the steady rise in the value of properties, coupled with a better system of assessment and collection; and the enhanced return from Consolidated and Water Rates, particularly, is due to the fact that larger sums were paid both for the current year and preceding year, by the

Port Trust. The consumption of water increased (though not to the full extent expected), owing to the greater quantity of water taken at meter rates by mills. The system of inspection for the purposes of assessing and collecting Wheel Tax continued to improve, and the result was a satisfactory increase in the yield.

3. Referring to the expenditure side of the report, it appears that charges amounting to Rs. 47,621 more than in the previous year, were sanctioned for improvements in the conservancy arrangements of the Health Department. The excess on loan charges is attributable to the fact that interest became due on a portion of the new Sanitary Works Loan, though by adhering to the policy of utilizing for loan works, all available balances, and thereby deferring the raising of the loan as long as possible, a saving of Rs. 2,72,236 was effected in the Budget provision, from which Rs. 2,63,316 was made available towards extinguishing a portion of the loan on short terms. The closing balance, exclusive of deposits, was Rs. 15,62,410, and deducting from this, the amount of lapsed grants since renewed, the actual balance was better than the estimated balance by Rs. 7,41,202 ; whilst the net gain of the year, exclusive of any sums still outstanding, stood at Rs. 6,69,433.

4. In their last "Review" the Council mentioned the fact, that the valuation of the permanent assets of the city had not, up to 31st March 1885, been completed ; and even yet the Commissioner has not been in a position to finish the work completely. So far as the figures have been arrived at, the following is the summary of the results :—Assets, Investments, Loan Funds, and Building Fund, Rs. 53,25,841 ; Advances to Departmental and Loan Works, Rs. 2,59,261; Municipal Property, Rs. 63,32,241; Land and Buildings, Tulsi, Vehar, and Bhandarwada Works, Rs. 1,10,08,387; Roads, Bridges, and other Improvement Works, Rs. 44,64,176 : Stock, Rs. 13,12,208 ; Revenue outstanding (after making full allowance for doubtful claims) recoverable, Rs. 90,000 ; total assets, Rs. 2,87,92,114.

Against this, there are the following liabilities :—Various Loans, Rs. 1,69,84,999 ; Money deposited by contractors and others, Rs. 4,96,981 ; Adjustment Items reserved for

loan works establishment, Rs. 61,138 : total liabilities, Rs. 1,75,43,118. So that the balance of assets is Rs. 1,12,48,996.

In 1881, the revenue amounted to Rs. 38,73,693 ; in 1884-85, it was Rs. 42,13,867 ; and in 1885-86, the amount was Rs. 44,73,973. The expenditure during the same periods was Rs. 37,98,872, Rs. 38,81,020, and Rs. 40,66,940, respectively.

5. Mr. Ollivant's remarks as to whether a modification of the present financial system is not desirable, merit the careful consideration of the Corporation. The question involved is, whether there should not be a more careful distinction than has yet been made, between expenditure out of revenue and out of capital, so as to accelerate the progress and completion of large works, such as the improvement of streets, water-supply, drainage, and other sanitary measures. This modification is desirable in order to prevent an undue share of the burden on account thereof, from falling on the present generation of tax-payers.

6. This report is especially valuable for the information contained in the Commissioner's "special note on three years' working of the Assessment Department," which contrasts the defects of the old system with the improvements that have been introduced since the revision and re-organization of the Assessment and Collection Branch in 1883. The city is now divided into seven wards, and the ward-officers are required to inspect all the properties within their wards every year, a percentage of the work so performed being tested by the Assessor and his assistants. The results which have been attained may be briefly indicated as follows :—The Port Trust Estate, which in 1880 paid Rs. 60,000 per annum, paid in 1885-86, Rs. 1,61,190 a year ; the B. B. and C. I. Railway Company, which in 1880 paid nothing for land under rails, and only Rs. 6,747 for its other property, paid Rs. 22,194 in 1885-86. In 1880, the G. I. P. Railway Company paid but Rs. 16,568, Consolidated Rate, but now offers to pay Rs. 30,000, whilst the Commissioner demands Rs. 32,500. Again, in 1880, the assessed valuation of 36 Mills was Rs. 2,73,969, or an average per Mill of Rs. 7,610 ; in 1885-86, 47 Mills were valued at Rs. 7,32,107, or an average of Rs. 15,576. And vacant lands, which formerly

were unassessed and yielded nothing to the Municipality, have all now been valued, and in the year under review, paid Rs. 15,898, Consolidated Rate. Cocoanut plantations and quarries were formerly very imperfectly assessed, and it is difficult to find out what they paid six years ago. These properties have since been carefully valued, and for last year their valuations were Rs. 1,45,763 and Rs. 20,299 respectively.

In 1880, the number of properties on the books was 25,347; last year the figures were 47,802, or, exclusive of sub-numbers, 46,435. In 1880, the total valuation of all the properties on the books was Rs. 1,33,10,302; in 1885-86 the valuation was Rs. 2,00,25,223. In 1880, the Consolidated Rate, leviable at 8 per cent. was Rs. 9,58,342; last year it was Rs. 13,07,155. In 1880, the charge for Water Rate was Rs. 4,43,974; last year, the amount was Rs. 5,78,404, exclusive of the Rs. 70,000 payable under the enhanced rate on account of works for improvement in the supply and distribution. In 1880, the Halalkhor Cess was Rs. 2,29,174; in 1885-86, it was Rs. 3,01,667. In 1880, the Wheel Tax was Rs. 2,27,495; in 1885-86, it was 3,30,185.

Thus the total leviable revenue from Property Rates and Wheel Tax, rose from Rs. 18,58,987 in 1880, to Rs. 25,17,412 in 1885-86, showing, exclusive of the Rs. 70,000 from Water Rate, a total increase of Rs. 6,58,424.

Notwithstanding this large increase in revenue, the number of appeals to the Chief Presidency Magistrate was only 27 last year, against 76 in 1880; of these appeals, 21 were rejected by the Magistrate last year, against 2 in 1880; and the number of cases in which a reduction was allowed by the Magistrate or by compromise out of Court, was 6 last year, against 74 in 1880.

The percentage of the cost of the Assessment and Collection Department on the actual collections, was 5·26 in 1880 and only 4·08 in 1885-86.

The Registration of Properties has now been completed, every property in Bombay being represented by a ward or assessment number, brought on the books, and required to

be accounted for by a valuation. Of these, 8,742 are small pieces of unproductive land, the Consolidated Rate on which is less than four annas for the half-year, and in respect of which no bills are issued.

Mr. Ollivant does not contend that the entire increase is due solely to the change in system, for the rise in the value of property is unquestionable, but as he observes, it is also unquestionable that until the whole system was re-organized, there was a rise in value unaccompanied by any corresponding rise in assessment. Indeed, assessments were falling while values were rising. What is claimed for the present organization is, that it provides a machinery capable of ensuring a correct registration of changes in value from half-year to half-year, of faithfully tabulating liabilities and exemptions, and of securing punctuality in collection, whilst efficient check is provided against all or any of these objects being defeated.

The Council feel assured that this part of Mr. Ollivant's report will be read with particular interest, and that the Corporation will concur in the opinion, that the Municipality is deeply indebted to Mr. Ollivant, for the great ability and perseverance with which he has carried out the very important undertaking of re-organizing the assessment and collection system, the beneficial results of which are found in these large and substantial additions to the financial resources of the Corporation.

7. With regard to public works and public health, it may be noted that on the completion by Mr. W. Clerke, of the revision of the Tansa Water-supply Scheme, the Corporation on the recommendation of the Commissioner, sanctioned the proposal for obtaining a supply of 17,000,000 gallons per diem at an estimated cost of Rs. 1,23,00,000, leaving the question of the provision of further reservoir accommodation for future decision. Before the setting in of the last rains, the contractors for constructing the dam at Tansa had made such rapid progress with the work, as to ensure sufficient water being impounded to provide for the requirements of the ensuing working season. The contracts for the supply of the mains and other iron pipes work, and for the laying of the pipes, have been given. The Commis-

sioner reports that the roofing over the settling tank and filter beds, Malabar Hill Reservoir, and other works for the improvement of the supply from Vehar and Tulsi were practically completed, and that all the disputes regarding the construction of the Bhundarwada Reservoir were settled.

8. Regarding the question of storm-water drainage, it seems that the following works were either completed or brought near completion :—large sewer from Govallia Tank to the old Main Drain at Arthur Road, intercepting sewer from Paedhoni to Bellasis Road excavation, embankment, and sluice-gates of the reservoir at Mahalakshmi. The beneficial results of these new drains, and of the raising of the Khetwadi and Kamathipura Roads in connection therewith, are evident, but as yet the whole scheme is not complete, and cannot be perfected until all sewage is diverted from the Flats. With the object, amongst other things, of preventing the pollution of the harbour, Back Bay, and the Flats, the new system of sewers has been adopted, which terminating at Love Grove, will provide for the carriage of sewage as distinguished from rain-water to the exclusion of the latter, which will proceed, as heretofore, by gravitation to its natural outlets. The new ovoid sewers in Ripon and Clerk Roads, and the pipe-sewers in connection therewith, along DeLisle and Arthur Roads, and the Agripada District just completed, are in furtherance of this system. The new ovoid sewer from the Fort to the new Main Drain at Crawford Markets in course of construction, is intended to intercept and carry to the Pumping Station, the sewage of the Fort. In dealing with the provision of house-connections, the Commissioner urges that, with the coming in of the Tansa Water in prospect, the objection urged against the making of the connections, namely, that there will not be sufficient water, should not "be allowed to retard for a single day the further development of the scheme in all parts of the city and the introduction of proper house-connections for the removal of sullage." In Kamathipura, the connection-work is now almost completed. The Commissioner says that provision should be made without delay for carrying out the pipe-sewerage and house-branches in that portion of the town adjoining the Queen's Road from Dhobie Talao to Girgam, and that sanction should be accorded to the sewerage of

Nagpada and Mazagon and the sewerage and surface drainage of Parel.

9. During the year, much good work was done in the way of street improvement and road opening, especially by the completion of the Ripon and Fergusson Roads, the extension of Charni Road, and the opening of the fine new overbridge at Byculla. As soon as there are available funds, there are certain new roads, the construction of which, the Commissioner recommends, should be undertaken. And in carrying out such street improvements, he thinks it will be to the interest of the Municipality to acquire ample frontage space in addition to the actual roadway.

10. In commending the Health Officer's report to the attention of the Corporation, the Town Council would observe that the report affords satisfactory proof of much hard work having been done during the year, though the usual difficulties had to be contended with by Surgeon-Major Weir and his staff. The total deaths, 21,850, were 692 less than during the previous year, but only 58 less than the average of five preceding years. The mortality among females was much higher than among males, the figures being 24·58 per 1000 of males, and 33·80 of females. The prinicipal mortality was, as usual, from fever, the number of deaths being 6,648, and diseases of the respiratory system 3,787. Phthisis carried off 2,905, diarrhœa 937, dysentery 608, cholera 598, measles 423, accidents 330, small-pox 55, and all other causes, except still-born, 3,317. The number of births recorded was only 14,964, and the Commissioner's observations on this apparently unsatisfactory discrepancy between deaths and births, will be found of considerable interest, especially as the Health Officer inclines to the opinion that there are some improvements manifest in the system of registration. He dwells on the question of overcrowding in Bombay, and regrets the impotency of the law relating to buildings ; whilst in reference to the prevention of small-pox outbreaks, he is prepared to advocate that stranger adults should be compelled to undergo re-vaccination. Among the sanitary improvements effected during the year, was the provision of several additional urinals and latrines; and a patent furnace for the destruction of street sweepings is now being erected. The expenditure on the department

was Rs. 9,10,619, whilst the income earned by it was Rs. 4,41,166.

11. There was an increase in the revenue from markets, which during the twelve months were fairly well supplied with fruit and vegetables.

12. Under the head of "Education" an addition was made to the responsibility of the Municipality, by the transfer to it of the Victoria and Albert Museum, but the Council are not yet in a position to offer any opinion as to the working of the institution, or as to whether any larger outlay should be incurred on the institution at present. In July last, the Council addressed the Chairman of the Corporation, stating that at a subsequent period they proposed to make certain proposals requiring the re-organization of the Museum collection and establishment; but as yet the Council are not prepared to come forward with such suggestions.

13. The Annual Report from the Auditors to the Corporation is appended to this Administration Report and the large amount of useful information contained therein will be found of considerable value.

DOSABHAI FRAMJI,

Chairman.

The above Review is circulated to the Members of the Municipal Corporation, under the terms of Section 33 of the Bombay Municipal Acts of 1872 and 1878.

ADMINISTRATION REPORT

OF THE

MUNICIPAL COMMISSIONER

INTRODUCTORY.

1. I held the appointment of Municipal Commissioner throughout the year 1885-86, but during the months of July and August 1885, when my association with the Legal Remembrancer in the revision of the Municipal Act necessitated my almost constant absence from Bombay, I was relieved for the most part of the current duties of my office by Mr. H. A. Acworth, who was appointed Deputy Municipal Commissioner under the provisions of Bombay Act III. of 1885.

I.—Corporation and Town Council.

2. Mr. Pherozesha M. Mehta was re-elected to the chair of the Corporation and served for the whole twelve months, thus completing his second year of office. Forty-one meetings were held and eight others convened but adjourned for want of the necessary quorum. There were also fifteen meetings of Special Committees. The Town Council, in the chairmanship of which Sir Frank Souter, C.S.I., was succeeded by Brigade Surgeon H. Cook, M.D., on the 16th October 1885, held fifty-two meetings and fourteen Sub-committee meetings in adddition to the attendances of members for signing cheques and Municipal Debenture Bonds.

3. There were two vacancies in the Town Council during the year, occasioned by the death of Mr. Nowrozjee Furdoonjee, C.I.E., and the resignation of Sir Frank Souter, C.S.I., and in the place of these gentlemen the Hon'ble Mr. Dadabhai Navroji and Lieut.-Colonel A. B. Portman were elected on the 8th October and the 4th November respectively. In the Corporation eleven vacancies occurred, and ten fresh members were elected or appointed as under :—

Vacated.—Mr. Abdul Hussen Mini, Mr. Wilson Bell, Mr. R. Blaney, Mr. Davarkadas Lalubhai, Mr. Grattan Geary, Mr. D. Gostling, Mr. D. S. Kemp, Mr. J. Macfarlane, Mr. Nowrozjee Furdoonjee, C.I.E., Sir Frank Souter, C.S.I., and Mr. James Thorburn.

Elected or appointed.—Mr. J. S. Alston, Surgeon-Major J. Arnott, Mr. Hormusjee Dadabhoy, Mr. Jehanghir M. Cursetjee, Mr. K. M. Shroff, Mr. Mahomed Hussen Hakim, Lieut.-Colonel A. B. Portman, Mr. F. W. Stevens, and Surgeon-Major G. Waters.

II.—Heads of Departments.

4. In consequence of Surgeon-Major T. S. Weir, the Health Officer, who was absent on furlough for 6 months from 4th September 1884, having obtained an extension for 6 months, Surgeon D. C. Davidson continued to act for him. Surgeon-Major Weir resumed his duties on 4th December 1885.

5. The Executive Engineer, Mr. R. Walton, was absent on privilege leave for 2 months from 10th October 1885 to 9th December 1885, during which period the work of the Department was performed by other members of the staff. Mr. C. B. Braham, Deputy Executive Engineer, was granted furlough for 1 year from 2nd March 1886 preliminary to his retirement, and the whole department again came under the direct supervision of Mr. Walton.

6. Whilst Mr. R. P. Brunton, the Assessor and Collector, was absent on privilege leave from 21st October 1885 to 11th January 1886, Rao Saheb Virprasad Tapiprasad acted for him in addition to his own duties. There were no other changes of importance.

III.—Financial.

7. The opening balance was Rs. 10,60,586, being Rs.7,10,586 in excess of the balance which was anticipated when the budget was framed; of this excess however Rs. 5,74,132* were due to lapsed grants of 1884-85 renewed during the past year, so that the balance actually available for expenditure proper to the year under report was better than the anticipated balance by Rs. 1,36,454.

8. The total revenue of the year was Rs. 43,83,973-0-4, or more by Rs. 4,42,223-0-4 than the estimate. It was also more than the actual revenue of the last year by Rs. 2,60,105-2-9.

* Of this sum however Rs. 1,84,725 were on account of works for which loan is to be taken up hereafter, and to that extent the re-grant was merely an advance to suspense account which will be recovered as soon as the proposed loan is sanctioned.

9. The total expenditure was Rs. 39,76,940-1-0 less by Rs. 10,48,620-1-11 than the estimate, but more than the actual expenditure of the last year by Rs. 1,85,919-5-9.

10. The following tables contrast the several items of revenue and expenditure under each main head. Full details will be found in the report of the Controller of Municipal Accounts and the statements annexed thereto :—

A.

REVENUE.

	Actuals for 1885-86.	Estimate for 1885-86.	Actuals for 1884-85.
	Rs. a. p.	Rs.	Rs. a. p.
Consolidated rate at 8 per cent. (including Rs. 2,72,380 contributed by Government and Port Trust, Rs. 50,000 and Rs. 2,22,380, respectively).	14,61,804 10 10	12,10,000	11,80,307 0 6
Wheel-tax, License Fees under Public Conveyance Act, and Toll Fees	3,37,010 2 2	3,14,700	3,13,857 1 11
Liquor Licenses, Tobacco Duty, and Licenses	3,22,927 0 6	3,13,750	3,16,372 1 3
Town Duties	6,79,292 15 0	6,70,000	7,73,430 9 0
Halalkhor Cess	3,16,786 9 3	2,70,000	2,89,616 1 6
Water Rate	6,65,370 3 5	6,68,000	5,96,123 3 5
Returns from Property and Miscellaneous	6,01,281 7 2	4,95,300	6,54,161 12 0
Total Rs....	43,83,973 0 4	39,41,750	41,23,867 13 7

B.

EXPENDITURE.

	Actuals for 1885-86.	Estimate for 1885-86 (including subsequent Grants and Transfers).	Actuals for 1884-85.
	Rs. a. p.	Rs. a. p.	Rs. a. p.
General Superintendence	1,66,827 3 10	1,71,144 4 9	1,65,257 14 10
Assessment and Collection Departments	1,81,001 10 6	1,86,102 7 6	1,61,570 6 8
Police and Fire Brigade	3,10,548 7 4	3,57,382 10 6	3,36,725 12 0
Public Health Department	9,99,322 10 9	10,24,699 1 2	9,23,313 14 5
Public Works, Ordinary	9,64,842 14 0	11,14,834 3 6	10,09,886 15 7

Public Gardens	23,863 8 7	25,691 13 7	22,737 9 11
Municipal Debt	7,87,527 15 6	10,84,319 3 11	7,37,608 6 11
Pensions, Gratuities, and Compassionate Allowances	18,317 12 3	22,142 10 2	23,292 6 4
Education	25,950 0 0	28,450 0 0	22,500 0 0
Hospitals and Dispensaries	31,349 0 6	45,108 0 0	34,511 8 7
Miscellaneous	2,72,269 10 10	4,85,706 13 3	2,11,951 6 6
Total... Rs.	39,76,940 1 0	50,25,560 2 11	37,91,090 11 3

Differences on Revenue.

11. On comparing the revenue of the year under report with the budget figures and the actuals of the previous year, it will be seen that there is an increase under the heads of consolidated rate, wheel-tax, licenses and tobacco duty, and halalkhor cess, and that whereas town duties and miscellaneous items are better than the estimate by Rs. 9,293 and Rs. 1,05,981 respectively, they are less than the corresponding yield of last year by Rs. 94,137 and Rs. 52,880, whilst water rate, though less by Rs. 2,630 than the estimate, shews an improvement, as between the two years, of Rs. 69,247. The increase in the revenue derived from *property rates* generally must be ascribed to the steady rise in values, coupled with a better system of assessment and collection, and that from consolidated rate and water in particular to the fact that larger sums (as hereafter explained) were paid by the Port Trust, both for the current and preceding year, and that owing to a recovery from the temporary depression in the mill industries, there was again a larger consumption (though not to the full extent anticipated) of water paid for at the full meter rates. Also owing to continuous improvement in the system of inspection, the revenue from *wheel-tax* was more satisfactory than in former years. The *tobacco duty* yielded Rs. 1,79,177-0-6, about Rs. 4,038-0-8 more than the average of the preceding five years. The reason for the decrease in revenue from *town duties* as compared with that of last year is attributable to the fact that in that year there were exceptionally large imports of sugar, and also to a reduction in the value on which the duty has since been calculated. The differences under the head of *miscellaneous items* are mainly due to account adjustments ; but the receipts from miscellaneous fees were larger than those of the preceding year by Rs. 11,221.

Differences in Expenditure.

12. On the expenditure side the differences in the several columns are to be explained briefly as follows :—

General Superintendence cost more than it did in the preceding year, because a Deputy Commissioner was appointed for a short time to relieve me of current duties, and the sum expended under this head was less than the

sum provided, because the Deputy-Commissioner was employed only for two months instead of three for which his salary was voted, and because there were savings in the Town Council fees and contingent charges and in the account establishment.

Assessment and Collection cost more than it did in the preceding year, because the salary of the Special Assistant to the Municipal Commissioner was debited to this its proper head (his time being exclusively occupied in duties connected with this Department), and because there were many new members of the establishment who last year, during their period of probation, had drawn less than the full salaries provided in the budget. The difference between actuals and estimate is only nominal, because the grant for certain furniture and printing charges which was not expended within the year has been since renewed.

Police and Fire Brigade.—Of the difference shewn between the actuals and the budget, a sum only of about Rs. 5,000 represents real savings, these being due to the absence of the Police Commissioner on leave for part of the year and to less expenditure on petty items. The balance represents expenditure for which the grant has since been renewed. The reason for additional expenditure as between the two years was, as explained in connection with the budget, first, provision for new fire stations; and, secondly, share of loan charges on account of special mains laid for the better distribution of water in case of fire. There was however a reduction of Rs. 2,528 in the amount paid to Government on account of Police consequent upon the Corporation undertaking in lieu thereof from October 1885 the maintenance of the Victoria Museum and of the Queen's statue on the Esplanade with lighting charges.

Public Health Department.—In the budget for the year under report new charges to the extent of Rs. 47,621 were sanctioned principally on account of extending and improving conservancy arrangements, and during the year it was found necessary to add to the grant on account of the abnormally high prices which had to be paid for fodder owing to the special demand created by the Soudan Expedition. Partly however owing to the full establishment not having been

engaged from the commencement of the year, and partly on account of miscellaneous savings, a sum of Rs. 25,377 remained unexpended, of which Rs. 3,587 were subsequently re-granted to cover outlay incurred.

On *Public Works*, ordinary and extraordinary, including establishments and maintenance but excluding works debited to loan funds, the actual expenditure has been in each of the two past years about 11½ lakhs, and reference will be made hereafter to the most important of these works. Of the amount provided in the estimate, Rs. 4,34,850 were not expended and form part of the nominal closing balance. But the grant of this sum, less about Rs. 13,500, savings on actuals, has since been renewed to provide for works in course of construction, many of which were not sanctioned until late in the year, and to pay for charges in respect of completed works the accounts of which had not been finally adjusted at the close of the year.

The slight differences under the heads *Public Gardens* and *Pensions and Gratuities* call for no remark here.

The excess in "*Debt charges*" over those of last year is attributable to the fact that interest became due on a portion of the new Sanitary Works Loan, but by adhering to the policy of utilizing for loan works all available balances and thereby deferring the raising of the loan as long as possible, a saving of Rs. 2,72,236 was effected in the budget provision and Rs. 24,555 remained unspent on account of unclaimed interest. The latter sum has of course been re-granted, whilst out of the former a grant of Rs. 2,63,316 has been renewed, or were strictly speaking made, for extinguishing a portion of the loan in short terms.

The increase under the head of *Education* is due to the transfer of the Victoria Museum already alluded to and to a special grant for Art Specimens, also to a contribution of Rs. 2,500 to the new Veterinary College, which however remained unexpended owing to the college not having been opened within the year.

The budget grant for *Hospitals* had been increased by a grant of Rs. 6,000 in aid of the Jaffer Sulliman Dispensary

for women and children, and of Rs 3,108 for the maintenance of a cholera hospital. The latter sum was not spent owing to difficulties in finding a site for the establishment of the hospital; and the sum disbursed on account of the Gokaldas Tejpal Hospital was only three-fourths of the usual amount.

Under the somewhat comprehensive term "*Miscellaneous*," the most important new items in the actuals of the current year were payments of Rs. 1,74,000 to the credit of invested funds for New Municipal Buildings and Nesbit Road Bridge. The budget provision also comprised Rs. 2,56,125 on account of advances to loan works pending the raising of a loan; but of this sum only Rs. 69,876 were expended, whilst in the previous year's actuals were included Rs. 1,60,997, written off as loss on the Panwell Brick Works and one or two other special items of a non-recurring nature.

13. The closing balance, exclusive of deposits, was Rs. 15,62,410. If from this be deducted Rs. 7,21,208, which sum represents the lapsed grants since renewed on account of incomplete works or undischarged liabilities, the actual balance was better than the estimated balance by Rs. 7,41,202.*

14. A reference to the first paragraph of this chapter will show that Rs. 1,36,454 of this surplus must be ascribed to the opening balance, so that the actual gain of the year (exclusive of revenue in arrears) was Rs. 6,04,748. But inasmuch as a distinction has been made between a real and a nominal surplus, by deducting from the total balance all lapsed grants which have since been re-appropriated, so must a corresponding addition be made by taking into account revenue of the year since collected. This amounts to Rs. 64,685. Thus the net gain of the year, exclusive of any sums still outstanding, stands at Rs. 6,69,433.

---

* To this balance must be added Rs. 2,48,404 as soon as sanction is obtained to raising the necessary loan, so allowing the loan-works suspense account to be adjusted. (*See* note to para. 7 above.)

Assets and Liabilities.

15. The following is a summary of assets and liabilities of all kinds:—

Assets.	Rs.
I.—Investments, Loan Funds, and Building Fund	53,25,841
II.—Advances, Departmental and to Loan Works	2,59,261
III.—Municipal Property	63,32,241
(1) Land and Buildings, Tulsi, Vehar, and Bhundarwada Works	1,10,08,387
(2) Roads, Bridges, and other Improvement Works	44,64,176
(3) Stock	13,12,208
	2,87,02,114
IV.—Revenue outstanding and (after making full allowance for doubtful claims) recoverable	90,000
Total Assets...	2,87,92,114
Deduct Total Liabilities	1,75,43,118
Value of Assets over Liabilities	1,12,48,996

Liabilities.	Rs.
I.—By various Loans	1,69,84,999
II.—Deposits by Contractors, &c.	4,96,981
III.—Adjustment items (reserved for Loan Works Establishment)	61,138
Total Liabilities...	1,75,43,118

16. Our financial position at the beginning and end of the year respectively with regard to the several Loan Accounts is exhibited in the following tabular form :—

Name of Loan.	Amount of liability at the beginning of the year.	Increase during the year.	Decrease during the year.	Amount of liability at the close of the year, exclusive of future annual interest.	Year in which the whole liability will be discharged.
	Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.	
Consolidated Loan	(*a*)54,33,658 13 3	2,43,253 1 6	3,56,652 4 10	53,20,259 9 11	1910
New Drainage Loan of 1878	(*a*)25,42,500 0 0	1,26,212 8 0	1,56,212 8 0	25,12,500 0 0	1918
Market and House Rate Loans of 1867 and 1868 amounting to Rs. 17,38,000		Fully invested.			
Sanitary Works Loan.	...	44,00,000 0 0 (*a*)91,284 9 10	91,284 9 10	44,00,000 0 0	1925
Total...Rs.	79,76,158 13 3	48,60,750 3 4	6,04,149 6 8	122,32,759 9 11	
Vehar Debt	(*b*) 30,67,684 13 7	1,21,754 5 3	1,75,200 0 0	30,14,239 2 10	1915
Total...Rs.	1,10,43,843 10 10	49,82,504 8 7	7,79,349 6 8	1,52,46,998 12 9	

(*a*) *These sums represent the interest which accrued for the year.*
(*b*) *As per Accountant-General's statement.*

17. I find that the revenue, expenditure, and balances of the past five years compare as follows :—

	1881.	1882-83. 15 months.	1883-84.	1884-85.	1885-86.
	Rs.	Rs.	Rs.	Rs.	Rs.
Revenue	38,73,693	46,I2,240	37,37,272	42,13.867	44,73,973
Expenditure	37,98,872	47,53,631	37,15.812	38,81,020	40,66.940
Closing balance (including advances to loan works, &c., and minor deposits	9,42,063	9,33,706	7,40,919	10,60,586	15,62,410
Add—Recoverable Revenue Outstandings	2,50,000	2,00,000	3,38,439	3,41,115	90,000
	11,92,063	11,33,706	10,79,358	14,01,701	16,52,410
Deduct — Uncompleted works, &c., for which grants had to be renewed in following year	2,00,000	3,00,000	3,31,257	*5,74,132	†7,21,208
Net balance available for requirements of following year	9,92,063	8,33,706	7,48,101	7,35,898	9,31,202

* Exclusive of Rs. 91,671 renewed for repayment of capital out of actual savings on debt.

† Exclusive of Rs. 2,63,316 renewed for repayment of capital out of actual savings on debt.

18. I think it is worthy of the careful consideration of the Town Council and Corporation whether a modification of our present financial system is not desirable by a more careful distinction than has yet been made between expenditure out of revenue and out of capital both with a view of accelerating the progress and completion of large works for the improvement of streets, water-supply, drainage, and other sanitary measures, and of preventing an unfair share of the burden on account thereof from falling on present taxpayers. I also look forward to a great change for the better being introduced by legislation, long asked for and now in prospect, with regard to our position in respect of borrowing repayment and investment.

IV.—Assessment and Collection of Revenue.

Registration of Properties.

19. The number of properties on the Assessment Book at the close of 1884-85 was 36,093, and at the close of the year under report 47,802. Of these, 30,648 are buildings, 199 salt-pans, 1,039 cocoanut plantations, and 15,916 vacant lands, &c. Of the total number now registered, 34,750 are assessed to the consolidated rate, 4,310 are exempt or compounded for on special terms, and 8,742 are small pieces of unproductive land, the consolidated rate on which is less than annas 4 for the half-year, and in respect of which no bills are accordingly issued. The registration of properties has now been completed, every property in Bombay being now represented by a ward or assessment number brought on the Assessment Book and required to be accounted for by a valuation.

Valuation.

20. The gross recorded value of these properties for the year under report is contrasted with the gross recorded value for the preceding year in the following table:—

Closing Valuation of 1884-85.	Opening Valuation for 1885-86, section 79.	Valuation after Complaint, section 80.		Subsequent Amendments, section 81.		Closing Valuation of 1885-86.				Increase.
		Number of Complaints.	Amount after disposal of Complaints.	Reductions.	Enhancements.	Valuation chargeable with Consolidated Rate.	Valuation exempt from Consolidated Rate, section 77.	Valtn. for which no Consolidated Rate Bills issued.	Total.	
1	2	3	4	5	6	7	8	9	10	11
Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
1,53,82,744	1,67,43,251	10,143	1,64,09,138	1,15,027	37,31,112	1,81,43,384	18,63,969	17,870	2,00,25,223	46,42,479

The increase in valuation shown by column 11 may be apportioned to the following heads:—

(1) Registration of properties not previously on the books (including Rs. 30,62,955 on account of Port Trust Properties), correction of under-assessments, and rise in rents. Rs. 42,54,855
(2) Erection of new buildings..... „ 2,46,718
(3) Enlargements and improvements ..... „ 1,40,906

21. The question of the assessment of the Port Trust Estate which went up to Government in 1884-85 was decided in the year under report. Under section 36 of the Port Trust Act of 1879, Government have determined "that Rs. 1,61,190

shall be the lump sum to be paid by the Port Trustees for each of the years 1884-85 and 1885-86." Government have further directed "that the same sum shall be paid annually for the next successive three years, subject however to the proviso that the amount will be liable to proportionate increase in the event of there being any increase in the general consolidated rate." (*See* Government Resolution, Marine Department, No. 400, dated 19th September 1885.)

Property Rates.

22. The increase in valuation has resulted in a corresponding increase in the demand on account of property rates, as exhibited in the following comparative tables:—

Consolidated Rate.

1884-85.			1885-86.			Increase.
8 per cent. charge on Value.	Compounded Payments made by Government and Port Trustees.	Total.	8 per cent. charge on Value.	Compounded Payments made by Government and Port Trustees.	Total.	
Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.
10,01,431 15 11	1,50,000 0 0	11,51,431 15 11	10,95,965 1 11	2,11,190 0 0	13,07,155 1 11	1,55,723 2 0

Halalkhor Rate.

1884-85.			1885-86.			Increase.
On Value.	Special Service.	Total.	On Value.	Special Service.	Total.	
Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.
2,49,844 3 4	27,472 12 3	2,77,316 15 7	2,70,683 13 1	30,983 7 1	3,01,667 4 2	24,350 4 7

Water Rate.

1884-85.				1885-86.				Increase.
On Value.	Compounded.	By Meter Measurement.	Total.	On Value.	Compounded.	By Meter Measurement.	Total.	
Rs. a. p.	a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.
2,63,555 5 6	Rs. 3,133 2 6	2,85,265 9 8	5,51,954 1 7	3,50,041 11 7	Rs. 2,645 4 9	2,95,717 10 7	6,48,404 10 11	96,450 9 4

The total demand on account of property rates for the year under report thus amounted to Rs. 22,57,227-1-0 as against Rs. 19,80,703-1-1 in 1884-85. To this sum, must be added Rs. 7,780-14-5, being demands for previous years now for the first time brought to account.

Collection.

23. Of the total demand, Rs. 1,805-6-9 were allowed as remission or drawback under section 76 of the Act, and Rs. 2,11,190, representing the sum payable by Government and the Port Trustees, were paid direct into the Municipal Account Office. For the recovery of the remainder, bills were prepared and issued by the Assessment Department as follows :—

Years.	Bills to be issued.		Bills issued.		Bills remaining to be issued at the end of 1885-86.	
	No.	Amount.	No.	Amount.	No.	Amount.
		Rs. a. p.		Rs. a. p.		Rs. a. p.
1830	2	32 6 6	2	32 6 6	..	....
1881	6	167 8 0	6	167 8 0	..	....
1882	16	1,242 3 4	16	1,242 3 4	..	....
1st Quarter of 1883	7	79 2 10	7	70 2 10	..	....
1883-84	49	1,175 9 9	49	1,175 9 9	..	....
1884-85	205	5,093 0 0	205	5,093 0 0	..	....
1885-86	62,716	20,44,231 10 3	62,716	20,44,231 10 3	..	....
Total	63,001	20,52,012 8 8	63,001	20,52,012 8 8	..	....

As at the end of 1883-84 and 1884-85, so at the end of the year under report, 1885-86, no bills remained to be issued at the close of the year.

24. The outstanding balance on account of property rates at the end of 1884-85, as shown in the last year's report, was Rs. 2,66,825-9-5. To this must be added the total demand for current and former years as ascertained in the year under report as above, and the total revenue for collection amounted to Rs. 25,30,028-2-1 as against Rs. 23,48,742-8-11 in 1884-85,

25. The following table exhibits the details of this amount and the progress made in recovering it:—

Rates.	To be Collected.			Collected			Uncollected.	Deduct Irrecoverable Bills.				Balance outstanding at the end of 1885-86.		
	Opening Balance out-standing.	Total of Bills issued during 1885-86.	Amount paid by Government and Port Trustees without Bills.	On account of former years.	On account of 1885-86.	Total.		On account of current year.	On account of former years.		Total.	Amount of Bills against G. I. P. Railway Company carried to General Account.	On account of former years.	On account of 1885-86.	Total.
									Time-barred Bills.	Bills cancelled as erroneous.

It will be observed that the balance outstanding at the close of the year under report was Rs. 1,00,685-8-10 only; of this sum, Rs. 60,601-14-2 have since been collected, and Rs. 1,698-1-2 are ascribed to bills which are practically irrecoverable.

Wheel-tax.

26. The opening outstanding balance on account of wheel-tax was Rs. 13,100-4-9. The demand for the year under report was Rs. 1,70,437, showing an increase of Rs. 1,103-3-0 over that of the preceding year. The causes of increase are shown in the following table:—

For 1884-85.				For 1885-86.				Increase.				Decrease.				Net Increase.
Number at the end of 1884-85.				Number at the end of 1885-86.												
4-wheeled Carriages.	2-wheeled Carriages.	Horses.	Ponies.	Amount.	4-wheeled Carriages.	2-wheeled Carriages.	Horses.	Ponies.	Labour Carts.	Amount.	4-wheeled Carriages.	2-wheeled Carriages.	Horses.	Ponies.	Labour Carts.	Amount.	4-wheeled Carriages.	2-wheeled Carriages.	Horses.	Ponies.	Labour Carts.	Amount.	
2,749	537	3,160	273	Rs. 1,69,333-13-0	2,784	487	3110	301	23	Rs. 1,70,437	35	.....	.....	28	23	.....	.....	50	40	.....	.....	.....	Rs. 1,103-3-0

27. To the amount here given must be added Rs. 761-11-0 ascertained in the year under report to be due for 1884-85. The total number of bills issued during the year was 9,241, and the process of recovery was attended with the following results:—

Name of Article.	To be Collected.			Collected.			Uncollected.	Deduct Irrecoverable Bills.				Balance outstanding at the end of 1885-86.		
	Opening Balance outstanding.	Total of Bills issued during 1885-86.	Total to be collected.	On account of former years.	On account of 1885-86.	Total.		On account of former years.			On account of current year.	On account of former years.	On account of 1885-86.	Total.

Beer			7											
Ghee			1,32											
Timber ..			98											
Firewood..			63											
Total..			14,36											

28. It will be seen that the balance outstanding at the close of the year was Rs. 10,319-2-9 ; of this sum, Rs. 4,561-2-3 have since been collected. To the collections on account of wheel-tax shown above must be added Rs. 1,44,484-12-0 recovered from the owners of licensed public conveyances and Rs. 15,366 realized from the toll at the Mahim and Sion Causeways.

Miscellaneous Revenue.

29. Rs. 6,267-8-6 against Rs. 6,429-11-0 in the previous year were derived from notice and other process and inspection fees. Rs. 2,932-5-1 were received on account of the hire of water meters against Rs. 2,518-12-0 in the preceding year.

Tax on Fire Insurance Companies.

30. The collections under this head amounted to Rs. 29,914 in the year under report as against Rs. 25,517 in the year preceding.

Refunds.

31. The total of refunds allowed under section 82 of the Municipal Act and on account of over-collections under all heads amounts to Rs. 6,791-4-1 as against Rs. 6,105-4-11 during 1884-85. The subjoined table gives the details of these figures:—

	1880.	1881.	1882.	1st qr., 1883.	1883-84.	1884-85.	1885-86.	Total.

Appeals.

32. There were 27 appeals to the Chief Presidency Magistrate under sections 127 and 128 of the Municipal Act ; of these, 21 were dismissed, 4 allowed, and 2 settled by consent.

Town Duty.

33. Full particulars as to the income derived from town duty, and the refunds granted thereon, will be found in the following

table, which, it will be seen, shows a decrease in the net revenue of Rs. 67,164-11-0, which is mainly due to exceptionally large imports of sugar during 1884-85 and to a reduction in the value on which the duty has since been calculated :—

1884-85.	COLLECTIONS.						REFUNDS.						NET REVENUE.

34. In compliance with the wish of the Corporation expressed in their Resolution No. 1506, dated 28th July 1882, I append to my report of this year a special note giving a summary of the results effected in the Assessment and Collection of property rates and Wheel-tax since the revision and re-organization of the Department in 1883. Until the end of the year 1887-88, by which time it may be expected that a new Municipal Act will have come into force, rendering certain changes necessary or expedient, I propose to retain the staff on its present footing. Experience, as shown by the results summarized, has proved the present organization to be satisfactory. But some alterations in minor details may be found advisable, and it may then be possible without loss of efficiency to effect an economy in management, especially in relation to the scrutiny of refund claims of all description.

V.—Public Works.

Water-supply.

35. Chief in importance of the works undertaken or in progress during the year was the revision by Mr. Clerke of the *Tansa Water-supply project*, to which I briefly alluded in last year's report, followed by the adoption of the revised scheme and the commencement of operations. Such progress had been made in the surveys up to the beginning of the rains of 1885 that, on the 13th August, Mr. Clerke was able to send in a sufficiently complete report, and his proposals, after being subjected to the criticism of the Consulting Engineer, Mr. Forde, were submitted by me to the Corporation on the 13th October. As I then discussed the subject at some length in a printed report which has been separately published, any further detailed description here would be useless repetition. At a Special General Meeting, held on the 19th November, the Corporation resolved to proceed with the scheme as recommended for obtaining a daily supply of 17 million gallons at an estimated cost of Rs. 1,23,00,000, leaving the question of further reservoir accommodation (for storage and distribution) to be decided hereafter. At the same time an earnest appeal, which has since been renewed, was made to Government for assistance in raising the requisite loan, and, for permission to extend the period for the repayment to Government of the remainder of the Vehar Debt, in order to relieve the present generation from an undue share of the annual burden, which works of such magnitude and such

lasting benefit will entail, until the outlay, principal and interest, shall have been cleared off. The Bombay Government signified their approval of the scheme and recommended the request for financial assistance to the favourable consideration of the Government of India. In reply, the Government of India stated that they were unable to accede to this application, but, as I write, I have received information that, in answer to the renewed solicitation of the Corporation, that part of the request which related to the extension of the Vehar Debt period has been granted. Meanwhile the preparation of detailed plans and estimates was proceeded with, and tenders for the construction of the dam and for the supply of iron pipes were invited. With regard to the former, the Town Council, on the 13th January, sanctioned my acceptance of Messrs. Glover and Co.'s tender, amounting approximately to Rs. 29,00,000. The excavation was forthwith commenced, and the construction of a portion of the dam across the river was pushed on to ensure water being impounded in the rains of 1886 sufficient for the vigorous prosecution of the work in the next working season. On the 24th March, the Town Council sanctioned my acceptance of Messrs. Macfarlane Strang and Co.'s tender for the supply of pipes and sluices, amounting approximately to £270,000. A statement relating the further progress of operations will more fittingly find a place in my report on the present year's administration.

36. Amongst other large works for the improvement of the supply and distribution of water in the city which were practically completed within the year under report, I may specially mention the *roofing over the settling tank and filter beds at the Malabar Hill Reservoir and the arrangements for direct connection between the Tulsi main and the filter beds—the new catch-water channels at Vehar and Tulsi—the raising of the Tulsi dams to the full height—the construction of filter beds at Vehar—and the laying of the new 24" main from Vehar to Bombay.* The utility of these Vehar and Tulsi works, which has been explained at some length in previous reports, has since been fully realized. All disputes in connection with the final settlement of accounts relating to the construction of the *Bhandarvada Reservoir* have been compromised, and in view of the additional supply now to be obtained from Tansa, the city is to be congratulated upon the location of this reservoir at its present height,

notwithstanding the fact that it may exercise too great a strain on the capabilities of the Vehar Lake to meet the increasing exigencies of consumption in relation to the existing means of supply. The following *roads were provided for the first time with water mains*:—Kala Choki Road, Fergusson Road, Chinch Bandar Road, and Victoria Bandar, Colaba—and in many parts of the city the old *distribution-pipes were replaced by others of more adequate dimensions.* This work and the progress made in the development of the *Deacon's meter system for the prevention of waste* will form the subject of remarks in a subsequent report. During the year *new quarters were constructed at the Chinchpoogly Depôt* for the water-works staff, and this concentration cannot fail to be of service for the speedy execution of repairs under such emergency as is occasioned by the bursting of a water main. Quarters were also built at Tulsi for the staff employed there.

Drainage and Sewerage.

37. The storm-water drainage works, sanctioned by the Corporation in March 1882 after much deliberation and discussion, were practically brought to completion within the year, comprising especially the following, *viz.*, large *sewer from the Gowalia Tank to the old main drain* at Arthur Road, large intercepting *sewer from Pydhoni to Bellasis Road, excavation embankment and sluice gates of the storm-water reservoir at Mahalakshmi.* The beneficial result of these works and of the raising of Khetwadi and Kamathipura roads in connection therewith is incontestable, and has been amply proved in the exceptionally heavy rains of the monsoon which is now terminating. Places which formerly were knee-deep in water for many hours after a comparatively moderate fall of rain are now dry in a very short space of time, and the nuisance which has always existed on the Flats during certain months has now been much reduced by the new arrangements, which provide both for discharging the polluted water as quickly as possible and for flushing out the basin periodically with a large body of sea-water. The result achieved, which is still necessarily incomplete, is perhaps hardly as fairly estimated as it deserves to be, because—

(1) the objects to be attained, and the difficulty in attaining them, can only be known to the comparative few who have studied the question comprehensively, and out of

the many who can find just cause of complaint with the nuisance, which, though less now than formerly, is at times very unmistakeable on the Flats, few discriminate as to the cause of that nuisance, and fewer still have practical experience of the far greater nuisance and inconvenience which was occasioned, until these measures were introduced, by the ponding up of water in certain populous parts of the city ;

(2) the scheme is incomplete in two ways ; first, because it does not, and never pretended to, deal with anything but a specified limited area (that however which is the most densely populated),and persons still suffering from floods, whether on the Queen's Road or at Parel, cannot be expected to appreciate a surface drainage scheme from which, so far as their own experience is concerned, no benefit is derived ; and, secondly, because the scheme cannot, as has repeatedly been stated from the outset, even within its own proper area, be perfected, so far as freedom from nuisance is concerned, until all sewage is diverted from the Flats, as it should unquestionably and without any further delay be diverted, into channels adapted to its reception and capable of carrying it away to a suitable point of discharge. Whatever good may have been accomplished by this or any other Municipal improvement weighs but little in the balance of popular judgment so long as an undoubted evil remains impressing itself upon the perception.

38. The old drains and sewers, into which storm-water finds and must continue to find free admission, lead either to the Harbour, Back Bay, or the Flats, and any filthy matter which obtains entrance into the same channels must follow the same course as the rain-water. With the object, amongst other things, of preventing the pollution thus caused, a new system of sewers has been adopted, which terminating at Love Grove, where expensive pumping machinery has been erected, will provide for the carriage of all polluted matter, *i.e.*, sewage as distinguished from rain-water, to the exclusion of the latter, which will proceed by gravitation as heretofore to its natural outlets. Another object of the new system is to provide, more economically than could otherwise be done, efficient sewerage for large areas now being rapidly built over,

which are absolutely destitute of any proper means for getting rid of liquid pollution. The principal works in progress during the year in furtherance of this system were as follows:—*completion of the new ovoid sewers in Ripon and Clerk Roads and of* 5·94 *miles pipe sewer* in connection therewith along *the DeLisle Road, Arthur Road*, and in *the Agripada District*. The whole of this area, which is now being covered with buildings, has hitherto been without sewerage of any kind whatever.

39. About 3,000 feet of the *new ovoid sewer from the Fort* to the new main sewer at the Crawford Market were constructed during the year, but for the reasons given in last year's report the progress made has not been as satisfactory as could have been wished. This sewer, whilst serving the many new and important buildings along and adjacent to the road from the Bazar-gate Garden to the Crawford Market, a locality hitherto unprovided with sewerage of any kind, was chiefly designed to intercept and carry to the new pumping station the sewage of the Fort, which until now has been discharged into the harbour. As a temporary expedient, and until the new pipe sewers of the Fort are completed and in use, it will serve the old sewers during the dry months. *The work of constructing these pipe sewers*, the contract for which was let in March 1885, is being rapidly proceeded with, and 30 per cent. of it has already been completed.

40. Important *improvements and additions were made in the new pumping station* at a cost of Rs. 32,217, the work being carried out departmentally and within the estimate. The accommodation of the cooling tank was increased from 560 to 2,978 square yards, so that sufficient water might be stored for the working of all four engines. A weigh-bridge, fitting-shed, and store-room were erected and a kiln was constructed in immediate proximity to the shred-lifter, which prevents solid refuse from finding its way to and blocking the pumps. By the arrangement adopted the shred-lifting chamber is covered in, and the refuse, which is often most offensive, is at once burnt without being exposed to the open air.

41. *House connections.*—It has been repeatedly explained that what are somewhat misleadingly termed "House connections" form an inseparable feature of the new system,

that is, there must be some channel, means, or appliance, by whatever name it be called, which will conduct polluted water or excrementitious matter from the premises where the pollution occurs to the nearest sewer, and it is subject to the condition that whilst it is provided with proper methods of ventilation to prevent danger or nuisance, it *must not* have such openings or be so situated as to allow of the admission of any appreciable quantity of rain-water to the sewers ; for these sewers are not intended or adapted to carry off the heavy rainfall of Bombay, and if they could accommodate it, the pumps at the end of the sewers could not lift it. Polluted matter therefore which passes off from premises otherwise than by means fulfilling this condition can only follow the same course which rain-water follows, and consequently until the so-called house connections on the new system are generally introduced, so long must the rain-water which passes off to the Harbour, Back Bay or the Flats, as the case may be, remain highly charged with polluted matter, These connections may be made to serve for the removal of sullage, or of excrement, or of both.* If expense be no object, the present system of halalkhor service can be maintained so long as halalkhors are found willing to serve ; but none the less must there be means for the removal of sullage, which fulfil the one indispensable condition. The cogency of this requirement is affected in a two-fold manner by the determination to double the present water-supply; first, because the quantity of polluted water to be carried off will be doubled, and there is great urgency on sanitary grounds for making provision for this; and, secondly, because the most valid argument hitherto used against the completion of the sewerage scheme, which, however vigorously proceeded with, must occupy five years, has been based on the want of additional water for flushing purposes. The latter consideration however should not, with the Tansa supply in prospect, be allowed to retard for a single day the further development of the scheme in all parts of the city and the introduction of proper house connections for the removal of sullage. During the year under report, the Corporation, after a report by a Special

---

* *Note.*—The purport of the remarks which I made on this subject in my Annual Report for 1883-84 seems to have been curiously misunderstood in the Army Sanitary Commission, judging from the observations contained by paras. 21 and 22 of their memorandum received under the Secretary of State's despatch of the 12th November 1885.

ASIAT

Committee, re-affirmed their decision that the *cost of house connections* in what is known as *"the First Drainage Section,"* should be borne by the Municipality, and presumably what is done at the public expense in one part of the town must be done in others. The work is of a difficult nature, owing to the places in which and the circumstances under which it has to be executed, and though the rates estimated have been pronounced by the Consulting Engineer to be ample, two invitations have failed to secure a tender within the amount. With the sanction of the Town Council, it was determined to obtain from the manufacturers the whole of the pipes and iron-work required, and contracts have accordingly been entered into, and to proceed departmentally in one selected sub-section, *viz.*, *Khetwadi*, with the execution of the work, so that further experience as to rates might be gained. The house connection work in the adjoining district of *Kamathipura*, which was in progress under a previous contract, is now almost completed. Delay was caused by the fact that in the conveyance of the pipes from England there was an abnormally large percentage of breakage, in respect of which the liability falls on the contractors. It will be remembered that these house connections are for the conveyance of sullage only.

42. It is of the utmost consequence that, in addition to proceeding with the work of house connections in newly-sewered districts, provision should be made without delay for carrying out the *pipe sewerage and house branches* in that portion of the town adjoining the *Queen's Road from Dhobi Talao to Girgam*. There are constant and well-founded complaints as to the present state of things, and plans and estimates have already been prepared. Sanction should also be given for surveys, to be followed by action for the *sewerage of Nagpada and Mazagon* and for the *sewerage and surface drainage of Parel*. From the growth of buildings in this neighbourhood and the filling caused by this and by railway works, former levels have been completely changed. This change has not been accompanied by any corresponding provision for drainage, and the consequence is that the rain-water finds no ready means of exit, and highly charged with sewage, as it is, remains ponded up much to the nuisance and detriment of that locality.

43. Roads. No opportunity was lost of carrying out *street improvements* under the "set-back" provisions of the Municipal Act, and several road extensions of great importance were accomplished during the year, foremost amongst which I must mention the new *Ripon Road*, which traverses the Old Race-course to the centre of the Flats. This road, besides providing direct facilities for traffic, has had the advantage (contemplated as part of the design) of opening up a miserable district where houses were being erected pell-mell without any regard to sanitary requirements or to the reservation of street space. This is one of many matters in respect of which the present law imperatively needs amendment. The *Fergusson Road* from Parel to Worli was opened for traffic. The *Charni Road* was extended to the Falkland Road, thus affording good and direct communication between Byculla and the Queen's Road ; and by the purchase and demolition of buildings at the junction of *Gunbow Lane* and *Hornby Road*, a new mouth was given to the streets in that crowded part of the Fort, and a valuable breathing space secured. I must not omit to mention the very great improvement effected by the construction of a *new railway bridge at Byculla*, 60 feet in width. This work, which had long been the subject of negotiation with the G. I. P. Railway Company, was executed by, and at the cost of, the Company on the Municipality undertaking to pay for another new bridge to take the place of the present level-crossing at Nesbit Road. Before leaving this branch of my subject, I venture to place on record my opinion of the desirability of opening out, as soon as funds admit, the following new roads for which plans and estimates have been prepared :—

(1) Road from the Elphinstone Bridge opposite the Prince's Dock through the Nowroji Hill Estate to Umarkhadi, and thence subsequently to Nal Bazar. This will be a most useful feeder to the Dock, and will relieve the overcrowded Masjid Bandar Street (the *only* thoroughfare at present) from much of its traffic.

(2) Road through Mazagon to the north end of the Frere Road in connection with a bridge over the numerous crossings there, to be built by the G. I. P. Railway Company, which will thus give another direct thoroughfare from north to south.

(3) Road from the Esplanade (Framji Cowasji Institute) to join the Queen's Road near the Marine Lines Hospital.

(4) Road opposite to the University Gardens to open out Hummum Street to the sea-breeze and to do for the southern portion of the Fort what the Gunbow Lane improvement has done for the northern. This street would subsequently be extended to the Custom House.

44. In carrying out these and other street improvements, notably the opening out of new roads on the Flats and the widening of existing thoroughfares in the trade centres of the city, it will be to the interest of the Corporation to obtain special powers, where the present powers are insufficient, for the acquisition of ample frontage space in addition to the actual roadway and for a summary process of valuation by an independent tribunal. Such works under the system suggested might well be undertaken out of loan funds without any undue burden on the finances, for the return derived from one would furnish the means for the prosecution of the next.

45. I have now alluded to the several matters comprised within the term "Public Works" which appear to me to be of the greatest moment to the city, and in doing so I fear that I have already exceeded my usual limit. I will only add that advantage has been taken of the Malabar Hill Reservoir operations to make a garden on the crown of the hill, which continued up to and over the reservoir on the one side and down the face of the hill on the other, with terraces and winding paths, will be, both subjectively and objectively, one of the loveliest spots in Bombay. It commands a magnificent view and occupies such a prominent position that to those below the verdure-clad slopes will be a welcome relief from the bare red hill-side which has been such a disfigurement ever since the large excavations to furnish material for the reclamation of Back Bay were made. Also in construction of the embankments of the lake on the Flats, I have taken the opportunity to double the width of the Vellard so as to secure a riding-path and promenade planted with trees, with a fine open space at the Mahalakshmi end, which will be appreciated by the numbers who resort to this place to enjoy the sea-breeze.

46. With regard to other minor works and the many miscellaneous duties of the Department, I must ask for a reference to the Executive Engineer's report. Six hundred and forty-six persons were proceeded against before the Magistrate for non-compliance with the building and street provisions of the Municipal Act. In two cases the summonses were dismissed and 503 persons were warned and discharged having in the meanwhile complied with the requirements of the law. In the remaining 141 cases, fines, aggregating Rs. 152, averaging Rs. 1-12-7, were inflicted.

The expenditure on ordinary works and loan works of whatever kind, including establishment, was Rs. 26,41,915.

VI.—Public Health.

47. The Health Officer's report will well repay perusal and furnish matter for reflection. Defective registration, defective ventilation and house sanitation, and defective legislation have all formed the subject of comment in previous reports, and the present position is in the main unchanged. But some remedial measures have been discussed in the last chapter in respect to which more or less progress is being made, and it is satisfactory to know that at last there is a near prospect of obtaining an amendment of the law and that the Tansa Water-supply is on its way. The Health Officer considers that there is some improvement in the system of registration of births.

Birth and Death Statistics.

48. The number of births (exclusive of still-born children) was 14,964, the number of deaths similarly calculated was 21,850, whilst in the two previous years the numbers were as follows :—

	Births.	Deaths.
1883	15,182	23,530
1884	14,637	22,542

The proportion of births and deaths to population is given as 19·35 per 1,000 and 28·25 per 1,000 respectively. If, as in previous years, allowance be made for the usual increment of population, these figures should be—

Births per 1,000.....	17·72
Deaths per 1,000.....	25·88

Registration.

49. In endeavouring to arrive at an elucidation of the marvellously low birth-rate which continues to be recorded * in Bombay in contrast with other

* It must be remembered that in the population of Bombay the proportion of males to females is as 3 to 2.

cities, and in contrast also with the fact that though the recorded average number of births stands to deaths through a series of years in about the proportion of 19 to 27, Bombay still continues to be inhabited not exclusively by immigrants, it is worthy of notice that whilst the rate amongst the bulk of the Hindu community is 17·20, it is 28·43 amongst the Parsis. It is then in the first degree to the Hindus, and any customs or circumstances peculiarly affecting them, that we must look for a solution of this question. The Parsi death-rate is 20·43, and as the figures of births and deaths are in fair proportion to one another and to like figures in other cities, we may perhaps fairly assume that this section of the community is not affected by any special circumstances, and that the registration, as far as they are concerned, is reasonably effective. Is there such a prejudice against birth registration amongst Hindus as to lead to wholesale evasion, or is the great difference to be explained by the fact, as I have heard it alleged, that the practice widely prevails amongst their married women of going before child-birth to their ancestral homes outside Bombay—and with a population so constantly recruited by immigration, there must be a very large number of women whose ancestral homes are not in Bombay? The great majority of immigrants are from the Southern Konkan, and if the allegation just alluded to is to any considerable extent correct, the Konkan registers ought, one would suppose, to shew a peculiarly high birth-rate. These matters deserve most careful inquiry. My own experience of up-country birth and death registration is that it agrees with registration in Bombay in kind if not in degree, and that in most villages there are, according to these statistics, signs of a gradual depopulation.

50. There were 278 deaths from cholera between January and March, and it continued to prevail to a less extent until October. The total number of deaths was 598. With this exception, there was no serious epidemic during the year. The number of deaths from small-pox was only 55, and the general health of the city was fairly good. The Health Officer alludes to the lower rate of mortality amongst Europeans during the past five years, and attributes it to improved

* This is supported by the death records, which shew annually that a large proportion of persons dying in Bombay are Rutnagiri-Konkan born. It would be rash to assume that this fact is entirely due to adult immigration.

conditions ; but as I observe a corresponding increase in the Eurasian mortality, and as the difference in both cases began from the census year, I am inclined to think it may be accounted for by more persons having described themselves as Europeans and fewer as Eurasians in the census of 1881 than in the census of 1872. In mentioning the four sections of the city in which the highest mortality is recorded, the Health Officer alludes to the great density of population. The density of population to ground area has often been the subject of remark. The density of population to cubic space of house accommodation has not yet received the careful investigation which I think it deserves in endeavouring to form an opinion as to death causes in different localities of Bombay. Given two sections with equal density of population to the acre, the one with tall well-built houses of many storeys, the other with comparatively low flimsily-built houses, there must be in the latter much more crowding of available house space. The only figures at my disposal bearing on this subject, and these are confessedly incomplete as taken upon a test percentage only of houses, shew that in all the four sections mentioned, the amount of cubic house space per person is less than 1,000 feet, in three out of the four sections less than 500 feet, and in Kamathipura, which is one of the four, only 250 feet ; whereas in some districts a like test percentage gives from 1,500 to 5,000 feet of cubic space of house accommodation per head.

Vaccination.

51. It will be seen from the following comparison that the great impetus given to vaccination, and especially to re-vaccination, by the small-pox epidemic of 1883 has expired.

	No. of Persons primarily Vaccinated	Primary Vaccination under one year.		Re-vaccinations.
		No. of Persons.	Successful operations.	
1883	19,291	14,352	13,369	15,270
1884	16,568	14,136	13,651	2,985
1885	16,697	14,226	13,746	860

It will also be seen that as between 1883 and 1885, the number of successful vaccinations of children under one year is in inverse proportion to the number of children who were vaccinated within that age. Comparing the number of children under one year who were vaccinated in 1885 with the number of births recorded, I find that the latter exceeds the former by 738. No return is kept, as it should be, of the deaths of

unvaccinated children, and without this a complete scrutiny is impossible. I drew attention to this in my remarks on the statistics of 1883, and in the interests both of improved registration and improved vaccination, it is most desirable that these two departments should work together and render each other every possible means of mutual check. I learn on enquiry that many of the vaccinations under one year, especially amongst the Hindus, are said to be of children not born in Bombay. This makes the discrepancy between births and vaccinnations still greater: at the same time perhaps it affords some corroboration of the theory used in accounting for the amazingly low local birth-rate to which I have alluded above; on the other hand, I am also told by the Superintendent of Vaccination that cases are not unfrequent in which there are good grounds for believing that the allegation of 'alien' birth is not true. Such cases, if brought at once to the notice of the Health Officer, might lead to the detection of evasions of birth registration and give a step to the improvement of the system. The annual report should distinguish between the number of children vaccinated who are Bombay born and those who have been born elsewhere. Another particular in which the present return is defective is in not supplying information of vaccinations by age and caste combined. Had this been supplied, there would have been opportunity of judging in what sections of the community the greatest discrepancy exists between the number of infant vaccinations and the number of births—information valuable both to the Registrar and the Vaccinator.

Expenditure and Receipts of the Health Depart.

52. The following table shews the expenditure and receipts of the Health Department under the main heads of account:—

EXPENDITURE.

	Rs.	a.	p.
General supervision	35,090	14	2
Conservancy	8,19,855	4	7
Cemeteries	4,218	9	10
Registration of births and deaths ...	19,856	11	9
Vaccination	15,825	14	7
Laboratory	192	8	0
Mahalakshmi Dhobiwada	2,777	11	8
Milch-cattle stables	3,818	2	0
Conveyance of disinfected persons...	6	5	6
Licenses	3,715	10	6
Tank conservancy	5,261	9	5
Total...Rs.	9,10,619	6	0

INCOME.

	Rs.	a.	p.
Halalkhor cess	3,16,786	9	3
Milch-cattle stables	14,429	11	4
Mahalakshmi Dhobiwada.....	11,693	8	0
Rent of chawls, &c.....	13,498	8	0
Supplying copies of office records ...	136	12	0
Cleaning privies and emptying cess-pools	1,143	14	7
Rent of sweeping-grounds at Kurla, Sion, Tardeo Flats, &c.	24,075	0	0
Sale of bones, manure, cowdung cakes, waste-papers, &c.	601	8	0
Miscellaneous and license fees.....	50,070	10	7
Do. fines	8,730	0	3
Total...Rs.	4,41,166	2	0

53. The expenditure was more by Rs. 72,071-7-2 than that of the previous year, and this is due, as already explained, partly to the increase of staff and appliances for scavengering and cess-pool cleaning operations and partly to the greater cost of the keep of bullocks owing to the higher prices of fodder. The receipts were larger than those of the former year by Rs. 41,285-12-11. Half of this amount was obtained from arrears of the halalkhor cess for 1884-85. The remainder resulted from higher rents from lands made culturable by town sweepings and from milch-cattle stables, from better revenue from license and other miscellaneous fees, and from the contract for the hides of dead animals yielding Rs. 9,000 instead of Rs. 5,000.

54. Seventeen additional latrines and urinals were put up during the year, and the Corporation sanctioned Rs. 8,000 for a "Beehive" Refuse Destructor, which is now being erected. The remarks of the Health Officer as to new burial-grounds have to a great extent been anticipated by arrangements for the acquisition of a large area at the end of Haines Road, so that provision may be made not only for the low-caste Hindus, but for giving new cemeteries to the Mahomedans and closing the overcrowded burial-places in the city which they now use.

Markets.

55. The revenue from markets again shewed an increase, being better than that of last year by Rs. 3,678 owing to improved returns from stall-rents. Additional accommodation should be provided as soon as

possible, and the desirability of having a properly built market at Colaba has long been insisted on. There was a fairly good supply of fruit and vegetables; but the fish market was not as well stocked as in previous years, owing, it is said, to the compulsory removal of the fishing-stakes from their old positions in the harbour.

56 The following is a comparative statement of the meat consumption of three years :—

Animals slaughtered at the Municipal slaughter-houses at Bandora for public and Commissariat consumption (exclusive of the local supply to Bandora).

	1883-84.	1884-85.	1885-86.
Horned Cattle.....	20,947	22,659	25,702
Sheep and Goats.....	435,652	460,040	470,133
Pigs	730	879	920

Animals taken from the Municipal slaughter-houses for private slaughter, &c., in Bombay.

Horned Cattle.....	876	781	591
Sheep and Goats.....	36,985	43,516	42,700

More than 38 tons of food (chiefly beef) unfit for consumption had to be destroyed within the year.

57. There were 205 convictions for market offences, and the average penalty amounted to Rs. 3-12-9. The following is a summary of the most important cases and the punishments inflicted:—One case of using false weights was punished with fine of Rs. 10. There were nine cases of unauthorized slaughter of animals, in seven of which penalties of Rs. 5 were imposed, whilst the remaining two offenders were fined Re. 1 and annas 8 respectively. For the possession and exposure for sale of the undermentioned articles of food the convictions and punishments were as follows:—Bad rice, one case, fine Rs. 50; cystic beef, three cases, fines, Rs. 100, Rs. 50, and Rs. 20 respectively; putrid meat, six cases, average fine Rs. 3-5 ; unpassed meat, thirty-nine cases, one of which was punished with twenty days' imprisonment ;—putrid fish, fifty-six cases, average fine Rs. 2-6-3.

Convictions.

In other prosecutions, undertaken at the instance of the Health Department, for nuisances, unlicensed dangerous

trades, &c., &c., there were 5,504 convictions, the average penalty being annas 11-5.*

Fires.

58. The number of fires reported during the year was fifty-seven. The loss of property occasioned thereby is stated to have been approximately Rs. 6,47, 506. The most serious fires were the following :—

	Rs.
April 18th 1885, Clerk Road, hay-stacks ...	3,43,625
June 9th „ Bhoiwada Lane, house containing a large quantity of silk	61,000
December 15th, 1885, Bellasis Road, warehouse of Messrs. Treacher and Co.....	1,36,000
February 18th, 1886, Pinjrapole Lane, house, shed, and warehouse.....	59,800

Street Accidents.

59. The Commissioner of Police states that 432 persons were run over in the public streets; of these, 23 were killed and 409 were injured. The accidents occurred chiefly in Parel Road, Abdul Rahman Street, Dongri Street, and Masjid Bandar Street.

VII.—Education.

60. The year under report was marked by the transfer of the Victoria Museum to the Municipality in the month of October. An interesting report from the Curator will be found in the following pages. The management and development of this institution demands attention and will doubtless form the subject of comment in reviewing the administration of the current year.

61. The receipts from, and the expenditure on, Schools, to the support of which the Municipality contributes, are given below:—

RECEIPTS.

Provincial Grant.	Fees.	Municipal Contribution.	Interest.	TOTAL.
Rs.	Rs. a. p.	Rs.	Rs.	Rs. a. p.
11,563	20,236 1 0	24,375	600	56,774 1 0

NOTE.—The average penalty inflicted on persons convicted of Municipal offences of all kinds during the year was annas 12-5. In calculating this average, the many cases in which persons were warned and discharged without a penalty have been left out of account.

Expenditure.

Sa'aries, including Pension Fund.	Contingencies.	Reward to Indigenous School-masters.	Public Works Expenditure.	Contributions to Scholarships in the Poona Male & Female Training College.	Contribution to Anjuman-i-Islam, Mahomedan School.	Total.
Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs.	Rs. a. p.
35,322 7 1	16,207 12 4	1,951 8 0	174 5 5	.....	5,000	58,656 0 10

62. The following statement shows the number of schools, with their attendance on rolls, in the Island of Bombay, as it stood on the 31st March 1886 :—

No. of Schools.	Name of School.	Attendance.
	Maṛathi Schools, Bombay.	
1	Amerchand Vernacular School	192
2	Byculla do.	104
3	Chandanwadi do.	154
4	Chaulwadi do.	257
5	Chinchpoogly do.	70
6	Colaba do.	107
7	Dongri 2nd Grade Anglo-Vernacular School	214
8	Gamdevi Vernacular School	99
9	Ghorapdeo do.	101
10	Girgam do.	253
11	Kamathipura Telugu 2nd Grade Anglo-Vernacular School	148

26	Chandanwadi Night School	44

E. C. K. OLLIVANT,
Municipal Commissioner
for the City of Bombay.

Special Note on Three Years' Working of the Assessment Department.

Preliminary Remarks.

On the 28th June 1879 Mr. Gokuldass Jugmohundass proposed the appointment of a Special Committee of the Corporation "to enquire into the present system of assessment of properties liable to Municipal taxes." An amendment, moved by Mr. Bomanji Pestonji Master, was carried to the effect that this proposal should be deferred, and that meanwhile the Municipal Commissioner should be asked to call on the Assessor for a report on the subject. This report was furnished and considered at a meeting of the Corporation on the 3rd September 1879, and the original motion was then put to the vote and lost. The subject was renewed when the Budget for 1881 was under discussion, and on the 5th October 1880 the matter was referred to the Finance Committee of the Town Council, consisting of the following members— Dr. T. Blaney,(1) Dr. H. Cook, Mr. Dosabhai Framji, C.S.I., Mr. Muncherjee Nowrojee Banajee, Mr. Nanabhoy B. Jeejeebhoy, Mr. Nowrojee Furdoonjee, C.I.E., Dr. Pinkerton,(2) Mr. Rahimtula M. Sayani, Mr. Raghunath N. Khote, C.I.E., the Hon'ble Rao Saheb Vishvanath N. Mandlik, C.S.I.— to report on the whole question of assessment and collection. The Corporation passed the Budget for that year subject to any modification which might be desirable upon the result of the Town Council's proceedings. The Special Committee held 18 meetings and prepared a report which was adopted by the Town Council and laid before the Corporation at a meeting held on the 10th October 1881.

The Corporation on the 19th October 1881 passed a resolution referring the above report to the Municipal Commissioner, asking him to inform the Corporation what steps he proposed to take in reference thereto. I thereupon instituted a careful inquiry both into the constitution of the Department and the system of assessment as well as of collection, and on the 20th June 1882 submitted a report dealing with all the points on which the Town Council had commented. To this report I appended a memorandum describing the changes and re organization which, as the result of my inquiries, I proposed to introduce and the reasons therefor. My proposals were approved by the Corporation at a meeting held on the 28th July 1882. These preliminary remarks explain the starting point of the business surveyed in the following summary.

(1) Dr. Blaney only served on the Committee during a portion of the enquiry and was succeeded by Dr. Cook.

(2) Dr. Pinkerton was added to the Committee in January 1881.

Summary of the results effected in the Assessment and Collection of Property Rates and Wheel-tax since the Revision and Re-organization of the Department in 1883.

In order to arrive at a correct appreciation of the new system and its working, it is necessary—

(*a*) to note briefly the defects, irregularities, &c., referred to by the Town Council in their printed Report dated the 7th October 1881;

(*b*) to state the remedies applied by the Municipal Commissioner's new system as reported to the Corporation in his letter No. 5013 of 20th June 1882; and

(*c*) to review the results attained by the working of the system during the three years 1883-84, 1884-85, and 1885-86.

The Defects of the Old Practice.

First as regards (*a*) the defects of the old practice. These may be summarized as follows:—

1. There was never a complete record of all the properties in Bombay (page 24 of Town Council's Report).

2. There was never a thorough inspection of all the properties in Bombay with a view to accurate valuation for assessment purposes. The so-called "Survey" was made every fourth year, and even in 1880, when a special effort was made at the "Survey," not only were all the properties not examined, but the important work of valuation was left to office clerks and Inspectors, some of whom were illiterate. In the other years the 11 Inspectors were supposed to be only serving wheel-tax schedules and reporting a few hundred cases of new houses and demolition (pages 3, 9, and 57 of Town Council's Report and pages 2 to 6 and 12, 13, and 17 of the Minutes of Evidence appended hereto).

3. There was no record to show that such inspection as was actually made was checked or tested by any superior officer of the Department (pages 13 and 14 of the Minutes of Evidence appended to the Town Council's Report).

4. There was no field book in which the results of outdoor work were recorded on the spot (page 3 of Town Council's Report and pages 13 and 14 of the Minutes of Evidence appended thereto).

5. The so-called inspection books were written up in office from memory, or from rough scraps of paper, or from rough pencil memoranda (not preserved), often by office clerks who had nothing to do with inspection. The books were never totalled or signed by the Inspecting Officers (page 3 of Town Council's Report, and pages 2 to 6 of the Notes of Evidence appended thereto).

6. The assessment book was prepared from inspection books made up as above. It was never examined or signed by any superior officer of the Department, and was not totalled in the regular way (page 3 of Town Council's Report).

7. The assessment book was interspersed with numerous alterations and erasures (all in favour of reduction), unauthenticated by the signature of any one, and often without reference to any authority under which they were made (pages 52 to 55 of Town Council's Report).

8. Complaints under section 79 of the Municipal Acts were heard by officers who had made the valuation complained against. No record of the hearing of such complaints was ever kept, and reasons for the reduction allowed (which in some cases were made without written complaints in contravention of section 79 of the Act) were never recorded (page 7, para. 18, and page 55, para. 79, of Town Council's Report).

9. Long after the hearing of complaints under section 79, and the authentication of the assessment book by the Municipal Commissioner under section 80, and even long after the issue and presentation of bills, numerous bills were recalled and cancelled, and the assessment further reduced

on the back of such bills by the First Assistant Assessor and the Head Clerk on their own authority and without any sanction from the Commissioner (pages 52 to 55 of Town Council's Report).

10. These abatements of the demand, fixed on complaint and after revision under section 80, were passed off as remissions along with the 1-5th remission under section 76 of the Act to avoid trouble in the collection books and in the Controller's Office (page 3, para. 8, of Town Council's Report).

11. Incorrect demands were reported to the Corporation in the Annual Reports, inasmuch as the practice, for at least the preceding twelve years, was to show in the Annual Report only the opening demand, and not to take into account the large and numerous reductions subsequently made as above.

12. The bills were issued months after they were due, and in the case of several hundreds of bills the delay amounted to 11 and 12 months, and even more, bills due in January having not been issued till November or December following. Large numbers of bills were issued even after the close of the year (pages 5 and 6, paras. 13 to 17, of Town Council's Report).

13. Incorrect outstanding balances were shown in the Annual Reports, inasmuch as the figure did not include the portion of the demand ascertained in the year for which bills were not issued before the close of the year (para. 25 of the Municipal Commissioner's Report for 1881).

14. The bills and the collections were kept by the receivers in their private residences, the former till they were collected or written off, the latter for a week. When the Municipal Commissioner examined the balances of the receivers in 1882, it appeared that numerous bills had been allowed to remain unpresented to the ratepayers concerned for several months together after they were entrusted to the hands of the receivers.

15. Several special classes of properties, such as Mills, Railways, &c., were found to have been unsatisfactorily assessed, and the correct principles for assessing such

properties had not been adopted or ascertained (pages 20 to 28, paras. 26 to 39, of the Town Council's Report).

16. There was no methodical account or explanation of increases and decreases in revenue, and no system of checks and counter-checks, or of regular supervision, such as is exercised in regard to the Government land revenue. The checks provided for by paras. 16 to 21 of Mr. Crawford's circular at page 35 of the Annual Report for 1868 and by Mr. Hope's register as prescribed at page 9 of the Annual Report for 1871 had been ignored; and the Department went on reducing the revenue almost every year till 1882, in the budget for which the late Assessor estimated a decrease of Rs. 1,300 in the revenue from the Consolidated Rate. Heavy losses to the Municipality and a remarkably unequal incidence of taxation, with undue pressure in collection in some cases and undue leniency in keeping back bills for unreasonably long periods in others, were the result. (Paras. 6 to 17 and para. 81 of the Town Council's Report.)

The Remedies applied.

The remedies applied under the Municipal Commissioner's scheme, as reported to the Corporation in the memorandum accompanying his letter quoted above, may briefly be stated as follows* :—

1. Each Ward of the city has its ward office established within its limits, where the inspecting and collecting clerks (called "Ward Clerks") daily meet a responsible head, the Ward Superintendent, and where both Superintendent and clerks are closely supervised by the Head of the Department, the Assessor and Collector, and his Assistants.

2. A complete register has been compiled of all the properties in Bombay, including every piece of land whether reserved as a building site or under agriculture or trees, or whether vacant. All these properties have been systematically numbered, and each of these numbers is required to be accounted for by a valuation in the assesment book.

3. A minute and thorough inspection of every property in Bombay, once at least every year, by the Ward Officers is

Note.—A manual explanatory of the Forms appended to this memorandum has been drawn up by the Special Officer, Mr. Virprasad Tapiprasad, on the lines of Mr. Hope's well-known Manual of Land Revenue Account Forms, and this has been of very great service to the Department.

insisted upon, and a certain percentage of tests is required to be taken by the superior officers of the Department, *viz.*, the Assistant Assessors and the Assessor, who select different properties every year, so that all the properties in their charge pass under their review once at least in a given period.

4. Each of these officers is furnished with a regular field book, in which he is required to note on the spot the result of every piece of outdoor work which he performs. The entries in these fiield books are required to be promptly transferred to the inspection book, the wheel-tax book, and the collection book, which are regularly totalled and authenticated by the signatures of the Ward Officers, it being the duty of the Assistant Assessors and Assessor to see that these books are punctually and correctly kept.

5. Extracts from the inspection books (called "Tabulated Ward Reports") are required to be submitted fortnightly to the Municipal Commissioner, whose written orders in each of the cases reported therein are the only authority for any alteration in the assessment book.

6. No erasure or scoring is permitted in the assessment book, and all alterations under sections 79, 80, or 81 of the Municipal Act, sanctioned by the Municipal Commissioner as above, are made by means of Forms 11, 11A, and 11B (which give the reason for the alteration in each case), and the columns provided for the purpose in the assessment book.

7. A complete register of complaints under section 79 is required to be kept, in which each complaint is registered as soon as it is received, the subsequent procedure up to decision entered, and the decision itself with its reasons recorded. Complaints are heard, not by officers making the valuation, but by officers appointed for the purpose and acting under the immediate direction of the Municipal Commissioner, to whom all important cases or questions which arise in the course of the hearing are submitted for orders.

8. Property rates bills are issued punctually on the 1st of April and 1st of October respectively, and the wheel-tax bills within 20 days after they become due.

9. All bills thus issued are kept in the Ward Office in the joint custody of the Ward Superintendent and the Ward Clerks, the latter taking out daily only such quantities as meet the requirements of a day's outdoor work, and accounting for them to the Superintendent on their next return to office, either by the production of the bills themselves (with the dates of presentation duly endorsed thereon), or their equivalent in cash, it being the duty of the Assistant Assessors and Assessor to see that the Superintendent efficiently directs and controls his clerks so as to ensure prompt collection and to prevent the irregular keeping back of bills.

10. Collections are paid by the Ward Clerk within 24 hours to the Ward Superintendent, who remits them within 24 hours to the Head Office, where they are paid into the Controller's Office on that very day, it being the duty of the Assistant Assessors and Assessor to see that the Ward Superintendent correctly accounts for the bills issued from the Head Office by remittances duly acknowledged *plus* the balance of bills on hand.

11. For purposes of supervision, fortnightly returns of demands settled and bills issued, collected, and outstanding are submitted to the Commissioner.

12. No demand once duly settled and no Bills once issued can be cancelled or modified without the written sanction of the Commissioner.

13. Vacancies in connection with claims to refund under section 82 of the Municipal Act are watched by the Ward Officers and Assistant Assessors, and reported on at the end of each half-year. The Assessor frames his proposals on these reports and submits them to the Commissioner, whose sanction, which is communicated to the Controller of Municipal Accounts in the form of Lists, is the only authority for the payment of Municipal moneys.

14. All stables or buildings containing taxable vehicles and animals are examined at least once a month by the Ward Officers and the results reported quarterly.

15. In addition to the annual examination, the Municipal Commissioner maintains a continuous revenue supervision and audit over the Department in connection with—

(*a*) the hearing of complaints under sections 79 and 80 of the Municipal Act ;

(*b*) the fortnightly Tabulated Ward Reports ;

(*c*) the fortnightly returns of demands settled and bills issued, collected, and outstanding ;

(*d*) the refunds for vacancies ;

(*e*) fortnightly returns of irrecoverable Bills ;

(*f*) the Assessor and Collector's reports regarding disputed bills and amendments found necessary in them ;

(*g*) Assessor's reports on important questions connected with valuation under section 71,and with exemption under section 77 of the Municipal Act, as also with the liability to pay wheel-tax under sections 104 and 105 ;

(*h*) miscellaneous reports in connection with the cancellation of process fees, transfers, &c., &c.

The Results.

The results attained in the course of the three years during which the scheme has been working in the manner above summarised have already appeared before the Corporation from time to time. They may briefly be enumerated* as follows:—

Special classes of Properties.

The Port Trust Estate, which paid the inadequate sum (*see* pages 20 to 22 of Town Council's Report) of Rs. 60,000 in

* In this enumeration and the tabular statements which follow I base my comparison on the figures of years beginning with 1880, because it was the figures of that year that the Town Council had before them during their special inquiry in 1881. But it must be remembered, as shown at the time, that the year 1880 was technically known as the year of "Revision," in which, under the personal efforts of the then Commissioner, Mr. Grant, the assessment of properties in one-third of the city was raised. The improvement thus effected proved however, under the system which then prevailed, evanescent, as in the following year there was again a reduction in the aggregate valuation. In addition therefore to the basis of comparison above mentioned, I have inserted figures representing the average of the three years immediately preceding 1880 so that there may be a perfectly fair contrast between the present and the past.

It is not claimed that the entire increase obtained is due solely to a change of system, The rise in value is unquestionable. But it is also unquestionable that until the whole system was re-organized, there was a rise in value unaccompanied by any corresponding rise in assessment. Indeed assessments were falling while values were rising. What is claimed for the present organization is that it has provided a machinery capable of ensuring a correct registration of changes in value from half-year to half-year, of faithfully tabulating liabilities and exemptions, and of securing punctuality in collection, whilst at the same time an efficient check is provided against all or any of these objects being defeated.

1880, paid Rs. 1,61,190 in 1885-86. The increase in consolidated rate under this head alone is Rs, 1,01,190.

2. The B. B. and C. I. Railway Company paid nothing for land under rails and paid only Rs. 6,747-12-0 for their other properties in 1880 (pages 23-24, Town Council's Report). They paid Rs. 22,194-3-2 in 1885-86 for all their properties in Bombay.

3. The G. I. P. Railway Company paid Rs. 16,568-7-4 as Consolidated Rate for all their properties in Bombay in 1880 (pages 23-24, Town Council's Report). After lengthy and elaborate proceedings, they now offer to pay Rs. 30,000 at 8 per cent. consolidated rate. The Commissioner demands Rs. 32,500. Though the subject is still under discussion, the Company have for 1885-86 and previous years paid as deposit, pending final settlement, sums sufficient to cover the amount likely to be settled as due by them.

4. The valuation of 36 mills in 1880 was Rs. 2,73,969 (page 27 of Town Council's Report). In 1885-86 the valuation of 47 mills is Rs. 7,32,107. The average per mill is thus Rs. 15,576 in 1885-86 as against Rs. 7,610 in 1880, the increase being more than double.

5. Vacant lands were not assessed and yielded nothing in 1880. They have all been since valued, and in 1885-86 they yielded Rs. 15,898 as consolidated rates.

6. The total gross valuations of cocoanut plantations and quarries were Rs. 1,45,763 and Rs. 20,299 respectively in 1885-86. For 1880 the reports do not give the corresponding figures, and it is not possible to institute a comparison. There is no doubt however that they are now far more adequately assessed than formerly.

Properties in General.

7. The accompanying statement, marked A, which contrasts the demands, under the several heads, of the three years during which the scheme has been working with those of the three

preceding years, and which includes the special classes of properties above mentioned, shows that—

(*a*) whereas in 1880 the number of properties on the books was 25,347, it was in 1885-86, 47,802, or exclusive of sub-numbers 46,435 ;

(*b*) whereas the total gross valuation of all the properties on the books was Rs. 1,33,10,302 in 1880, it was Rs. 2,00,25,223 in 1885-86 ;

(*c*) whereas the consolidated rate leviable (at 8 per cent.) in 1880 was Rs. 9,58,342-11-3, it was Rs. 13,07,155-1-11 in 1885-86 ;

(*d*) whereas the demand on account of the Water-rate in 1880 was Rs. 4,43,974-13-6, it was in 1885-86 Rs. 5,78,404-10-11, exclusive of the increase (Rs. 70,000) obtained from the enhanced rate on account of new works for improvement in the supply and distribution ;

(*e*) whereas the revenue from the halalkhor rate was Rs. 2,29,174-7-11 in 1880, it was Rs. 3,01,667-4-2 in 1885-86 ;

(*f*) whereas the wheel-tax was Rs. 2,27,495-4 in 1880, it was Rs. 3,30,185 in 1885-86 ;

(*g*) whereas the total leviable revenue from property rates and wheel-tax was Rs. 18,58,987-4-8 in 1880, it was Rs. 25,17,412-1-0 in 1885-86, exclusive of the increased water-rate referred to in (*d*) above ; the actual increase (exclusive of such increased rate) was thus Rs. 6,58,424-12-4 ;

(*h*) notwithstanding this large increase in revenue, the number of appeals to the Chief Presidency Magistrate was 27 in 1885-86 against 76 in 1880 ; the number of such appeals rejected by the Magistrate was 21 in 1885-86 against 2 in 1880 ; and the number of cases in which a reduction was allowed by the Magistrate, or by compromise out of Court, was 6 in 1885-86 against 74 in 1880.

8. The accompanying statement, marked B, which contrasts the collections and balances of the three years during

which the scheme has been working with those of the preceding three years, shows that—

(*a*) whereas the amount to be collected was Rs. 21,40,777-8-11 in 1880, it was Rs. 28,74,075-1-10 in 1885-86 ;

(*b*) whereas the actual collections were Rs. 16,32,863-6-4 in 1880, they were Rs. 27,51,674-2-8 in 1885-86, showing an actual increase of Rs. 11,18,810-12-4 ;

(*c*) whereas the reductions and remissions amounted to Rs. 28,349-4-7 in 1880, they were Rs. 11,396-3-7 in 1885-86 ;

(*d*) whereas the outstanding balance remaining to be collected at the close of the year amounted to Rs. 4,79,564-14-0 in 1880, it amounted to Rs. 1,11,004-11-7 in 1885-86, showing a decrease in favour of the latter year of Rs. 3,68,560-2-5.

9. Notwithstanding the very large increase under every head of revenue and in collections shown above, the cost of the Assessment and Collection Department, including the late Refund and Remission Branch in 1880 and the salary of the Special Assistant to the Municipal Commissioner in 1885-86, contrasts favourably for the latter year. The percentage of this cost on the actual collections paid into the Municipal Treasury was as follows :—

1880.....5·26. 1885-86.....4·08.

E. C. K. OLLIVANT,
Municipal Commissioner
for the City of Bombay.

STATEMENT—A.

YEAR.	No. of properties.	Gross annual value at the end of the year including value represented by Government and Port Trust Payments.			ASSESSED DEMAND.									REMARKS.
					Property Rates.						Wheel tax including public conveyances and the toll on the causeways	Total assessed demand.			
		Valuation chargeable with consolidated rate.	Valuation exempt from consolidated rate under Section 37 of Act and Section 38 of Port Trust Act.	Total.	Consolidated rate including compounded payments by Government and Port Trust.			Water rate.	Halalkhor rate.	Total of property rates.							
					Consolidated rate leviable.	Consolidated rate not leviable.	Total.			Leviable.	Not leviable.	Total.		Leviable.	Not leviable.	Total.

								5,78,404 0 0		21,87,227 1 0				25,17,514 13 0		26,53,007 4 8	

(a) In this year the consolidated rate was 9 per cent., but for facility of comparison with the following five years in which the rate was 8 per cent. this figure represents 8 per cent.
(b) This year consisted of 15 months; but for the sake of comparison the figures in this and the following columns are for 12 months only.
(c) This sum represents the increased water rate. (See Commissioner's letter to Government, No. 12333 of 3-12-85) and has been deducted to ensure a correct comparison, the water rate being the same in all the six years after this deduction.

STATEMENT B.

Years.	Amount to be collected.			Reductions and Remissions.	Collections.	Outstanding balance.	
	Opening outstanding balance.	Demand assessed for the year and for former years during the year.	Total.

	The three years after the introduction of the New System.						
1883-84	2,39,136 7 1	22,01,628 1 2	24,40,764 8 3	17,896 4 4	20,34,428 7 6	3,88,439 12 5	Owing to the introduction of the new system and the time occupied in the preparation of new forms connected therewith and to the necessary changes in the staff there was unavoidable delay in the issue of bills in these years.
1884-85	3,88,439 12 5	23,44,516 6 3	27,32,956 2 8	15,637 12 7	24,37,392 7 11	2,79,925 14 2	
1885-86	2,79,925 14 2	25,94,251 15 8	28,74,177 13 10	11,396 3 7	27,51 776 14 8	1,11,004 11 7	

N.B.—1. The opening and closing outstanding balances for 1880, 1881, and 1882-83 (as also those for the preceding three years) which have been taken from the annual reports for those years are not accurate and are much below the sums really outstanding, inasmuch as under the practice then followed only those sums for which bills had actually been issued were shown as outstanding, whereas, in fact, there were also large claims outstanding in respect of which bills were not issued until after the close of the year. Col. 3 accordingly shows for these years the total of bills issued.

2. Col. 5 shows for 1883-84, 1884-85, and 1885-86, time barred bills more than six years' old and bills on account of former years cancelled as erroneous.

3. The year 1882-83, consisted of 15 months, but for the sake of correct comparison the figures here given are for 12 months only.

CONTROLLER'S REPORT FOR 1885-86.

No. 913 OF 1886-87.

To

E. C. K. OLLIVANT, ESQ., C.S.,

Municipal Commissioner

for the City of Bombay.

SIR,

With reference to your Circular No. 302, dated 7th April 1886, and subsequent reminders, dated 8th May and 15th June 1886, respectively, I have the honour to submit the report on the working of my Department for the past official year, together with the necessary account statements.

From the Revenue Statement A, appended below, it will be observed that, after allowing for a falling-off of Rs. 4,731-11-3 under certain heads, and deducting the nominal item of Rs. 50,049-11-6 on account of profit on Stores, the net increase on the estimated income was Rs. 3,92,173-4-10.

Rs. 2,73,099 of this large surplus have already been appropriated in the Budget for 1886-87.

A.

STATEMENT showing the Net Receipts during the Financial Year 1885-86 *from all Sources contrasted with the Budget Estimate.*

			Deduct Less.....	4,731 11 3	.....
Grand Total...Rs.	42,13,867 13 7	40,31,750 0 0	44,73,973 0 4	4,42,223 0 4	.....

The large increase under Property Rates, as detailed in the margin, was partly due to arrears for and prior to 1884-85 amounting to Rs. 2,47,760-14-11 having been recovered during the past year, and partly to the Port Trust assessment having been fixed by Government at Rs. 1,61,190 against Rs. 1,10,000 entered in the Budget for 1885-86.

	Rs.	a.	p.
Consolidated Rate ..	2,51,304	10	10
Wheel-tax	20,723	0	3
Halalkhor Cess.....	46,786	9	3
	3,18,814	4	4
Less—Decrease under Toll Fees	637	12	0
	3,18,176	8	4
Deduct—Water Rate decrease	2,629	12	7
Rs.	3,15,546	11	9

The revenue from Land Conveyance Licenses appears to have been under-estimated by Rs. 2,224-13-11 at the time of framing the Budget for the past year.

Town Duties yielded Rs. 9,292-15-0 more than the estimate as explained in detail at page 69 of this Report while dealing with Appendix II.

The realizations from Tobacco Duties were Rs. 9,177-0-6 more than our expectation.

Market Receipts produced Rs. 13,328-0-6 more than anticipated, chiefly under the sub-heads Stall-rents and Slaughter Fees.

The excess receipt of Rs. 409-4-1 on account of Pension contribution was accounted for by the employés of the Assessment and Collection Department, who were appointed on probation, having been confirmed during the past year.

The yields under Tramway-rent, Miscellaneous Fines, and Public Gardens were Rs. 33-2-4, Rs. 579-3-3 and Rs. 851-13-1 lower than the respective estimates.

Rs. 2,752 of the increase of Rs. 4,914 under Contribution from Insurance Companies were due to five new Companies having been assessed during the past year, and the balance to larger premia earned by the other Companies.

The surplus of Rs. 9,897-1-0 from Miscellaneous Fees was almost entirely due to larger recoveries by the Health Department of fees for removing and skinning dead animals and for dangerous and offensive trades.

Owing to the Holi holidays, the wages of several labourers, who absented themselves on the pay-day in March 1886, remained unpaid, and hence the increase of Rs. 1,143-8-6 under Miscellaneous Savings.

Rs. 12,681-8-5 were received in excess of the Budget Estimate of Miscellaneous Receipts, principally on account of hire of carts, bullocks, hand and steam rollers, rent of Telephone lines, and large yield of grounds reclaimed by sweepings let for cultivation.

There was a profit of Rs. 15,022-7-10 on the Workshop transactions of the past year, as fully explained at page 81 of this Report.

The nominal profit of Rs. 50,049-11-6 on Stores was the result of incorporation in the different stock accounts of items of Dead-stock, Plant, Machinery, &c., already paid for out of Budget or Loan Funds.

The following Statement **B** shows that the sum originally sanctioned by the Corporation to be expended during the past year, as per the Town Council's Budget, was Rs. 42,81,750. The lapsed grants of 1884-85 renewed during the past year, together with additional grants sanctioned from time to time during 1885-86 for the Gunbow Street improvement, repairs to the Falkland Road drain extension, and filling in of the low-caste Hindu burying-ground at Haines Road, the appointment of a Deputy Commissioner for three months, purchase of a " Beehive " Destructor for the incineration of town sweepings, cholera expenses, entertaining the Indian Contingent, &c., aggregated Rs. 8,33,810-2-11.

The transfers from one budget head to another sanctioned by the Town Council during the past year amounted to Rs. 89,865-5-8; thus the total sum sanctioned for expenditure in 1885-86 amounted to Rs. 51,15,560-2-11.

B.

Total....Rs.	38,81,020 11 3	51,15,560 2 11	40,66,940 1 0	....	10,48,620 1 11	

The preceding Statement C shows that, against the total authorized allotment of Rs. 51,15,560-2-11, an actual expenditure of only Rs. 40,66,940-1-0 was incurred during the past year, leaving an available balance of Rs. 10,48,620-1-11.

Of this large balance, only Rs. 64,095-11-0 were actual savings on expenditure ; the remaining sum, *viz.*, Rs. 9,84,524-6-11, has been renewed by the Corporation during the current year to meet cost of works not commenced or completed in and unpaid liabilities of 1885-86.

The various causes by which the above saving accrued have been explained in detail below :—

Rs. 1,912-12-1 were saved on the Town Council and Corporation Establishment, chiefly on account of fees of Town Councillors who were not present at all the Council meetings, and contingencies.

The saving of Rs. 2,158-3-11 on the Commissioner's Department was mainly due to Mr. Acworth having remained as Deputy Commissioner for only two instead of three months, as originally contemplated.

On the Office Establishment and Contingent grants of the Controller's Department there was a saving of Rs. 246-0-11.

Of the saving of Rs. 4,682-0-1 on the Assessment and Collection Department, Rs. 3,500 were due to the grant for preparing and printing 200 copies of the assessment book remaining wholly unappropriated, and Rs. 498-6-9 to a portion of the furniture grant for new Ward Offices remaining unexpended. Both these sums have been renewed during the current year. The real saving was, therefore, only Rs. 683-9-4 on Ward Inspection Establishment and Contingencies.

There was a saving of Rs. 778-4-1 under General Supervision, which was chiefly due to the Acting Health Officer not receiving the full budget pay of Rs. 1,500 during the absence on leave of Dr. Weir from March to December 1885.

Under the head Conservancy Branch there accrued a saving of Rs. 14,686-10-1 on the following sections :—

		Rs.	a.	p.	Rs.	a.	p.
I.	Superintendence				13	7	11
II.	Labour (including feed of cattle)				1,406	13	7
III.	Disposal of Town Sweepings				180	3	8
IV & V.	Veterinary and Repairs				167	12	1
VI to VIII.	Stores Reserve, Live-stock, and Rent				591	12	2
X.	Halalkhor Branch—						
	A. Superintendence	503	3	5			
	B. Labour	71	12	3			
	C. Feed of Bullocks	32	8	7			
	D. Stores	2,442	15	9			
	E, H & G. Repairs, purchase of Live-stock, Rent, and Lighting Night-soil Depôt	562	2	9			
	I. Maintenance of Carnac Bundar Night-soil Pumping Station	4,130	12	2			
					7,743	6	11
XII.	Extra grant for better Scavengering (Stable and Kutchra-burning Kiln)				4,583	1	9
				Rs.	14,686	10	1

Of the above saving, Rs. 2,583-1-9 have been renewed during the current year on account of the unexpended balance of the grant for kiln for burning cutchra. The net saving of Conservancy Branch was consequently Rs. 12,103-8-4. This saving would have been considerably more but for Rs. 27,000 of the large excess of Rs. 35,000, on the feed grant, owing to the high rate of hay which we had to pay during the past year on account of the expedition to Soudan, having been met from the savings in the different sections of Conservancy Branch.

The small savings in Registration, Cemeteries, Laboratory, Vaccination, Dhobivada, Milch-cattle Stables, Licenses, and Tank Conservancy aggregated Rs. 6,306-13-0.

The net aggregate saving of the Health Department was Rs. 19,188-9-5, after meeting Rs. 27,000 of the total excess on the feed grant, and after deducting the amount of the balance of the cutchra kiln grant renewed in 1886-87.

Under Superintendence, Meat Carriage, Stores and Rent, Market and Slaughter-houses Department, there were savings amounting to Rs. 3,604-11-3, of which Rs. 1,004, on account of the unpaid feeding charges for market bullocks for the month of February last, had to be renewed during the current year.

On the office, survey, and outdoor establishments and contingent grants of the Engineer's Department there was a saving of Rs. 1,049-0-11.

Rs. 749-0-10 of the unexpended balance of Rs. 1,259-5-0 under road-watering had to be renewed during the current year to defray unpaid charges for erecting Persian wheels at Breach Vellard and Narayen Daboolkar Road. There was a very large saving in the watering grant in consequence of the work having been performed departmentally; but it was absorbed by transfers of Rs. 12,003-9-3 to meet excesses under Water Works maintenance.

Rs. 27,290-7-0 of the Road Repairs grant remained unspent at the close of 1885-86. The whole of this sum, with the exception of Rs. 24-11-10, was renewed during the current year.

The Annual Repairs grant was fully expended during the past year, except the small balance of Rs. 102-12-11.

The whole of the available balance of Rs. 6,926-8-3 of the Street Improvement grant and Rs. 5,870-11-2 of the balance of Rs. 5,977-10-0 of the Miscellaneous Drainage grant were renewed during the current year.

The respective savings of Rs. 2,056-15-3 and Rs. 565-2-5 accrued chiefly on the repairs to machinery, coals, and establishment grants of the Love Grove Pumping Station, and on repairs, contingencies, &c., Love Grove, Worli and Dharavi sluices.

Of the total saving of Rs. 1,828-5-0 under the different Public Gardens, Rs. 265-7-0 have been renewed during the current year on account of an unpaid bill for repairs to the sheds in the Victoria Gardens.

If from the gross saving of Rs. 47,056-2-9 in the Engineer's Department (exclusive of Water Works and Lighting), Rs. 41,077-6-5, renewed in 1886-87 on account of last year's lapsed grants, were deducted, the net saving would amount to Rs. 5,978-12-4.

There were trifling savings under Town Duty, Tobacco Duty, and Music and other Licenses Departments, aggregating Rs. 418-12-11.

Of the large saving of Rs. 1,23,888-10-7 on the Interest grant, Rs. 4,396-6-0 were due to the interest on the 4 and 4½ per cent. Government Paper, in which the Sinking Fund of the 6 per cent. Loan has been invested under the existing law having realized that sum in excess of the estimate, Rs. 1,605 and Rs. 2,204-0-7 to interest on the House Rate and Market Loans, and the 17 Lakhs Drainage Loan of 1878, respectively, remaining unpaid at the close of the past year, and Rs. 1,15,682-8-10 to interest on the Sanitary Works Loan debitable to Municipal Fund not being required to be paid on the whole amount of the loan and for the full year.

The gross saving on the Debt grant, including Water Works account, is given below :—

			Rs. a. p.
Interest on Sinking Fund received in excess of the Budget Estimate.			4,396 6 0
Saving in the Consolidated Loan Interest do.			0 11 2
Unpaid Interest on 6 per cent. Loan (Municipal Fund renewed)	Rs. 1,605 0 0		4,397 1 2
Unpaid interest on 17 Lakhs Drainage (Municipal Fund do.) ...	Rs. 2,204 0 7		
„ 10 Lakhs Bhandarvada (Water Works Fund do.)	„ 1,295 15 5		
		3,500 0 0	
		5,105 0 0	
44 Lakhs Sanitary Works Loan (Renewed)			
Interest (Municipal Fund)	Rs. 1,15,682 8 10		
„ (W. Fund).....	„ 1,18,614 4 8		
	2,34,296 13 6		
Reduction of Debt			
Municipal Fund	Rs. 28,520 8 1		
Do. do.	„ 19,949 5 1		
	48,469 13 2		
		2,82,766 10 8	
			2,87,871 10 8
			Rs. 2,92,268 11 10

It will be seen that the above large saving solely accrued on the Budget provision of the 44 Lakhs Sanitary Works Loan, Sinking Fund and Interest Instalment, and was due to the fact of our having raised only about 2 lakhs of the total loan in May and June 1885, whereby interest had only to be paid on this small amount for less than two months of the 1st half of 1885, and to our raising the remaining portion from time to time during the 2nd half of 1885, and the

1st quarter of 1886. This large saving on interest, together with the amount available for reduction of capital, would have more than sufficed for paying the discount on the loan, which amounted to Rs. 2,53,220. But as we raised Rs. 7,000 and Rs. 4,43,000 with a condition to repay these sums in one and two years respectively, Rs. 2,82,766-10-8, the whole of the Sanitary Works Loan saving, which includes Rs. 19,450 on account of unpaid interest to bondholders, has been renewed to meet these liabilities during the current and ensuing years. The above short-period loans, together with those of Rs 51,000 and Rs. 1,60,000 raised for five and ten years respectively, when paid off during the first ten years, would cause a large annual saving in the amount of interest payable during the remaining 30 years of the currency of the loan.

There accrued a saving of Rs. 4,522-8-7 under charges on loans wholly out of the transfer of Rs. 35,000, Rs. 30,000 of which was obtained to meet discount and stamp, &c., charges on the raising of 10 lakhs of the 44 lakhs Sanitary Works Loan. But as the whole of the loan was raised during the past year, and as the discount on the total loan amounted to upwards of 2½ lakhs, such discount was shown in the past year's accounts as so much short recovery of that loan to be hereafter adjusted, either out of surplus cash balance or by raising a fresh loan. The stamp and other contingent charges on the whole loan, amounting to Rs. 27,618-12-4, were consequently met from the above transfer.

The Municipality not having been called upon to contribute towards the working expenses of the Veterinary College resulted in a saving of Rs. 2,500 under Primary Education, &c. This sum, though a saving, has inadvertently been renewed during the current year.

The saving of Rs. 10,650-15-6 under Gokaldas Tejpal Hospital was due to the Municipal Corporation not having sanctioned the payment of any contribution for the last three months of the past year, and to Government having refunded the unexpended balance of 1884-85 in October last.

As the site of the proposed Cholera Hospital was not selected during 1885-86, the whole grant of Rs. 3,108 sanctioned for the maintenance, &c., of the hospital was saved.

Of the unexpended balance of Rs. 3,824-13-11 of the Pensions, Gratuities, and Compassionate Allowance grant, Rs. 498-15-2 were renewed during the current year to meet certain unpaid pensions of 1885-86.

The whole of the unspent balance of the Commissioner's Discretional grant (Rs. 379-4-2) was renewed during the current year.

The Honorary Secretaries of the Indian Contingent Reception and Entertainment Fund returned Rs. 1,653-11-5 out of the sum of Rs. 3,000 contributed by the Corporation towards the cost of entertaining Her Majesty's Indian troops on their return from Suakim.

It will be observed from the following details that only Rs. 3,892-11-11 were saved on new works completed during the past year, as Rs. 2,22,696-12-11 of the entire balance of Rs. 2,26,589-8-10 had to be renewed to defray in 1886-87 the cost of works not completed and of those not commenced in the previous year.

	Rs.	a.	p.
1. Unexpended balance of incomplete works	98,912	9	10
2. Allotment of works not commenced	1,23,784	3	1
	2,22,696	12	11
3. Savings on completed works	3,892	11	11
	2,26,589	8	10

Rs. 1,083-5-4 have been renewed during the current year for unpaid liabilities of 1885-86 out of the total saving of Rs. 2,528-9-6 under General Police. The balance was principally due to the Police Commissioner not having been paid, while he was on leave in Europe from 11th October 1885 to the close of the past year, the special personal allowance sanctioned by the Corporation from 1st March 1883.

The real saving on the Fire Brigade grant was Rs. 3,600-12-11, which had almost wholly accrued under stores, contingencies, and repairs to fire engines. Rs. 40,704-12-9, of the aggregate saving of Rs. 44,305-9-8, shown under the above head, were renewed during the current year for the following purposes :—

	Rs.	a.	p.
Proportion of debt charges of the 44 lakhs Sanitary Works Loan	12,000	0	0
New works not commenced	12,289	0	0
Balance of the grant of Rs. 18,000 for Fire Engine Stations	16,415	12	9
	40,704	12	9

A saving of Rs. 2,136-4-5 had resulted chiefly under electric lights, Lighting Account, but Rs. 1,536 were renewed during the current year to meet cost of alteration in the gas-lights at the Byculla Bridge.

Out of the temporary provision from current revenue of Rs. 71,400 for Loan Works Establishment, a sum of Rs. 1,523-10-10 remained unexpended.

The following sums sanctioned to be paid out of the surplus cash balance, but which you expect to be met out of Loan Funds, were renewed during the current year, as they remained unexpended at the close of 1885-86 :—

		Rs.	a.	p.
Bonus to Queen's Road Sewer Contractor for completing it before the 15th June 1885		10,000	0	0
Extra work done in connection with the Queen's Road Sewer		15,975	0	0
Malabar Hill Reservoir roof	Rs. 1,41,430 0 0			
Do. difference in rates	„ 17,320 0 0			
		1,58,750	0	0
Balance of the Falkland Road Drain Repairs grant of Rs. 65,398...		58,270	2	10
		Rs. 2,42,995	2	10

The large saving of Rs. 2,22,537-7-5 was obtained under Water Works, as detailed below :—

MAINTENANCE—		Rs. a. p.	
Actual saving on establishment; repairs to plant, stores, and contingencies.....	Rs. 2,860 15 8		
Balance of grants for stores do. and repairs to plant renewed during 1886-87	„ 8,718 15 9

	Rs.	10,48,620 1 11

The principal heads under which the aggregate saving of Rs. 10,48,620-1-11 occurred are shown in the margin.

The actual Opening Balance, Income, and Expenditure of the past year have been contrasted below with their respective estimates :—

		Estimate.	Actuals.	Better than Estimate.
		Rs. a. p.	Rs. a. p.	Rs. a. p.
Opening Balance.....		3,50,000 0 0	10,60,586 6 1	7,10,586 6 1
Revenue.....		40,31,750 0 0	44,73,973 0 4	4,42,223 0 4
		43,81,750 0 0		
Expenditure	Original Estimate ...	42,81,750 0 0		
	Subsequent as per Statement B.....	51,15,560 2 11	40,66,940 1 0	10,48,620 1 11
				22,01,429 8 4

The whole of the surplus opening cash balance was principally due to the lapsed grants of 1884-85, aggregating Rs. 6,65,803-4-9, having been renewed during the past year. It will thus be seen that these

lapsed grants helped to swell the total of the supplementary sanctions after the passing of the Budget for 1885-86 to Rs. 8,33,810-2-11, as per Statement **B**. The causes of the increase in the different items of revenue and of the savings under the various heads of expenditure have already been explained by me in detail in my remarks on Statements **A** and **C**.

It therefore only remains for me to show below the manner in which the above large surplus, after excluding adjustment items, was appropriated, and what sum remains available to meet our future wants.

					Rs.	a.	p.
Actual Cash Balance						12,166	5 4

Less—Already appropriated in the Budget for 1886-87							2,73,099 0 0
				Amount available		Rs.	11,89,311 13 10

From the above available surplus if Rs. 9,84,524-6-11 were deducted on account of the lapsed grants of 1885-86 renewed during the current year, which include upwards of 2½ lakhs on account of Loan Works, there would remain Rs. 2,04,787-6-11 to be utilized for meeting the discount of Rs. 2,53,220 on the 44 lakhs Sanitary Works Loan.

This result of the past year's finances, which enabled us to meet upwards of 4½ lakhs on account of Loan Works and Discount and about ¾ of a lakh for Loan Works Establishment out of current revenue, will be deemed extremely satisfactory.

It is however very desirable, in order to place the finances in a perfectly sound condition, to apply for a loan of 6 lakhs, instead of 4½ lakhs as already sanctioned by the Corporation for the Fort Drainage Works. The Malabar Hill Reservoir Roof and Queen's Road Sewer excesses, the cost of the extensions at Love Grove Pumping Station, and the amount of the discount on the Sanitary Works Loan, can in that case be fully met out of Loan Funds, leaving a surplus cash balance of over a lakh of rupees.

The raising of the above loan will increase the amount of the Sanitary Works Loan to rupees 50 lakhs. The extra amount of interest and Sinking Fund required for the repayment of the total loan can be more than met from the saving of interest which will be annually effected on the Sanitary Works Loan Instalment by our having received short-period loans, amounting to Rs. 6,61,000, repayable in one, two, five, and ten years, as explained before.

APPENDICES.

No. 1 *A and B.*—The former statement shows that bonds of the value of Rs. 19,000 were transferred from Bombay to London. Nearly three-fourths of the 6 per cent. loans of Rs. 17,38,000 were held at the latter place at the end of last year.

It will be observed from the latter statement that the amount outstanding on 31st May 1886 was Rs. 285 larger than that at the close of 1884-85.

No. 1 *C and D.*—From the first statement it will be seen that, including Rs. 30,000 paid during the past year, the total reduction in the principal amount of the 5 per cent. loan of 1878 of Rs. 26,94,000 aggregated Rs. 1,81,500. The second statement shows that the outstanding interest on 31st March 1886 was Rs. 3,500 against Rs 2,587-8-0 at the close of the previous year.

No. 1 *E* shows that Rs. 19,450 remained unpaid at the end of the past year on account of interest for the 2nd half of 1885 due on the 5 per cent. Sanitary Works Loan of 44 lakhs.

No. 2 is the Town Duty statement, showing the aggregate amount of duty levied on importation and the sum refunded on exports during the past year.

The following figures show the comparison between the yield, refund, and balances of 1885-86 and the previous year :—

	1884-85.		1885-86.	
	Rs.		Rs.	
Opening Balance	13,421		20,278	
Revenue	14,35,383	14,48,804	13,69,919	13,90,197
Deduct—				
Refunds	6,55,096		6,85,742	
Closing Balance	20,278	6,75,374	25,162	7,10,904
		7,73,430		6,79,293
Less—Cost of Collections, &c.		49,253		48,482
		Rs....7,24,177		6,30,811

In the Budget for the past year a net revenue of Rs. 6,70,000 was estimated, the gross receipts having been taken at Rs. 12,10,000 and the refunds at Rs. 5,40,000.

The total revenue however was Rs. 1,59,919 better than the estimate. The amount refunded also exceeded the estimate by Rs. 1 45,742. The unadjusted balance in hand of our Agents (principally the G. I. P. Railway Company) was Rs. 4,884 in excess of that on 1st April 1885. Thus there resulted a net increase of revenue of only Rs. 9,293, as stated at page 52 of this Report.

The marginal contrast between the gross yield of duty on the different articles during 1885-86 and the previous year shows that there were increases under grain, wines and spirit, beer and timber, whereas there was a falling-off under ghee, firewood, and chiefly in sugar. The large decrease on the last item is partly due to the reduction in the tariff value allowed from 6th February 1885, and partly to the revenue from this article in 1884-85 being Rs. 1,63,816 larger than that in 1883-84 owing to heavy imports. Thus the article appears not to have been imported in any large quantity during the past year.

Articles.	Actuals for 1884-85.	Actuals for 1885-86.	Increase.	Decrease.
	Rs.	Rs.	Rs.	Rs.
Grain	5,50,054	6,15,714	65,660	...
Wines & Spirits	2,05,661	2,29,666	24,005	...
Beer	7,141	8,683	1,542	...
Sugar	3,73,025	2,15,363	...	1,57,662
Ghee	1,32,010	1,26,551	...	5,459
Timber	98,969	1,09,696	10,727	...
Firewood	68,523	64,246	...	4,277
	14,35,383	13,69,919	1,01,934	1,67,398
			Net Decrease.	65,464

No. 3—From this statement, showing the total receipts and disbursements of the past year, including all adjustments, it will be observed that the ordinary revenue, exclusive of the profit on stores and workshop, exceeded the regular expenditure by Rs. 5,51,982-2-8, as per

Municipal Fund (exclusive of Water Works)—		
Income not including Profit on Stores.....	Rs.	37,43,530 9 7
Expenditure.....	„	31,91,548 6 11
	Rs.	5,51,982 2 8

margin. This sum was more than sufficient to meet payments, amounting to Rs. 55,200-0-6, on account of reduction of debt, as per Statement C.

The Water Works debt to the Municipal Fund on 31st March 1886 was Rs. 63,53,976-11-7 against Rs. 54,90,361-10-1, owing chiefly to the extension of the water-supply in the outlying districts.

Loan Works.—The total expenditure on the Surface Drainage Works, including Rs. 1,52,655-8-0 spent during 1885-86, amounted to Rs. 12,20,626-13-6, as detailed below :—

Surface Drainage Works.

Establishment	36,309 0 0	.....	36,309 0 0
	2,18,224 3 1	1,07,051 8 0	3,25,275 11 1

Rs. 20,396-3-0 were advanced from surplus cash balance for the Fort Drainage Works, pending the raising of the requisite Loan Funds as sanctioned by the Corporation.

The aggregate expenditure up to the end of last year on the Ripon Road amounted to Rs. 1,64,853-1-9, of which about Rs. 1,00,000 are anticipated to be recovered by sale of surplus land, &c.

Rs. 15,872-4-1 were expended on Health Department stables and other minor sanitary works sanctioned to be executed out of the loan of Rs. 20,88,000.

An expenditure of Rs. 27,332-9-5 was incurred during 1885-86 on the extension of the works at Love Grove Pumping Station sanctioned to be paid out of loan charges, present or future.

The unadjusted advances to Municipal Officers at the close of the past year amounted to Rs. 17,880-1-2 against Rs. 10,247-11-0 on 31st March 1885. This was chiefly due to advances made during the past year to the Executive Engineer, Tansa Works, and the Executive and Deputy Executive Municipal Engineers for Loan Works expenditure.

The aggregate value of stock in charge of the different Municipal Departments on 31st March last was Rs. 13,12,207-10-2. The stock balances at the end of 1884-85 amounted to Rs. 13,07,606-3-11.

The outstandings on account of private and departmental works executed by the Engineer's Department and of work done in the Municipal Workshops were raised during the past year from Rs. 1,33,412-11-6 to Rs. 2,30,632-1-6. I have addressed you separately on the subject of these large outstandings, some of which extend over a number of years.

Amounts advanced to the Malabar Hill Reservoir and the Tansa Works Contractors for materials brought on the ground of the works more than account for the advances to Contractors having been enhanced from Rs. 3,702-4-0 on 31st March 1885 to Rs. 10,748-12-0 at the close of the past year.

No. 4.—*Liabilities.*—The consolidated loan balance was reduced to Rs. 53,20,259-9-11 by payments, aggregating Rs. 1,13,399-3 4, made to Government during the past year.

Sixty bonds of the 5 per cent. loan of 27 lakhs of 1878 were paid off during the past year. The sum we owed on account of this loan on 31st March last was consequently Rs. 25,12,500.

The whole amount of 44 lakhs of the Sanitary Works Loan was raised during the past year at rates varying from 92 to 100¾. The

net discount on the loan amounted to Rs. 2,53,220, which gave an average rate of 94¼ per every hundred. Thus the actual sum realized by us for the loan was Rs. 41,46,780.

We had in our hands cash deposits from Contractors, &c., amounting to Rs. 1,51,173-12-0 on 31st March 1886 against Rs. 1,81,365-5-3. The reduction was due to a large sum deposited by the G. I. P. Railway Company on account of rates and taxes due by them having been adjusted at the close of last year.

We paid Rs. 4,470 to Government on 6th May 1886, being the amount of License-tax collected by us during 1885-86.

The unexpended balance of the 10 per cent. provision for Loan Works Establishment was Rs. 61,138-9-3.

This sum will suffice for the outdoor supervision establishment for the different works up to their completion, provided the superior and office, survey, &c., establishments are continued to be paid out of current revenue as in the past and current years.

The total liabilities of the Municipal Corporation (exclusive of Rs. 8,03,795-11-0,* the unbooked Vehar Debt) reached Rs. 1,42,75,659-5-4 at the end of last year.

No. 5.—*Assets.*—The recoverable advances on 31st March 1886 amounted to Rs. 2,59,260-14-8 against Rs. 1,61,578-2-7 at the end of 1884-85. The investments were raised from Rs. 21,61,772-2-6 to Rs. 53,13,674-15-6 during the past year. The increase was solely due to more than half of the Sanitary Works Loan and the Municipal Buildings and the Nesbit Road Bridge reserves being fully invested during 1885-86.

There was stock in hand of the value of Rs. 13,12,207-10-2. The value of property and buildings was upwards of Rs. 63,32,241-4-0, as per Executive Engineer's lists, of which property, &c., of the value of Rs. 17,94,405-8-1 only appear in our books. The property, &c., representing the difference, have not yet been booked for the reasons explained in my last two reports. It is however very desirable that the lists should be revised by the Assistant Engineer on his return from the Tansa Works during the current monsoons. Our investments, advances, and the value of stock and buildings, including the cash balance, aggregated Rs. 1,32,29,551-1-8, which sum very nearly equalled our liabilities, amounting to Rs. 1,42,75,659-9-4. Roads, over-bridges, drainage, and other works of the value of Rs. 44,64,176-5-11 were constructed out of Loan Funds. The Water Works owed the Municipal Fund Rs. 63,53,976-11-7, which sum is more than covered by the expenditure of Rs. 65,08,387-7-4 on Tulsi, Bhandarwada, and

* Or Rs. 30,14,239-2-10 as per Accountant-General's mode of calculation.

other Water Works, as per Appendix No. 6, exclusive of the cost of the Vehar Lake, which is not booked as explained in my Report for 1884-85 :—

	Rs.	a.	p.
Advances, Investments, and Cash Balance	55,85,102	3	6
Stock	13,12,207	10	2
Buildings, &c	63,32,241	4	0
Rs.	1,32,29,551	1	8
Roads, Overbridges, Drainage, and other Works carried out from Loan Funds	44,64,176	5	11
Rs.	1,76,93,727	7	7
Tulsi and Vehar Lakes	1,01,75,000	0	0
Other Water Works	15,00,000	0	0
Total Assets..	2,93,68,727	7	7
Gross Liabilities, including unbooked Vehar Debt ..... Rs.	1,50,79,455	4	4

The figures in the margin show that our assets, including the Vehar and Tulsi Lakes at the Engineer's valuation, were nearly twice the total liabilities.

No. 6 is the usual Water Works Account kept separate and distinct from other accounts under the provisions of the Municipal Acts. It shows that the Water revenue exceeded the ordinary expenditure, including Rs. 56,226-4-5 spent on laying new mains, &c., by Rs. 82,379-1-6. This sum was a little short of the payments of Rs. 88,197-4-7 made towards the reduction of the Consolidated and Bhandarwada Works Loans as per Items E and F, Statement **C.**

STORES.

The Stores Clerk had in his charge on 31st March 1886 stock of the value of Rs. 2,17,364-4-4. The stock balances at the close of 1884-85 and 1883-84 were Rs. 2,34,288-10-0 and Rs. 2,72,834-12-0 respectively.

The principal items of the balances of the past three years are given below for purposes of comparison :—

Names of Articles.	Balance on 1st March 1884.			Balance on 1st March 1885.			Balance on 1st March 1886.

Stores, amounting to Rs. 1,545-2-3, inclusive of water meters, were sold to private parties during the past year (Rs. 1,325-11-0 direct and Rs. 219-7-3 through the Executive Engineer, Drainage Works).

The Stores Clerk has now taken stock of all the items of stores standing on our books, excepting stones and the earthenware pipes, bend junctions, &c., which the Executive Engineer (Drainage Works) has been requested to sort and separate the serviceable from the unserviceable ones under your No. 7386 of 14th October 1884.

This work has been completed, and the result communicated to me under the Executive Engineer's No. 147 of 8th April last, and directly he has separated the articles which are likely to be useful for the Drainage Works, and pointed out to my Stores Clerk the different stocks of serviceable and unserviceable articles, I shall address you separately on the subject; but I regret that out of the large stock we have on hand, amounting to Rs. 60,632-2-7, the Executive Engineer informs me that the following articles of the approximate value of Rs. 1,350 can only be used for works in progress, or intended to be undertaken hereafter:—

Articles.	Numbers.
12" Earthenware Straight Pipes	3
6" do.	24
4" do.	2
4" do. Bend Pipes	318
9"×6" do. Junction oblique	1
6"×6" do. do.	111
6"×4" do. do.	122
12"×9" do. do.	4
6"×4"×4" do. do.	14
9"×6"×6" do. oblique	5
6"×6"×6" do. do.	18
6"×4"×4" do. do.	16
6"×6"×6" do. do. quadrant	3
9" Oblique junction blocks for ovoid sewers	169
7½ Gully traps with 4" discharge	7
	817

The result of the stock taken by the Stores Clerk shows that there were Rs. 12,153-13-8 worth of stores, which did not appear on our books at all, and which have now been taken into account as surplus articles; but on the other hand there were deficits in several items, principally in brass castings, amounting to Rs. 2,761-9-7, which have been written off, leaving a balance of Rs. 9,392-4-1 in favour of the Stores Account. The deficit in the brass castings might probably be due to the loose practice that formerly prevailed of using them in urgent cases, if the Stores Clerk be not present, without waiting to give proper warrants. I am however going through the accounts of the castings from the beginning of 1880, when the balance was actually ascertained to be correct, and will report to you the result.

It will be observed that a further reduction of Rs. 16,924-5-8 in the balance of stores on hand was effected during the past year by avoiding purchases from contractors, &c., of stores in excess of actual requirements and by not receiving from the Workshops castings, &c., made without indents from any of the Municipal Departments.

Taking into account the amount of surplus stores now brought on our books, the actual amount of balance thus worked off during the last year was Rs. 26,316-9-9, or Rs. 64,862-11-9 during the past two years.

The above figures prove the immense good which resulted by the introduction of the new rules framed by you in connection with the Workshops and the Stores. Moreover, the Stores Clerk being permanently located with his Assistant at the Stores Office was enabled to personally inspect deliveries of supplies from contractors and others; and consequently articles are now received of better quality than before, and prices are only paid according to the quality of goods supplied.

As the Stores Yard is accessible to different persons from more than one place, perhaps you will consider the desirability of providing suitable quarters for the Chief Stores Clerk on the Stores premises with a view to make him entirely responsible for the stores in his charge.

It would also be to the interest of the Municipality if an extra Clerk were allowed to the Stores Clerk out of the Loan Funds, as I find he is unable to keep pace with the current work of his office, even by working before and after office-hours and on Sundays and holidays. He performs his work with remarkable zeal and most commendable care.

WORKSHOPS.

The receipts and expenditure of the Municipal Workshops for the past year are contrasted below with those of 1884-85 :—

	1884-85.				1885-86.

Total...Rs.				1,89,323 15 0				2,49,373 12 0

It will be seen from the above figures that the outlay on the Shops during the past year exceeded that of 1884-85 by about half a lakh of rupees, entirely on account of work done for Government on the occasion of operations at the North-Western Frontier in February 1885.

The ne profit on the works, including Rs. 614-2-1 realized by the sale of iron, &c., was Rs. 15,022-7-10.

The following statement gives the percentage of profit made in the various classes of works executed in the Shops :—

Nature of Work.	Actuals.	Amount charged.	Profit.	Percentage of Profits.
	Rs. a. p.	Rs. a. p.	Rs. a. p.	
Private Works	39,119 6 9	44,987 0 9	5,867 10 0	$15\frac{2}{5}$ %
Departmental Works	1,43,615 11 6	1,61,782 15 0	18,167 3 6	$12\frac{1}{2}$ %
			24,034 13 6	
Scavengering and drain carts.....	14,450 3 2	16,818 0 0	2,367 12 10	$16\frac{3}{5}$ %
Night-soil carts	7,239 4 10	7,800 0 0	560 11 2	$7\frac{7}{10}$ %
Watering carts	7,333 7 5	8,928 0 0	1,594 8 7	$21\frac{9}{10}$ %
Scavengering, drain, and night-soil carts.....	21,689 8 0	24,618 0 0	2,928 8 0	$13\frac{8}{10}$ %

By charging 15 per cent., as directed by you, on the actual expenditure incurred by us for Government work done in the Shops from February to July 1885, we made a profit of Rs. 5,867-10-0. The gross profit on repairs to carts and other departmental works, principally on construction of and repairs to scavengering, drain, night-soil, watering and flushing carts, iron and brass castings, and construction of water tanks, latrines, &c., was Rs. 19,461-8-1. There was however a loss of Rs. 1,294-4-7 on repairs to meat-vans and dust-bins, construction of shred-lifters and iron passage on top of the boiler at Love Grove Pumping Station, and other sundry jobs.

Out of the aggregate net profit of Rs. 24,034-13-6 on private and departmental works, Rs. 9,448-3-8 were defrayed for repairs to workshop, machinery, tools, &c., &c. Thus the net profit on the past year's working of the Shops was Rs. 15,022-7-10.

On the working of the Iron Foundry there was a net profit of Rs. 1,772-12-9. This result was entirely due to a very large order of castings for the Fort Sewerage Works having been executed during the last three months of 1885-86. Otherwise there would have been a considerable loss during the pastyear, as was the case during the preceding four years and the first six months of 1885-86.

A full report on the Superintendent's explanation of these yearly losses will be forwarded to you about a week hence.

There was a further increase during the last year of Rs. 13,725-2-2 in the already large outstanding of the Shops owing to the cost of certain iron works for the Malabar Hill and the John Hay Grant Reservoirs and of making six flushing carts not having been adjusted during 1885-86.

As some of these outstandings have remained unadjusted since 1881, I have addressed the Executive Engineer on the subject.

The Shop and Supervision charges respectively amounted to Rs. 14$\frac{3}{4}$ per cent. and 6$\frac{3}{4}$ per cent. in 1885-86 against 16$\frac{3}{16}$ per cent. and 6$\frac{1}{16}$ per cent. during the previous year.

GENERAL REMARKS.

The annual cash disbursements made through the Paymaster since 1873 and the unpaid wages credited to miscellaneous savings every year are shown in the following table :—

Year.	Payments. Rs.	Savings. Rs.
1872	In this year there was no Paymaster.	2,177
1873	8,40,451	3,098
1874	8,50,000	4,246
1875	8,56,265	3,751
1876	8,62,202	3,395
1877	9,43,565	4,077
1878	9,84,255	9,233—4,300
1879	10,35,050	3,800
1880	10,18,476	3,244
1881	10,14,139	3,478
1882	10,27,034	3,792
1st Quarter of 1883	2,63,746	
1883-84	11,32,907	3,427
1884-85	12,20,854	3,021
1885-86	13,01,935	4,143

Cash received	Rs.	83,09,228	6	9
„ paid.....	„	82,38,191	15	7
	Rs.	1,65,47,420	6	4
Adjustments	„	44,05,011	2	6
Total...	Rs.	2,09,52,431	8	10

The figures in the margin indicate that the gross outturn of the past year amounted to Rs. 2,09,52,431-8-10, against

Rs. 134½ lakhs in 1884 85
„ 117½ „ in 1883-84
„ 140½ „ in 15 months ending 31st March 1883.
„ 175 „ in 1881
„ 125 „ in 1880
„ 108 „ in 1879
„ 171 „ in 1878
„ 109 „ in 1877
„ 81 „ in 1876
„ 82 „ in 1875
„ 76 „ in 1874

Year.	No. of Certificates.	
1873	3,186	
1874	4,467	
1875	6,555	
1876	7,259	
1877	7,987	
1878	12,754	
1879	16,374	
1880	16,031	
1881	17,651	
1882	15,878	20,521 for 15 months.
1st Qr. of 1883.	4,643	
1883-84	16,023	
1884-85	22,573	
1885-86	18,760	

I have shown in the margin the number of Town Duty refund certificates annually passed from 1873 up to the end of last year.

The number of receipt and disbursement vouchers that passed through the hands of this Department during the past ten years are quoted below :—

Year.	No. of Receipt Vouchers.		No. of Disbursement Vouchers.		Total.
1876.....	4,862	+	1,2045	=	16,907
1877.....	5,013	+	14 384	=	19.397
1878.....	5,511	+	18,731	=	24,242
Average per annum for the 5 years ending 1883-84	5,946	+	25,798	=	31,744
1884-85	6,942	+	32,516	=	39,458
1885-86	6,855	+	30,495	=	37,350

The inward and outward letters received and despatched during the past year were respectively 20,910 (exclusive of 19,186 Ward remittance reports and 37,350 vouchers) and 3,517 (excluding 583 intimations to parties to call for payments) against 2,250 and 1,301 in 1875.

Eight thousand and eight hundred bonds of Rs. 500 each were issued during the past year between 5th May 1885 to 30th March 1886, and payment of interest thereon for the 2nd half of 1885 was made without any extra establishment. The services in this matter of the Chief Loan Clerk, Mr. Byramji Sheriarji, deserve special mention.

The raising of the 44 lakhs Sanitary Works Loan in the past, and portions of the Tansa Loan during the current, year, with the annually increasing work described in the preceding pages, have begun to tell upon my Assistants and the Staff generally, many and the best of whom are considerably shattered in health. I therefore earnestly solicit the favour of your considering the re-organization of my establishment in the manner suggested in my last annual report, as the responsibilities of the Assistants, &c., are becoming very great and divided, principally of the 1st Assistant, Mr. Maneckshaw Cawashaw.

I have the honour to be,

Sir,

Your most obedient servant,

SORABJI NAVAROJI COOPER,

Controller of Municipal Accounts.

BOMBAY, *7th July* 1886.

APPENDICES

TO THE

CONTROLLER OF MUNICIPAL ACCOUNTS' REPORT FOR 1885-86.

E. C. K. OLLIVANT,
Municipal Commissioner.

REPORT OF THE EXECUTIVE ENGINEER FOR 1885-86.

No. 799 of 1886-87.

From RIENZI WALTON, Esq., Mem. Inst. C.E.,
Executive Engineer, Municipality,

To E. C. K. OLLIVANT, Esq., C.S.,
Municipal Commissioner
for the City of Bombay.

Bombay, *7th July* 1886.

Sir,

I have the honour to submit the Annual Report on the various works which have been under my charge and on the general working of the Executive Engineer's Department during the year 1885-86.

The Report is divided into the following four heads:—

(1) Sewerage Works.
(2) Water Works (ordinary and loan).
(3) Roads, Buildings, and Lighting.
(4) Public Gardens and Municipal Workshops.

During my absence on 2 months' privilege leave from 10th October 1885, Mr. Smith was in charge of the Drainage Department.

Mr. Braham having availed himself of the furlough granted to him from the 2nd March, the whole Department came under my charge.

I have the honour to be,
Sir,
Your most obedient servant,
RIENZI WALTON,
Executive Engineer, Municipality.

(1.)—SEWERAGE WORKS.

1. First portion of the new Sewerage Scheme :—
   (*a*) Pumping Station, Love Grove, Warli.
   (*b*) House connections.
2. (*a*) Queen's Road Intercepting Sewer.
   (*b*) Ventilating Shafts.
3. Clerk Road Branch of Main Sewer (and Pipe sewers in DeLisle Road and Arthur Road).
4. (*a*) Sewerage of Kamatipura.
   (*b*) Surface Drainage of Kamatipura.
   (*c*) House connections in Kamatipura.
5. Ovoid Sewer from the Crawford Markets along Hornby Road to the Bori Bander Railway Terminus, and thence by Mint Road to the Town Hall.
6. Ovoid Sewer across the Byculla Race-course ; Ripon Road Sewer.
7. Pipe Sewers and house branches in the Agripada District.
8. Sewerage of the Fort (Pipe Sewers).
9. Surface Drainage Scheme.
   (*a*) Gowalia Tank, Tardeo and Arthur Road Storm-water Drain.
   (*b*) Widening and Deepening the Old Main Drain.
   (*c*) Clerk Road Culvert and Sluice Gates.
   (*d*) Paidhoni, Parel, and Bellasis Road Storm-water Drain.
   (*e*) Mahalaxmi Storm-water Reservoir.
10. Pipe Sewers in Western Portions of Khetwadi.
11. Wari Bander Road side drain.
12. Pipe Sewers in Northern part of Gilder Street.
13. Incinerator (kutchra-burning furnace) and "Beehive" Destructor.
14. Night-soil Depôts in Girgam and Kamatipura.
15. Falkland Road Sewer (old).
16. Miscellaneous Drainage.
17. Khetwadi Depôt.
18. Carnac Bander Pumping Station.
19. Love Grove, Warli, and Dharavi Sluices.

1.—FIRST PORTION OF THE NEW SEWERAGE SCHEME.

(*a*) 1.—*Pumping Station, Love Grove, Warli.*

The engines and pumps worked well during the year, and it is hoped that they will work still more satisfactorily and economically, as almost all the improvements and additions referred to in the last Administration Report have been carried out.

The steam pipes were covered with the "Eagle" cement, and an additional reservoir has been constructed as contemplated last year, and it is expected that these works will no doubt effect a saving in the consumption of coal.

The cost of coal allowed per Budget was	Rs.	31,753	0	0
The cost of coal expended was	,,	29,416	2	9
Saving...Rs.		2,336	13	3

The Budget allowance for establishment was	Rs.	9,348	0	0
The actual expenditure was	,,	9,058	15	0
Saving...Rs.		289	1	0

(2) *Additional Works—Pumping Station.*

The total amount sanctioned for these works was Rs. 3,9724-0-7.

2. Tenders were received for these works on the 1st April 1885; but the rates of all of them being unreasonably high, it was decided by the Commissioner to carry out the works departmentally.

The works were commenced on the 13th April 1885 under the supervision of Mr. Inspector Baker, and were completed, with the exception of a few minor items, on 31st January 1886 (9 months and 18 days) with a saving of Rs. 7,507·17. Out of this saving it is proposed to expend Rs. 2,240 on a chimney for the kiln and a dynamo, which would no doubt, when completed, be a considerable improvement to the station. Thus the net saving is Rs. 5,267·17.

(*b*) *House Connections.*

Endeavours to obtain tenders at more reasonable rates than those previously offered by contractors having failed, it has been decided to to carry out the connections departmentally in the district of Khetwadi, in order that practical proof may be furnished of what are fair rates for a description of work which is comparatively novel in Bombay.

The tender of Messrs. Geo. Smith & Co., of Glasgow, for the supply of cast-iron pipes and fittings for the first portion of the Drainage Scheme has been accepted, but pending the unavoidable delay

occasioned by their Bombay Agents (Messrs. Walsh Lovett & Co.) obtaining full legal powers from their Principals, the contract has not yet been signed.

A current contract with Messrs. Richardson and Cruddas has been so extended as to include all the stoneware necessary for the house connections in the first portion of the Drainage Scheme. By this extension a discount of 7½ per cent. on the whole of the contract has been secured.

2.—(*a*) QUEEN'S ROAD INTERCEPTING SEWER.

Though the whole of this work was completed on 2nd July 1885, as stated in my last report, considerable trouble and inconvenience were caused to the Municipality by the contractor, Mr. Hewson, with reference to the settlement of his account in connection with it. The matter was finally submitted to Mr. J. Anderson, the arbitrator, conjointly appointed in the case, and is pending his award.

(*b*) *Ventilating Shafts.*

Five ventilating shafts were constructed on Queen's Road at a cost of Rs. 1,668-13-9. The work was done departmentally under the supervision of Mr. Inspector Baker.

No sooner the erection of these shafts was completed than several complaints were made, both to the Commissioner and in the public press, as to the foul emanations from them; but the fallacy of these complaints was soon made known, when it was pointed out that the shafts had not been connected with the sewer at that time.

3.—CLERK ROAD BRANCH OF MAIN SEWER (AND PIPE SEWERS IN DELISLE ROAD AND ARTHUR ROAD.)

Contractors:—MESSRS. NAGU SAYAJI & Co.

The whole of the Clerk Road Sewer from the Main Sewer to Parel Road opposite the Victoria Gardens, length of 5,121 feet (nearly 1 mile), has been completed during the current year, ready for the reception of sewage.

The DeLisle Road 18' Pipe Sewers (10,735 feet long), which starts from Elphinstone Road and discharges into the Clerk Road Sewer, has also been completed, and house-owners have begun to make connections with it.

The DeLisle Road Pipe Sewer having been completed, the Arthur Road 15' Pipe Sewer, which discharges into it, was taken in hand and has been completed. The total length is 2,033 feet. The pipe sewer will undoubtedly be of very great service for a district daily increasing in importance, which has hitherto been entirely unsewered.

That the benefit of it will be appreciated is evinced by the numerous applications already made for permission to connect the houses.

4.—(*a*) KAMATIPURA SEWERAGE WORKS.

Contractors:—MESSRS. NAGU SAYAJI & Co.

This work has not yet been taken over from the contractors owing to the rectification of the paving in some of the sweepers' passages not having been entirely completed.

It was stated in the Administration Report of last year that this work could be carried out more durably and with less inconvenience when the nahani fittings were all fixed, and as, for reasons hereinafter explained, those fittings have been delayed, the rectification of the passages has been deferred.

(*b*) KAMATIPURA SURFACE DRAINAGE WORKS.

The relaying of water-tables to proper levels and the reforming of the streets have been completed by the Road Department, improving

the appearance and sanitary condition of the district to a considerable extent.

The people have unfortunately an apparently incurable habit of coming out into the streets to do their ablutions and washing, however well their houses may be supplied with nahanis. The wheel traffic of the district being small, they are able to do this with immunity from danger which might otherwise keep them within their houses. The sides of the streets, too, are used much too frequently for natural purposes, specially by children, whose parents appear to be entirely unconscious of the impropriety of such proceedings.

The greater need of abstention from using the road-sides in Kamatipura for the purposes described exists in the circumstance that bidi-making is carried on in the district to a very large extent, and the leaf-cuttings, whether thrown on to the water-tables or blown there by the wind, obstruct the flow of sewage which might otherwise pass away and be less harmful, however improper it may be that any sewage at all should be found there.

(*c*) HOUSE CONNECTIONS IN KAMATIPURA.

Contractors for Castings:—MESSRS. RICHARDSON & CRUDDAS.

Contractors for Works:—MESSRS. SITARAM LAKSHAMON & Co.

Owing to an excessive number of castings having been broken on the voyages out from England, Messrs. Richardson and Cruddas were unable to complete their contract by the supply of the whole of the castings until December 1885.

Then Messrs. Sitaram Lakshamon & Co. declined to proceed with the work of fixing so long a time after the period of their contract having elapsed, and under the advice of the Municipal Solicitors their demand for a return of the deposit-money was complied with.

Arrangements for completing the work have not yet been concluded.

5.—OVOID SEWER FROM THE CRAWFORD MARKETS ALONG HORNBY ROAD TO THE BORI BANDER RAILWAY TERMINUS AND THENCE BY MINT ROAD TO THE TOWN HALL.

Contractors :—MESSRS. FAKIR MAHOMED BABANBHOY & Co.

The invert blocks of the sewer have been laid over a length of 4,736 feet; the walls are built to a length of 4,682 feet; and the arch has been turned to a length of 4,668 feet.

The excavation for a distance of 4,524 feet has been made and filled up, and excavation is in progress over an additional length of 1,267 feet.

21 Manholes have been constructed.

The total length of the sewer will be 6,080 feet, and in 3029 feet or very nearly half the whole length rock has been met with of an average depth or thickness of 10 feet 6 inches.

This heavy rock-cutting in a narrow trench added to the cutting through large blocks of the masonry of the old Fort walls has unfortunately retarded the progress of the work.

The sewer is very much needed not only to receive the discharge for the Fort Pipe sewers, but also for connections of several buildings along its route (some large public ones) regarding which numerous applications have been received.

Every effort is being made to urge the Contractors to complete the work at the earliest possible moment.

6.—OVOID SEWER ACROSS THE BYCULLA RACE COURSE.

RIPON ROAD SEWER.

Contractors :—MESSRS. RAGHUNATH BHASKERJI & Co.

On account of the difficulty in acquiring land, this work had to be completed in short lengths distributed over the whole line of Sewers.

The work is now practically completed.

The following statement gives the quantities and value of work done :—

STATEMENT showing the Quantities and Cost of Work done in connection with the Ovoid Sewer across the Old Race Course.

Quantities.	Particulars.	Rate.	Per	Amount.
		Rs. a. p.		Rs.

	Total Rs.....			56,863·00

7.—PIPE SEWERS AND HOUSE BRANCHES IN THE AGRIPADA DISTRICT.

Contractors :—MESSRS. FAKIR MOHOMED BABANBHOY & Co.

These works have been completed, though an extension is contemplated, provided that anticipated savings after a final settlement with the Contractors are realized.

The length of pipe sewers laid down is as follows :—

18" Pipe Sewer	.....	Feet 3,027
12" ,,	.....	,, 7,243
9" ,,	.....	,, 6,079
	Total.....	16,349

The total length is 16,349 feet, or 3 1/10 miles, exclusive of 6" house-branches laid across the roads for future connections.

Several deviations were made from the contract, notably in the case of Clare Road, in which an 18" pipe was to have been laid from the west end of Shepherd's Road with fall towards Haines Road

When, however, the Ripon Road Sewer was sanctioned, it was seen that a great benefit might be obtained by laying a pipe sewer along Clare Road from opposite the Byculla Railway Station with a fall to the south end of Ripon Road, and that under the altered conditions, of the case a 9" pipe (instead of an 18" pipe) would be sufficient. It was also seen that for the pipe sewer from opposite the Byculla Railway Station to the south end of DeLisle Road a 9" pipe would then be sufficient instead of an 18" pipe. So that by the construction of Ripon Road it became practicable to lay the pipe sewers from the south end of DeLisle Road to the west end of Shepherd's Road with better grades with less excavation and with smaller pipes than had been intended, and advantage was taken of this together with the further advantage of extending the pipe sewer in Clare Road from Shepherd's Road to the end of Ripon Road.

By this means and by other alterations a considerable saving of work was effected, but the Contractors have, notwithstanding the provisions of the contract, set up a preposterous claim to be paid in full as though the work had been carried out as at first designed, and the matter has been referred to the Consulting Engineer to the Municipality, who is the sole arbitrator appointed under the contract.

8.—SEWERAGE OF THE FORT (PIPE SEWERS).

Contractors:—Messrs. Fakir Mohomed Babanbhoy & Co.

The tender for this work having been accepted by the Town Council only on the 25th March 1885, the formal contract having thereafter to be prepared and executed, and the Contractors having to make their preliminary arrangements, there was comparatively no time left for commencing the work before the rains of 1885.

In October, as soon as the weather permitted, the Contractors began the work energetically, and that they have made good progress is evident from the fact that, although only 12½ per cent. of the contract time has expired, very nearly 30 per cent. of the work has been completed.

This is a very favourable result, but it must be observed that the work done is a portion of that which is the most straightforward and most capable of being carried out with rapidity. The house connection work and the ventilating shafts will occupy more time in comparison with equal quantities and value of the kind of work already executed.

At the same time it must be confessed that the progress is substantially good and as satisfactory as could have been anticipated.

(*d*) *Paidhoni, Parel and Bellasis Road Stormwater Drain.*

Contractors:—MESSRS. NAGU SAYAJI & Co.

The whole of the drain has been completed from Paidhoni, along Parel Road (Bhendi Bazaar), Bellasis Junction Road and Bellasis Road to the junction with the open Main Drain near Bellasis Bridge.

The manholes and water entrances along the whole route have also been completed.

The general particulars of the Main drain are as follows :—

Circular section from Paedhoni to Imamwada Road (internal diameter 5 ft. 6 in.)	1,527 feet.
Ovoid section from Imamwada Road to south-east end of Bellasis Junction Road (internal transverse diameter 5 ft. 8 in. and internal height 8 ft. 6 in.)	1,900 „
Bee-hive section from south-east end of Bellasis Junction Road to open main drain near Bellasis Bridge (internal transverse diameter 10 ft. and internal height 7 ft. 3 in.)...	5,328 „
	8,755 feet.

The total length of the drain is therefore 8,755 feet or $1\frac{2}{3}$ mile.

The most difficult part of the work was, as stated in the last Annual Report, the 1,527 feet length of circular drain from Paedhoni to Imamwada Road, where there was just room for the drain with only a few inches to spare between it and the gas main on one side and the Tramway on the other.

The trench had to be boarded over for part of its width, and the fencing fixed upon the boarding, so that the foot-boards of the tram-cars might pass clear of the fence.

A considerable quantity of rock cutting too added to the difficulties of the case.

That this dangerous portion of the work was carried out to completion without injury to the gas main and without accident of any kind is exceedingly creditable to all concerned.

At Erskine Road a dip has been made under the large drain which crosses Parel Road there, and arrangements have been made to receive the overflow from that drain whenever it may become surcharged.

The first practical proof of the utility of the new drain will be during the rains of 1886.

STATEMENT showing the Quantities and Cost of Work done in connection with the Storm-water Drain in Paedhoni, Parel and Bellasis Roads.

(*e*).—*Mahalakshmi Storm-water Reservoir.*

Contractors :—Messrs. NAGU SAYAJI & Co.

But very little of this work remains to be done.

This consists of a small piece of excavation near Haines Road, another small quantity of excavation for enlarging the access from the old open main drain to the Love Grove sluices, a little excavation near Mr. Wadia's bungalow, the shaping and completion of the Vellard bank, and the fitting up of the Haines Road culvert with screw penstocks.

The whole of this could be finished in two or three weeks but for the objectionable practice of Contractors to reduce the number of their workmen to an absurdly large extent while a considerable quantity of work (though small as compared with the original whole) remains to be done.

A valuable improvement has been made near the Mahalakshmi Police Chauki, forming a better termination to the Reservoir, and obtaining a fine open space above, which cannot fail to be appreciated by the numerous persons who resort to the spot for sake of the sea breeze.

Whatever may remain to be done after the rains of 1886 will not prevent the Reservoir from being for the first time used for its intended purpose during these rains.

Extra work	„	4,893·935
Grand Total...	Rs.	1,58,582·115

10.—PIPE SEWERS IN WESTERN PORTIONS OF KHETWADI.

Contractor:—Mr. Sitaram Lakshamon.

Tenders for pipe sewers in Khetwadi 10th Lane, 11th Lane, 12th Lane, 13th Lane, and 14th Lane all between Khetwadi Main Road and Khetwadi Back Road, were received on the 17th December 1885, and on the 24th idem the tender of Mr. Sitaram Lakshamon, amounting to Rs. 5,019, was accepted.

He objected to certain conditions of the contract which led to conferences and discussions, and the preparation of the contract was consequently unavoidably delayed.

The contract was signed only on the 8th March 1886, and the actual work was commenced on the 28th March.

It is evident that no progress worth mentioning could have been made up to the date to which this report extends.

11.—WARI BANDER ROAD-SIDE DRAIN.

In accordance with the Commissioner's instructions conveyed under his No. 5470 of 28th July 1885, public tenders were invited for this work. The contract form and specification were printed and tenders were called on 8th October 1885. Out of the three tenders received on the 19th idem, Mr. Sitaram Lakshamon's being the lowest was accepted under Town Council Resolution No. 1331 of 20th November 1885.

The contract was signed and the work was commenced in January last.

The work is practically completed, but the final statement of the work done will be a subject for the next Annual Report.

Statement showing the Quantities and Cost of Work done in connection with the Wari Bander Road-side Drain.

	Total...Rs.			3,328 3 2

12.—PIPE SEWERS IN NORTHERN PART OF GILDER STREET.

The erection of a large number of houses in the northern part of Gilder Street between Falkland Road and Bellasis Road rendered an extension of sewers indispensably necessary.

A design and estimate were prepared in May 1885, and submitted to the Commissioner in June.

It was at first intended that the cost should be met out of the budget grant for miscellaneous drainage; but as the end of the year approached, it was found that the whole of the grant would be absorbed by other works not less important than those of Gilder Street. Copies of the Specification, Bill of Quantities, Schedule of Rates, and Form of Contract were printed and tenders invited.

Tenders were received on the 22nd March; but as the rates of all were unreasonably high, it was decided to carry out the work departmentally.

The execution of the work will form a subject of the next Annual Report.

13.—INCINERATOR (KUTCHRA-BURNING FURNACE) AND "BEE-HIVE" DESTRUCTOR.

A kutchra-burning furnace was put up at the Municipal Workshops in the way of an experiment. The total cost of erecting the furnace and of making experiments was Rs. 844-13-1.

The result obtained elicited the fact that 1·27 cart-loads of kutchra could be burnt in one hour at a cost of one anna.

The furnace being of a temporary character was cracked in several places, and consequently it was proposed to build an incinerator 6 feet long; but as the construction of a bee-hive destructor was under consideration, it was deemed advisable to give up the proposal and pull down the furnace.

As the bee-hive refuse destructor is a patent, and no reliable information regarding it could be obtained in Bombay, it took some time to get the requisite particulars and the specification, &c., from the patentee, Mr. John E. Stafford, Borough Engineer, Burnley.

No tenders having been received in response to the invitation, it has been decided to carry out the work departmentally under the supervision of Mr. Inspector Baker, and arrangements for commencing the work have been made.

14.—GIRGAM AND KAMATIPURA NIGHT-SOIL PDEOTS.

Soon after the receipt of the Corporation Resolution sanctioning the sum of Rs. 16,344 for these works, the contract form and specification were drawn up, and tenders invited on 25th April 1885.

Messrs. Fakir Mahomed Babanbhoy and Co. only tendered for the works, and their tender, amounting to Rs. 12,711, was accepted under Town Council Resolution No. 355 of 10th June 1885; but the work was not commenced until December, as the Health Officer suggested certain alterations in the original design, which necessitated a reference to the Commissioner.

The work is now practically completed, and the water connections are being made.

The details of the work done and the cost will form a subject for the next Annual Report.

15.—FALKLAND ROAD SEWER (OLD).

This sewer was injured in the course of the construction of the new main sewer by Messrs. Sir Thomas Thompson & Co. in 1880, and the result of resorting to arbitration in the matter was that it was held that the contractors were not liable for the damage.

In consequence of the injury to the sewer the road near the Falkland Road Dharamshala subsided and had to be fenced in. The Corporation sanctioned on the 29th October 1885 the sum of Rs. 65,398 for repairing the sewer.

The Commissioner's instructions to carry out the work departmentally were received on the 3rd November 1885, and it was commenced on 10th idem under Mr. Inspector Baker.

The work has progressed well, but its completion and the final account will form a subject for the next report.

16.—MISCELLANEOUS DRAINAGE.

Under this head the work of repairing, altering, constructing, and cleaning miscellaneous drains in the town have been carried out by this Department under the supervision of a European Inspector who is a plumber.

In addition to this the work of erecting urinals on the improved principle and of superintending the construction of public latrines and the drainage connections and fittings of houses have been attended to by this Inspector.

The work has of late considerably increased, and it will be necessary ere long to strengthen the establishment for this work.

The following statement gives the details of work done under this head :—

404	Khetwadi Back Road	Do. do. do.
405	Bora Bazar	Do. do. do.

17.—KHETWADI DEPOT.

This depôt has been occupied for the storage of stoneware pipes and specials, cast-iron fittings and cement.

In May last, the landlord, Mr. Manekji Sorabji Powalla, served a notice for the Municipality to vacate the premises.

An arrangement was however made with him for a continuance of the occupation at the increased rent of Rs. 100 per mensem.

+ LIBRARY + OF THE BOMBAY BRANCH OF THE ROYAL ASIATIC SOCIETY.

The following statements show the receipts and issues of stores at the depôt during the year :—

STATEMENT of Cement received and issued on account of the Drainage and other Works for the year ending 31st March 1885.

BALANCE.

Balance on 1st April 1886	.....	.....	24 Nos.	489 Nos.	...	5 Nos.	11 Nos.	1 No.	46197 Nos.

17.—CARNAC BANDER NIGHT-SOIL PUMPING STATION.

The station has worked well during the past year with its usual staff, and also within the budgetted amount allowed for coal stores, &c.

The boilers, engine and pumps are in good working order, and are carefully looked after by the Engine Driver in charge. No casualty of any kind has taken place to stop the working of the engine and the pumps.

No special or extraordinary repairs were required during the year under report to the machinery except a new chimney, which had to be substituted for the old one that was found to be in a very dangerous state.

18.—LOVE GROVE, WARLI AND DHARAVI SLUICES.

The sluices have worked well within the budgetted amount during the year under report, and I have to report a saving of Rs. 465-12-6, during the year.

The doors of the old sluices at Love Grove are getting very old, and will soon require to be substituted by new ones.

Similarly the sluices at Warli require new doors and frames in the masonry, for which provision should be made in the next year's Budget.

(2) WATER WORKS.

(*a*) *Malabar Hill Reservior Roof.*

Contractors:—MESSRS. LITTLEWOOD, PALLONJI & Co.

The work included in the contract is as follows:—

(*a*) A masonry roof over the storage basin measuring 7,568 square yards.

(*b*) A tiled roof over the settling tank covering 9,907 square yards.

(*c*) A tiled roof over the filter beds having an area of 5,828 square yards.

(*d*) Direct communication between the supply main and the filter beds.

(*e*) Direct communication between the distribution main and the storage chamber under the filter beds.

(*f*) Embankments around the walls of the reservoirs, construction of masonry tanks for washing, filtering materials, diversion of the road and other minor works.

The works have been carried on with great vigour and expedition, and the items from (*b*) to (*f*), both inclusive, have been practically completed.

Shortly after the commencement of the work, some of the bricks brought by the contractors for use in the works of masonry roof proved of inferior quality when subjected to the test, but since then the contractors have made arrangements by which bricks of a satisfactory quality are now supplied.

The following statement gives the cost and details of the work done:—

From the progress made by the contractors up to date, there is good reason to anticipate the completion of the whole work well within contract time.

WATER WORKS DEPARTMENT.—1885-86.

The total rainfall on the gathering ground of the Vehar Lake during the past year was 76·35 inches.

During the previous four years it was as follows :—

59·10	Inches.....	in 1881
54·63	„	„ 1882-83
99·54	„	„ 1883-84
87·65	„	„ 1884-85

The level of the Lake at the commencement of the monsoon was 48·90 feet on the gauge, and at its close 57·60. The level of the waste weir is 59·00 on the gauge. The highest level during the monsoon was 58·10. In 1884-85 it was 48·60 feet at the commencement, and 59·10 at the close of the monsoon.

The total rainfall on the gathering ground of the Tulsi Lake during the past year was 82·57 inches.

During the previous four years it was as follows :—

86·11	Inches.....	in 1881
74·22	„	„ 1882-83
109·46	„	„ 1883-84
94·84	„	„ 1884-85

The level of the Lake at the commencement of the monsoon was 28·70 feet on the gauge, and at its close 47·70. The level of the waste weir is 53·15 on the gauge. The highest level during the monsoon was 49. In 1884-85 it was 30·80 at the commencement and 51·70 at the close of the monsoon.

Attached is a statement of rainfall and height of water in the Lakes for the past year.

There were 2 bursts in the 48″ Vehar main, 1 in the 32″ Vehar main and 5 in 24″ Tulsi main, besides several in the smaller mains.

The following list shows the number of dipping wells, drinking fountains, stand-pipes, &c., in use :—

Wards.	Dipping Wells.	Drinking Fountains.	Stand-Pipes.	Large Ornamental Fountains.	Cattle Troughs.	Total.
A	7	10	3	7	4	31
B	6	4	1	1	7	19
C	7	11	3	1	...	22
D	5	4	1	...	1	11
E	11	17	5	5	3	41
F & G	10	10	11	...	2	33
Total...	46	56	24	14	17	157

All dipping wells, drinking fountains, &c., were cleaned at short intervals.

There were 728 new connections made, and 189 cut off, giving a net increase of 539. In the previous year there were 557 new connections, and 193 cut off, giving a net increase of 364.

The following gives the number of connections in each year from 1881 :—

1881	12,817
1882-83	13,244
1883-84	13,545
1884-85	13,909
1885-86	14,448

The total number of meters in use on the 31st March 1886 was :—

Private Meters.	Government Meters.	Total.
861	107	968

In the previous year there were 715 private and 102 Government meters, making a total of 817.

3,535 Notices were served for repairing leaks, &c. In the previous year the number was 3,641.

WATER WORKS.

LOAN WORKS REPORT.

IRON-WORK FOR THE NEW 24″ MAIN FROM VIHAR.

The iron-work for the 24″ main from Bombay to Vihar, and for enlargement of mains in different parts of the city was supplied by Messrs. D. Y. Stewart & Co., of Glasgow, their Agents in Bombay being Messrs. Wallace & Co. The contractors carried out their contract in the most exemplary manner in all respects, and the material supplied has been of the best possible description.

THE LAYING OF THE NEW 24″ MAIN FROM VIHAR.

The laying the new 24″ main from Vihar to Bombay was done by Messrs. Cawasjee Sorabjee Bhedwar & Co. The time given for the completion of the entire work was up to 30th April 1886, but the pipe-laying work was entirely completed, and water admitted into the main on the 5th April.

The contractors carried out their work in a most exceptional manner.

FILTER BEDS AT VIHAR.

The contract for the construction of the filter beds at Vihar was given to Messrs. Jeewanjee Dhunjeebhoy and Mohunlall Bechardas; the time for completion was up to 30th April 1886. The work has been practically completed.

RAISING OF THE DAMS AND WASTE WEIR AT TULSI.

The work of raising the Tulsi Lake dams and waste weir was given to Messrs. Fakir Mahomed Babanbhoy & Co., the time for completion was up to 20th May 1885. The work is almost completed.

CATCH-WATER CHANNELS AT VIHAR AND TULSI.

The work of the catch-water channels at Vihar and Tulsi was entirely completed on the 15th of April 1886. The time for completion was up to 31st May 1885. The contractor, Tookaram Wittoo, having failed to do the work in time, it was done departmentally at his risk and expense.

The undermentioned works sanctioned under Municipal Corporation Resolution No. 438 of 16th May 1883, have all been completed with the exception of the Health Department's Bullock Stables at Boree Bandar, which are in progress:—

1. Check meters for prevention of waste of water permanently affixed to mains.
2. New hydrants.
3. Enlarging mains in Vihar District.
4. Enlarging main from Baba Dhubu Street to Bhuleshwar Road.
5. Enlarging mains in Tulsi District.
6. Abolishing dead ends in 3″ branch mains.
7. Construction of a double-storied chawl at water works stores for the water works staff, consisting of 51 rooms and quarters for the Superintendent.

BHANDARWADA WATER WORKS.

In respect to Messrs. Ellapa Ballaram and Company's claim for the Bhandarwada Water Works, the Town Council decided as follows :—

No. 1004 of 1885-86.

Town Council Office,

Bombay, 30th September 1885.

To the Municipal Commissioner.

The undersigned has the honor to state that, at the meeting of the Town Council held this day, it was *resolved*—

"That, as recommended by the Municipal Commissioner in his memorandum No. 8264, dated 25th instant, sanction be given to the following terms of settlement with Messrs. Ellapa Balaram and Com-

pany, in respect of all their claims against the Municipality on account of the Bhandarwada Water Works and all other contracts of theirs :—

(1.) 'Rs. 30,000 to be paid in full settlement of all claims in respect of the Bhandarwada Water Works and all other contract undertaken and completed by Messrs. Ellapa Ballaram & Co., up to date, 30th September 1885

"(2.) Also to payment of the following sums :—

	Rs.	a.	p.
(*a.*) Amount due under the award of Mr. Wilson Bell, already sanctioned by the Council in their Resolution No.403, dated 17th June 1885.....	21,600	0	0
(*b.*) Amount admitted by Mr. Crawford to be due before proceeding with the Arbitration	1,200	0	0
(*c.*) Amount of last bill on account of Bhandarwada Water Works Contract.....	6,176	6	7
Total...Rs.	28,976	6	7

(3.) 'That the Municipality waive all their claims against Messrs. Ellapa Ballaram, in respect of Rs. 7,000 (seven thousand) on account of extra establishment charges.'

(4.) 'That Messrs. Ellapa Ballaram accept, as already agreed to by them, Rs. 30,000 (thirty thousand) and Rs. 21,500 (twenty-one thousand, five hundred) out of the above mentioned sums in 5 per cent. Municipal Bonds of 40 years at par.' "

(Sd.) H. W. BARROW,

Secretary, Town Council.

As the accounts of some of these works have not been finally adjusted in consequence of their not been entirely completed, the detailed accounts of all these Loan works will, therefore, form a subject for the next year's report.

DEACON'S METERS.

In July last, the readings of meters were taken commencing from the north of Nesbit Road, Byculla up to Sion.

From September 1885, the readings in Camatipoora and the whole of Nagpada Districts were commenced, notices were served for preventing the wastage of water and effecting repairs to the service-pipes and fittings, thus bringing in Camatipoora district alone the saving of 6,800 gallons per hour.

The waste water prevention establishment was transferred direct to the Superintendent of Water Works in February last, since which time the work of taking census of the inhabitants (controlled by each meter) has been proceeded with, at the same time inspecting all water fittings, and issuing notices for necessary repairs and seeing the same complied with, by which a large saving of water has been effected.

In Loharchawl, the supply of water being scanty in consequence of the bends attached to the main going round the drainage manholes along the whole length of the street, the bends were removed and the pipes laid straight; and the meter now registers treble the quantity of water as compared with previous readings.

LIST OF STREETS WHERE DEACON'S METERS HAVE BEEN FIXED TO THE MAINS.

6" Karsetji Suklaji Street.
4" Karsetji Suklaji Street.
4" New Foras Road on the 4" main in 11th Kamatipura Street.

(3) ROADS, BUILDINGS, AND LIGHTING.

ROAD DEPARTMENT.

The amount sanctioned under the head of Road Repairs was Rs. 2,96,616. Of this sum, Rs. 30,000 was apportioned for paving footpaths (detailed further on), and Rs. 13,780 for road scraping, leaving an available balance of Rs. 2,52,836 for actual repairs to roads.

The following footpaths were paved with blue stones :—

	Sq. feet.
Parel Road (Bhendy Bazaar)—east side footpath between Imamwada and Babula Tank Road	10,564
Parel Road (Bhendy Bazaar)—west side footpath between Erskine and Grant Roads	12,057
Parel Road (Bhendy Bazaar)—from J. J. Hospital to Bellasis Junction Road, on both sides	16,612
New Byculla Bridge footpaths, both sides	15,145
Total Sq. Feet...	54,378

TRAMWAYS.

No new line of Tramway was added, except the substitution of double tract in place of single one on Bhendy Bazaar, Parel Road, between Banian and Dharamsey Streets, admeasuring 1,472 r. ft.

ROAD WATERING AND SCRAPING.

The watering by carts, as in previous years, was carried out departmentally at a cost of Rs. 47,810. Those roads watered by bhisties have been, as before, carried out by contract at a total expenditure of Rs. 10,044. The contractors were Messrs. Ramchunder Rajnana and Co.

The expenditure on road scraping has been Rs. 12,557.

NEW ROADS.

The following important roads were constructed and thrown open for traffic during the year :—

Widening Haines Road (Byculla Bridge).

Ripon Road.—Commencing from the junction of Duncan, Bellasis, and Clare Roads, and ending at the central station on the Flats as the junction of Clerk, Haines, and Arthur Roads. Its length is 4,950 feet and width 50 feet.

Churney Road extension to Falkland Road.

Fergusson Road.—Commencing from near the Baroda Railway Parel Station on DeLisle Road, and ending at the junction of Worli and Haines Roads. Its length is 4,770 feet × 40 feet.

Improvement of Gunbot Street, Fort.

Reservoir Road—is a cross-road, 490 feet in length and 30 feet in width, running between Belvidere Hill Road and Waree Bundar.

Mamadevie.—Connecting Keeka Street with Masjid Bundar Cross Road.

Filling in a portion of Cavasjee Patel Tank for the purpose of widening the Cavasjee Patel Tank Road to 60 feet.

Purchase of ground for the new cemetery at junction of Haines and Worli Road.

BUILDING DEPARTMENT.

The number of applications for permission to build and rebuild during the year under report amounted to 1,189.

Permission to repair was granted in the case of 278 houses.

338 Notices for pulling down houses and ruinous portions of houses, and 30 notices requiring the carrying out of repairs to houses, were issued.

272 Orders were issued to Inspectors for the removal of ruinous houses in whole or in part; 90 were executed by them, while no action was taken in the remaining 182 cases, as the owners themselves complied with the notices.

302 Orders were issued for removing door-shutters, opening outwards, projection encroachments, and other objectionable constructions made without permission. Of these, 118 were executed by the Building Department, and the remainder by the parties themselves.

89 Removal orders were issued for the pulling down of new huts built without the permission of the Municipal Commissioner and contrary to the rules and regulations in force: all of these were executed by the Building Department.

As regards dangerous houses, compound walls, &c., coming under section 200 of the Municipal Act, there were 37 cases during the year, of which 33 were trifling and 4 of a serious nature. In one of these, 24 persons were killed and 16 slightly injured.

The attached Statement A gives the whole of the above-mentioned cases in detail.

The following is the list of Notices and Removal Orders issued by the Building Department:—

1	Notices for	removing inflammable materials	562
2	Do.	pulling down ruinous houses	338
3	Do.	repairing houses	30
4	Do.	forwarding plans	597
5	Do.	for building privies without permission	48
6	Do.	removing buildings erected contrary to sanctioned plans	49
7	Do.	fencing and enclosing wells, tanks, and dangerous places	15
8	Do.	removing old projections	115
9	Do.	removing new projections	536
10	Do.	removing door-shutters which opened on to the public roads	104
11	Do.	for payment of Municipal fees	616
12	Do.	levelling and metalling private streets	374
13	Do.	cutting and trimming trees	35
14	Do.	building sheds contrary to Municipal Bye-laws	562
15	Do.	providing rain-water troughs and pipes	962
16	Do.	24 hours' notice of entry of houses	995
17	Do.	removing temporary projections	890
18	Do.	Removal orders for pulling down ruinous houses, privy door benches, and other encroachments	995
19	Do.	Removal orders for pulling down objectionable huts	21
20	Do.	fixing telephone brackets to buildings	4
		Total ...	7,848

The number of summonses issued for different offences committed under the Act were 2,218. In 1,572 of these the parties complied before service, convictions were obtained in 644 cases, and 2 were dismissed by the Magistrates. In 503 of these the parties were warned and then discharged by the Magistrate on account of their complying with the requirements of the Municipality immediately after the service of the summonses. In the remaining 141 cases, the parties were fined.

The Statement marked **B** shows in detail the different sections of the Municipal Acts under which the offenders were prosecuted.

The total amount of fines inflicted was Rs. 252.

The amount allowed for Street Imrpovement was Rs. 49,291-12-4.

The total amount expended was Rs. 42,365-4-1.

Statement marked **C** shows the locality and area of each plot ; and Statement **D** those cases in which compensation according to the rates approved by the Town Council has been paid. Statement **E** is a list of sales of plots of ground belonging to the Corporation. Statements marked **F** 1 to **F** 7, show the ground taken up in each separate ward, and actually added to streets during the year under report.

PROSECUTIONS AND CONVICTIONS.

There were two cases, one of assault, and the other of theft, in which prosecutions were made at the instance of the Superintendent of Workshops. The assault case was in connection with the Love Grove sluice gates. The sluice men there were assaulted by four Musalmans. One of these was discharged as there was no evidence against him, and out of the remaining three, one was fined Rs. 15, and the two Rs. 3 each. The case of theft was in connection with the Workshops. A brass moulder was detected in stealing away a little scrap of copper from the works. He was convicted and sentenced to one month's rigorous imprisonment.

A.

STATEMENT showing the number of houses which fell, or partially fell, down during the year 1885-86.

No.	Names of House-owners.	Locality.	No. of Houses.	Particulars.	Date of Accident.	Casualties.		Remarks.
						Killed.	Injured.	
1	Keshavji Jadowji	Essaji Street	73/77	A small portion of the rear wall of the 1st and 2nd storey fell down	1885 16th July	...	...	
2	Chimnaji Rajbhoy.....	Old Nagpada.....	515	A small portion of the masonry wall, about 5 ft. in width, of the work, west corner of the 1st storey, fell down	20th July	..	...

(4.)—PUBLIC GARDENS AND MUNICIPAL WORKSHOPS.

(1) Public Gardens.

(*a*) Victoria Gardens.

(*b*) Elphinstone Circle Garden.

(*c*) Northbrook Garden.

(*d*) Falkland Road Garden.

(*e*) Sir Cowasjee Jehangir Garden, Mahim.

(*f*) Bazar Gate Garden.

(*a*) VICTORIA GARDENS.

During the year under report, no additions or alterations have been made to these gardens, with the exception of a passage through the deer-park. The portion on the south-east of the garden has been laid out.

2. The roads and paths had the usual attention paid to them as far as the Budget grant would permit.

3. In the Zoological collection, many deaths occurred within a very short space of time, and consequently the matter was subjected to a Police investigation.

4. Many animals, especially some larger carnivora and birds, have been presented during the year, and some common specimens have for want of funds and accommodation been declined.

5. The undermentioned carnivora were presented to the Gardens:—

1 Lioness, presented by His Highness the Nawab of Cambay.

4 Panthers, presented by His Highness the Rajah of Dhurumpore.

Panther and a cub, presented by Major W. Stace.

Lion presented by His Highness the Dewan of Junaghad.

Tiger and a tigress presented by His Highness the Maharajah Holkar.

6. Some animals were received from the zoological collection at Adelaide, and it was proposed to send a few specimen in return; but endeavours made to secure a passage either on payment or free have failed.

7. The amount sanctioned for these gardens including the keep of animals, &c., was ... Rs. 18,942 0 0

While the total Expenditure was ..... „ 19,441 5 1

The amount of income received amounted to „ 7,642 4 4

(*b*) ELPHINSTONE CIRCLE GARDEN.

This garden has been kept in good order during the year and is much frequented. Considerable trouble had been experienced, as during the last year, in keeping people off the grass, and consequently provision has been made in the next year's budget for additional 12 benches. These have been sanctioned, and it is hoped that the nuisance so long complained of will be remedied to a great extent.

The budget grant for the year was	Rs.	1,810	0 0
The expenditure was	„	1,387	8 10
Saving	Rs.	422	7 2

(*c*) NORTHBROOK GARDEN.

This garden has been a source of great comfort to the people living in the vicinity. It is a resort for recreation to them, and it is chiefly crowded with the poorer classes during all the hours of the day.

2. The present strength of the staff is not sufficient to maintain order in the garden and to prevent people from plucking flowers or spoiling the grass.

The budget grant for the year was	Rs.	1,000	0 0
The expenditure was.....	„	835	4 0
Saving	Rs.	164	12 0

(*d*) FALKLAND ROAD GARDEN.

This garden has been kept in good order, as during the last year, regardless of the damage invariably caused to plants or flowers by mill employés.

2. It is very small in area, compared with the wants of the people living in the neighbourhood.

3. I beg to quote here what I said last year about this garden :—

"I am of opinion that the convenience and comfort of the frequenters of this garden would be much better considered if all attempts at keeping it up as a garden were abandoned. I should be inclined to remove the dwarf wall and railing and to substitute posts merely to define the boundary and to keep out cattle and wheel traffic, remove the flower-beds and grass-plots, encourage the growth of umbrageous evergreen trees and place numerous substantial seats about in convenient and shady places."

The grant for the year was	Rs.	290	0 0
The expenditure was	„	286	13 11
Saving	Rs.	3	2 1

(e) SIR KAWASJI JEHANGIR GARDEN.

As regards this garden, I have nothing to say beyond what I stated in my last report.

2. The garden is in a very unsatisfactory state, and it must remain so for want of funds.

The grant for the year was	Rs.	300	0 0
The expenditure was	„	272	10 1
Saving	Rs.	27	5 11

(f) BAZAR GATE GARDEN.

This garden has been well attended to during the year and has been largely frequented.

2. An additional mallee having been sanctioned, the garden can now be kept open until a late hour at night, and the object so long desired by the persons living in the vicinity has thus been gained.

The grant for the year was	Rs.	844	0 0
The expenditure was	„	787	14 6
Saving	Rs.	56	1 6

(2) THE MUNICIPAL WORKSHOPS.

This Department has, during the year under report, turned out work to the amount of Rs. 2,19,868-14-7, which is more by Rs. 66,255-14-7 than that reported in the last Administration Report. The increase is, to a great extent, though not wholly, attributable to our having undertaken works for Government during the year for operations on the North-Western Frontier. The total amount of work done on account of Government has been Rs. 44,972-0-9, and

the remaining increase, *viz.*, Rs. 21,283-13-10 has been in our departmental works.

The net profit on our departmental works has been Rs. 9,864-11-10, which, with the profit of Rs. 5,865-14-8 on Government works, and with due sale proceeds of Rs. 634-6-1 on account of scrap-iron, &c., sold as unserviceable materials at the end of the year, amounts to Rs. 16,365-0-7.

The gross earnings of the shops during the year have been Rs. 25,369-0-2, from which the amount of Rs. 9,003-15-7 has been paid as per details shown below. Thus the net profit to the credit of the Workshops at the end of the year has been Rs. 16,365-0-7 against Rs. 1,904 of the previous year.

1	Repairs to machinery (Workshop's)				Rs.	3,232	8 1
2	Making and repairing tools (Workshop's)				„	1,536	3 3
3	Belting copper rivets, &c.				„	1,259	3 4
4	Cleaning and repairing Workshop engine and boilers				„	1,363	5 5
5	Maintenance of Workshop's steam pumping engine				„	285	1 7
6	Repairs to vertical engine				„	41	2 3
	2 Screw jacks	Rs.	220	0 0			
	2 Patent emery wheel girders	„	470	0 0			
	1 Vertical engine and boiler	„	540	0 0			
					„	1,230	0 0
1	Small room constructed for the Workshop's Telephone instrument				„	56	7 8
					Total.., Rs.	9,003	15 7

The following works were done for Government:—

500	Pack saddles for camels.
200	Labour carts.
200	Grease boxes for carts.
13	Hay presses.
13	Tool boxes with tools and dup'icate parts.
100	Field service barrows of Col. Phelps' pattern.
13	Hay presses packed.
9	Spring balances repaired.
1	Field service barrow repaired.

The above work, I am happy to say, the Superintendent of Municipal Workshops has been able to push through very satisfactorily with the excellent staff and machinery at his disposal. It was carried on night and day as rapidly as possible, as it was urgently required for despatch by the Commissariat Depatment ; so much so that 500 pack saddles were completed within one week, 200 labour carts in 2 weeks, 13 hay presses in 13 days, and the 100 field service barrows in 2 weeks.

The whole of the work has been carried out without in any way impairing the efficiency of our departmental works during the time it was in progress, which proves what our works are actually capable of turning out of them if put to the test.

The principal important works done by these shops for the different Departments of the Municipality during the year comprised the following :—

		Rs.	a.	p.
14	Drain carts	2,100	0	0
17	Night-soil carts	4,250	0	0
10	Dust-bin carts	1,000	0	0
12	Round water carts	2,640	0	0
55	Standard pattern urinals, complete, with timber work.	4,125	0	0
1	Inlet pipe 48″ for the Tulsi Outlet Twer, with brass seating and bolts, &c., fitted to it	878	14	0
1	Kutchra-burning furnace, iron fitting, for Love Grove	1,150	9	3
2	Double penstocks for M. H. Reservoir	1,738	13	10
15	Filter bed valves for do.	4,606	1	2
1	Triple penstock for do.	3,083	13	0
25	Iron tanks, 4′ by 4′ by 4′ for road watering purposes	1,875	0	0
2	Cast-iron tanks, large, made, fitted and erected at Arthur Crawford Markets	2,178	9	4
	Iron rails turn-tables laid down at Bhandarwada Hill Reservoir with iron trucks	3,333	1	9
6	New doors for filter bed sluices of Bhandarwada and widening them	1,292	11	10
1	Workshops weigh-bridge erected at the Stores Yard	530	4	1
280	Tulsi hydrants converted	2,800	0	0
1	Latrine, 10-seated, made and erected at Carnac Bridge	3,311	15	7
6	Flushing carts, iron, large, on four wheels	2,280	0	0

The boilers, engine, and the machinery have done good work during the past year without any break down or stoppages whatever, although they have been kept working day and night at times without stopping, except during meal-hours.

During the year two screw-jacks and a vertical engine and boiler, which was purchased in the Municipal auction sale of unserviceable stores and which stood on the Stores book, were purchased from Stores and paid from the profits. Also two patent emery wheel-grinders were purchased from their patentees and paid from the profits. All these three items have been, as usual, incorporated in the Stock Return of this Department.

The Iron Foundry has turned out 6,729 cwts. (336 tons) of iron castings during the year against 3,385 cwts. during the previous year. This year it has worked at a profit of Rs. 1,772-12-9 against the loss of Rs. 8,283 during the preceding year.

With regard to the Brass Foundry, it has worked well at a profit, though it has been less than that of the previous year. The total castings turned out during the year is 96 cwts. 1 qr. 21 lbs., and the profit made amounts to Rs. 678-13-4 against Rs. 1,500 of the previous year.

I have the honour to be,
Sir,
Your most obedient Servant,
RIENZI WALTON,
Executive Engineer, Municipality.

No. 49 OF 1886.

From

THE SECRETARY AND CURATOR,
Victoria and Albert Museum, Bombay,

To

THE MUNICIPAL COMMISSIONER
for the City of Bombay.

BOMBAY, 25*th May* 1886.

SIR,

I have the honour to submit the following report on the Victoria and Albert Museum for the year ending the 31st March 1886.

It is fitting that as this is the first report I have the honour of submitting since the transference of the Museum to the Municipality, I should make the report something more than a simple record of the work of the past year, and that I should endeavour to give an account of the Museum as it is at present, and the lines on which we have been recently working and on which we hope in future to work. For some years after the completion of the present building, the articles exhibited consisted of the Bombay products—seeds, oils, drugs, dyes, food-stuffs, narcotics, &c.—with some minerals and a few pieces of old armour and similar articles, which were presented to the Museum after the exhibition held in the building in 1873. Government allowed only Rs. 500 a year to cover incidental and other expenses, so that it was impossible out of so small a sum to do anything to make the Museum more worthy of its name. In 1880, from a grant of money presented to the Museum by the Maharajah of Travancore, I recommended the purchase of a collection of bird-skins from the Revd. S. B. Fairbank, D.D., the well-known naturalist; and soon after Government agreed to this purchase, the Museum received the very handsome gift of a collection of bird-skins from Surgeon-Major J. Armstrong. This made a beginning, and this collection has been gradually added to. When working for the International Fisheries Exhibition and one or two other exhibitions, we were able, at comparatively small cost to ourselves, to secure specimens of fishes, agricultural implements, and models, and to renew many of the raw products which had become old and often decomposed. This expense we were the more able to overtake since Government made a grant of Rs. 100 per mensem for specimens and Rs. 50 per mensem for cases, and during the last year or two this grant has been an annual one. For more than a year there have also been attached to the staff of the Museum a stuffer and a skinner, and these men are now becoming expert at their work, although they are defective in the

delicate handling necessary for the setting, &c., of insects. This however is not easily or quickly acquired, and consequently, when at such work, constant supervision and teaching are still necessary.

During the vacations I have from time to time collected birds and insects, especially *Lepidoptera* (butterflies and moths), and for some years this was the only source from which additions were made to the birds collected, and a nucleus made for an insect collection.

The various collections made for the London Fisheries Exhibition, the Amsterdam, Calcutta, and Antwerp Exhibitions, all received special recognition. At the London Fisheries Exhibition, one gold and two bronze medals were awarded, whilst the Government of India presented me with one of the gold medals received by them for the collection of fishing-nets made by me for the Fisheries Exhibition. A silver medal and a bronze medal were awarded at the Calcutta Exhibition, and a gold medal and a bronze medal at the Amsterdam Exhibition, &c.

Before giving a summarised account of the contents of the Museum and the work of the past year, I may here refer to one or two suggestions which I wish to make. I think that one or two aquaria, salt and fresh water, might be formed in the Museum. Many of the crustaceans and other marine animals live and thrive in aquaria, and in Bombay many of these could be easily procured: the chief cost that would have to be faced would be the initial one incurred in making the aquaria. The visitors to the Museum, as well as to the gardens, take great delight in observing the movements of living creatures, as has been evident in the Museum when we had live specimens of snakes, lizards, and other animals to exhibit; but an aquarium would be to them so new and strange that I feel certain that it would not only excite wonder in many but would give pleasure to all.

Then, with regard to the hours during which the Museum is open to the public, I think that were gas introduced, the building might be opened to the public at night, say, two or three days in the week. As to the question of opening the Museum on Sunday, I may mention that in Calcutta, where the Sunday opening has been adopted, the Museum is closed to the public during *two* of the other days of the week. And although two days might be regarded as excessive here, it might be considered whether one day in the week might not be allowed to the members of the staff, whose presence would be necessary on Sunday were the Museum opened on that day.

Government has recently manifested a willingness to give every encouragement to the desire and the suggestions so often expressed, both in annual as well as in special reports, as to the desirability of increasing the active operations in and out of the Museum. This has been shown, both by the recent appointment of a stuffer and a skinner to the Museum, as well as by the grant of Rs. 100 a month for

natural history specimens. These appointments, as well as the grant, have already made a considerable alteration in the Museum natural history collections; and when all the specimens are properly arranged and named, the large empty-looking hall and gallery in the Museum will look much less empty than they have done since the Museum was opened.

I would strongly urge the advisability of increasing these active operations. Much of the collecting has been done during the vacations, either by myself alone, or latterly with the assistance of the stuffer and the skinner, whilst Mr. Dixon is now not only collecting insects as opportunity offers, but is rapidly acquiring the art of setting them. I think that much more might be done in the way of collecting specimens. It is true it is necessary to have the various cases and presses, as well as the specimens, frequently examined and cleaned, and precautions taken to guard against the inroads of minute insects, which would otherwise very soon render the specimens worthless. But I think Mr. Dixon might be spared occasionally for a short time to go to different places, with the two men on the staff, to do collecting work. Certain places, in certain seasons of the year, are better suited for collecting than others, and although in this way many might be duplicate specimens, yet these could be used in exchanges. There is little doubt that much and better work can be accomplished when the two men are under intelligent, scientific guidance of this kind than is possible by sending out the men together or singly, for they are not quite fitted to undertake the more delicate work of preserving and setting up some kinds of insects and other specimens of natural history. Mr. E. H. Aitken, an authority in matters of this kind, recently informed me that the skinner who was partially trained by us at the Museum for the Natural History Society early last year, and who has since received special training and teaching from Mr. Aitken himself, fails in some respects in regard to the setting up of butterflies and moths. This tallies to some extent with our own experience, but the younger man, although far from perfect, is acquiring something of the sort of *tactus eruditus* necessary in handling the scaly-winged insects. Still however it is necessary, both in his case and in that of the other man, to direct them in work of this kind, or else to do the more difficult work; and this could be done by Mr. Dixon.

I would further suggest that we commence to make exchanges with other museums or private individuals. A short time ago I received from California an invitation to make exchanges in shells: others have been received at different times for New Zealand, Australia, and other places, which at the time we could not entertain. But we are in a better position now, and once the thing is started, we shall have quite enough to do to keep up with the demand.

Having given in brief a sketch of the history of the Museum during the last few years, and added a few suggestions, I now go on

to the consideration of the various collections and articles in the Museum, and it may be convenient to classify them as follows :—

DIVISION I.—*Natural History.*

Department 1.—Mammals.
" 2.—Birds.
" 3.—Reptiles and Batrachians.
" 4.—Fishes and Crustaceans.
" 5.—Insects.
" 6.—Corals and Shells.
" 7.—Minerals, Ores, and Rocks.
" 8.—Fossils.
" 9.—Botany.

DIVISION II.—*Anthropology.*

Department 1.—Art and Industry.
Section A.—Ethnology.
" B.—Art-ware.
" C.—Models.
" D.—Medicinal Drugs.
" E.—Foods and Textiles.
Department 2.—Archæology.

DIVISION III.—*Museum Establishment.*

Department 1.—Assignment of Work.
" 2.—Statistics and Accounts.

DIVISION I.—NATURAL HISTORY.

Department 1.—MAMMALS.

The accessions to the department of mammals during the past year were numerous, varied, and important. These were all secured by purchase. The specimens are as follows :—

Skins.....	9	varieties.
Heads	10	"
Skulls with horns.....	32	"
Osteological specimens...	Skeleton of an elephant.	

The most noteworthy among these perhaps are the heads of the Cashmere sambhar, the heads and skulls of the markhor deer from the Himalayas, the skin and head of the musk deer, and the skull of a sheep (hybrid between *Ovis hodgsoni* and *Ovis vignei*) from Thibet, and the skeleton of an elephant from Mysore, the bones of which are not properly cured. These will have to undergo thorough maceration before they are fit for mounting. The heads and skins, along with osteological specimens, are being treated with preservatives before being set up for exhibition.

The present collection in the department approximately consists of 13 specimens of larger and smaller mammals, mounted in England and India, 30 stuffed specimens of smaller mammals, 10 heads, 55 skulls with and without horns, 8 pairs of horns, 17 skins, and 18 osteological specimens, making a total of 151 specimens. The mounted specimens require to be frequently treated with preservatives.

Department 2.—BIRDS.

In the department of birds, the work of the year has been chiefly confined to the laboratory. The larger specimens were put in an arsenical bath to render them secure from the attacks of insects. The smaller birds were treated with less powerful insecticides. There has been however much important work done in the thorough overhauling of the collection. The re-arrangement of the specimens is not yet finished. The whole of the collection of bird-skins was formerly exhibited in sloping cases. An attempt has been made to stuff some of the specimens and fix them on simple perches, as is done in the Calcutta Museum. Mr. Dixon, who has spent considerable time in this work, has even attempted, in some cases, to fix the birds in a natural position, either flying or perching. More than a hundred bird-skins have been mounted in this way. This is decidedly an improvement, and will no doubt show the collection of birds to better advantage.

Accessions to the department are 20 varieties of birds from Khandalla collected by the stuffer and the skinner, and by gift one emu and one wild goose from the Superintendent, Victoria Gardens.

The collection at present consists of 115 birds mounted in the cases received from England, 126 mounted at the Museum, and nearly 900 unmounted specimens, making a total of 1,141 specimens.

Department 3.—REPTILES AND BATRACHIANS.

Excepting the fishes, this department is perhaps the most difficult to manage in the Museum, as the specimens are kept in spirit. Much work in this department has been done during the year in the complete overhauling and re-arrangement of the whole of the collection.

Accessions to the department by purchase are as follows :—

Naga tripudians (Var.)	.....	from Surat.
Do.	(„)	„ Daman.
Do.	(„)	„ Kalyan.
Ptyas mucosus	.....	Poona.
Do.	.....	Matheran.
Do.	.....	Do.
Do.	.....	Thana.
Do.	.....	Kalyan.
Do.	.....	Bombay.
Zamenis fasciolatus	.....	Alibag.
Do.	.....	Matheran.
Do.	.....	Bombay.
Gongylophus conicus	.....	Khandalla.
Do.	.....	Alibag.
Do.	.....	Kalyan.
Tropidonotus quincunciatus...	(pair)	Bombay.
Do.	..... („)	Tulsi.
Do.	..... („)	Bombay.
Passerita mycterizans	.....	Matheran.
Python molurus	.....	Mahableshwar.
Uromastix hardwickii	..... (12)	Ahmedabad.

Accession by gift, *Varanus dracœna*, from Thana by J. MacDonald, Esq.

The cobras have been preserved in spirit, their hoods fully expanded, with the fangs shown to advantage. Excepting the cobras, most of the other specimens are living and have excited the interest of the visitors. For want of bottles, a large number of the specimens is kept in storage for the present.

Two skeletons of bull-frogs have been macerated, prepared, and mounted during the year.

The present collection in this department consists of 130 specimens preserved in spirit, 5 stuffed, and 30 living specimens, making a total of 165 specimens.

Department 4.—FISHES AND CRUSTACEANS.

The alcoholic section of this department has been partially overhauled; but a greater portion of the work has been, for the present, postponed, until we get a fresh supply of bottles from Europe.

In the section of stuffed fishes and crustaceans, all the specimens have been thoroughly cleaned, treated with preservatives, and re-arranged. The department of fishes requires to be frequently overhauled, as the specimens are liable to be spoilt by damp and attacked by insects in a comparatively short time. There have been no accessions of importance to the department.

The present collection in this department consists of 60 specimens of fresh-water fishes preserved in spirit, 14 marine specimens preserved in spirit, 280 fishes stuffed from Zanzibar, illustrative of Dr. Playfair's work, 320 specimens of stuffed fishes from Bombay, and 20 stuffed crustaceans, making a total of 694 specimens.

Stuffing is on the whole an unsatisfactory method, and we propose during the ensuing year to preserve in spirits the specimens we may obtain.

Department 5.—INSECTS.

No attempt was ever made to commence a collection of insects for the Museum until two or three years ago; and considering the shortness of time since it was commenced, and how few the opportunities are of collecting specimens, the present collection is creditable.

For convenience, the department of insects may be divided into two sections:—

Section A.—*Lepidoptera* (butterflies and moths).

,, B.—*Coleoptera* (beetles and other insects).

In Section A there are 350 specimens collected by myself in Bombay, Khandalla, Mahableshwar, Matheran, and other places, and 240 specimens since the stuffer and the skinner joined the Museum staff.

In Section B there are 300 specimens collected at Surat, Thana, Nasik, and other places by Mr. Dixon, and 220 specimens from Thana, Kalyan, and Khandalla by the stuffer and the skinner. This makes a total of about 1,200 insects.

The entomological collection requires a more systematic arrangement and to have imperfect specimens eliminated. They are very liable to be attacked by minute insects, and some of the specimens lose their antennæ, or have their bodies eaten or wings broken, and are thus rendered useless. Frequent examination of the specimens is necessary, and use of preservatives when the slightest sign is visible of the presence of the insects which work so much mischief.

Department 6.—CORALS AND SHELLS.

In this department, during the year, all the specimens of corals and shells were thoroughly cleaned and re-arranged. The accessions to the collection by purchase are 15 specimens of corals and 10 varieties of shells. The present collection consists of 150 specimens of corals and over 1,000 varieties of shells—land, estuarine, and marine. What is required in this department is suitable cases to exhibit this valuable collection to advantage.

Department 7.—MINERALS, ORES, AND ROCKS.

Accessions to the collection by gift are six samples of Indian salt and coal from Pind-dader-Khan Mines, Punjab, by R. J. Ines, Esq., C.E., and pumice-stone from the Straits of Sunda, Java, by Colonel Rivett-Carnac, Bombay Army. The collection in this department consists of 1,500 specimens of minerals, ores, rocks, agates, &c.

Department 8.—FOSSILS.

The collection in this department is so small and unimportant that it need hardly have been made separate from the department of minerals, ores, and rocks. It consists of 70 specimens of animal and vegetable fossils.

Department 9.—BOTANY.

This department at present consists of 150 samples of the longitudinal and transverse sections of the stems and trunks of trees, showing the internal arrangement of the growth of the wood in different plants. It is a matter of great regret that the Museum has no collection of recent plants to keep up the name of the department even nominally.

DIVISION I.—ANTHROPOLOGY.

Department 1.—ART AND INDUSTRY.

Section A.—*Ethnology.*

In the section of ethnology are included casts in plaster-of-Paris of the heads of some of the hilly tribes of India; brass ornaments worn by the aboriginal tribes; figures in papier-maché of most of the various castes and communities living in the presidency; figures representing various scenes, *e.g.*, procession of a native rajah, a Hindu caste dinner, &c.; life-size figures of native warriors and boys; cannon, armour, shields, swords, and other weapons of various description. The present collection in this section may be estimated at about 400 specimens.

Section B.—*Art-ware.*

In the section of art-ware are included specimens of Ahmedabad and Surat kinkobs; sarees and silk cloths from Surat, Poona, and Yeola; dhotees and uparnis, with silk borders, from Ahmedabad; samples of native turbans from Yeola; embroidered table-cloths and pillow-cases from Sind; samples of silk cloths from Thana; carpets from Poona, Belgaum, and Karachi; silver jewellery from Kutch, Surat, Bombay, and Aden; imitation jewellery from Bombay and Poona; imitation fruits and figures of domestic and other animals from Gokak; sandalwood-work from Surat, Bombay, and Canara; horn-work from Rutnagiri; soapstone-ware from Madras; lacquered-ware from Sind; and pottery and porcelain from England, Allahabad, Baharanpur, and Patan. The present collection in this section numbers about 800 articles, or, including the samples of Thana silks and other cloths, over 900 specimens.

Section C.—*Models.*

In this section are included models of local and foreign agricultural implements, models of native temples, silk-mills, sugarcane and oil-mills, models of native copper and goldsmith's shops in working order, and iron smelting establishment fitted with the necessary implements in working order. The collection in this section at present consists of 125 specimens.

Section D.—*Medicinal Drugs.*

The collection of medicinal substances represents the principal drugs in most of their commercial varieties in present use in the presidency. The whole of the collection requires overhauling and re-arrangement. No accessions of importance have been made to this section during the year. The present collection of medicinal substances—animal, vegetable, and mineral—amounts to nearly 400 specimens. Considering the importance attached to drugs, the collection of medicinal substances should be made as full as practicable. The collection of Indian drugs and economic products made by the Government of Bombay, in conjunction with the Government of India, for the London and Colonial Exhibition, when returned as promised in Government Resolution No. 3647 of the 6th October 1884, General Department, will, it is hoped, put this important section on a proper footing.

Section E.—*Foods and Textiles.*

The collection in this section has been partly revised, and the re-arrangement of the collection according to the natural orders of the food-stuffs will require some time yet. The present collection in this section consists of about 800 specimens of foods. Besides these, there are a 100 specimens of dyes and mordants used by the natives. There are also 150 specimens of oils and oil-seeds. In the collection of fibres and textiles, there are over 200 specimens exhibited, including 92 specimens of cotton, thus making a total

of 1,342 specimens in the collection. In addition to this, there are some models of spinning and weaving machinery.

Department 2.—ARCHÆOLOGY.

This department consists of stones, sculptures, and plaster-of-Paris casts representing Indian mythology; brass and clay figures representing the gods and goddesses of Indian mythology; utensils and appliances of Hindu religious worship; carved wood-work used in native buildings from Nasik, and stone implements used for various purposes. Accessions to the department during the year by presentation, 88 pieces of sculpture from the Punjab by Major Cole, as per Government Resolution No. 1870 of the 31st May 1884 in the General Department. The present collection in the department amounts to nearly 500 specimens.

DIVISION III.—MUSEUM ESTABLISHMENT.

Department 1.—ASSIGNMENT OF WORK.

The most important event under this heading is the transfer of the Museum to the Municipality, as per Government Resolution No. 3287 of the 29th August 1885 in the General Department. It is hoped under the Municipality every effort will be made for the improvement of the various collections in the Museum. The staff is a very small one as compared with the Calcutta or Madras Museum.

In the beginning of the year, Mr. R. M. Dixon, the Office Assistant, was deputed by the Government of Bombay to proceed to Calcutta to assist in the collection of medicinal drugs and raw products which was being made there under the orders of the Government of India, as per Government Resolution No. 1044 of the 21st March 1885, General Department. During Mr. Dixon's absence at Calcutta, Mr. H. M. Mackwana was appointed *sub. protem.* Office Assistant. Mr. Mackwana continued in office for over two months. Though new to Museum work, Mr. Mackwana discharged his duties in such a way as to give entire satisfaction. Mr. Dixon has charge of the Museum during my absence. Having studied the natural sciences for the degree examinations, which he successfully passed, Mr. Dixon is enabled to apply practically the theoretical knowledge thus acquired; and in addition to the clerical work of the office, he has during the past year superintended much of the work of the stuffer and the skinner, and has made a fairly successful attempt to stuff some of the bird-skins in a natural position, and personally made a collection of insects, which has been added to the Museum collection as above referred to.

During the year the Museum lost the services of Mr. Shapurji Pestonji, the Museum Assistant, who died in June 1885. Mr. Shapurjee rendered useful services to the Museum for a period of twenty-five years.

The vacancy caused by Mr. Shapurji's death was filled by Mr. Kharshedji Jivanji Mistri. Mr. Kharshedji has been keeping the record of the number of visitors at the Museum. He has also assisted in the removing and re-arranging of specimens for general

overhauling purposes. I intend to extend the duties of the Museum Assistant and to train him to take charge of the entomological work, as far as possible, consistently with his other duties.

The stuffer and the skinner have been frequently sent on excursions to collect birds, insects, &c. Among the places visited by them were Karjat, Khandalla, Mahableshwar, Alibag, and Sawantwari. Much of their work, when engaged in the Museum, has been confined to the laboratory work—cleaning, arranging, stuffing, and mounting. The delicate handling required in the setting up of insects, especially the *Lepidoptera*, is still lacking; but there has been considerable improvement made in this respect during the past year.

Department 2.—STATISTICS AND ACCOUNTS.

During the year under review the Museum was open to the public for 293 days, the total number of visitors being 699,016, showing a daily average attendance of 2,385.

A special grant of Rs. 1,200 was sanctioned by Government for the collection of the art-ware of the presidency, as per Government Resolution No. 3927 of the 15th October 1885 in the General Department; and an equal amount was given by the Municipality for the same purpose; but as these grants were finally sanctioned a little before the close of the year, most of the district collections have not yet come to hand.

Owing to the transfer of the Museum to the Municipality in the middle of the financial year, the grants for natural history specimens and cases have not yet been paid in full. A detailed statement, showing how the annual and special grants have been utilized, will be submitted later on.

Desideratum—Scientific books of reference are urgently required. Excepting "Day's Fishes of India" and two or three other books of secondary importance, there are no books of reference in the Museum. The identification and classification of natural history specimens can never be satisfactorily accomplished without works of reference; and I trust that the Municipal Commissioner may see his way to recommend a special grant for the purchase of some of the books most urgently needed.

In conclusion, I beg to express my appreciation of the willingness of the whole staff to do their utmost for the Museum. Mr. Dixon especially has done his best, not only to carry out all instructions, and superintend the work of the others without personal friction, but has endeavoured to animate them with the zeal and enthusiasm with which he enters on scientific work. As his experience increases yearly, his services become more valuable and his work more efficient.

I have the honour to be,

SIR,

Your most obedient servant,

D. MACDONALD, M.D.,

Secretary and Curator.

The following tables, **A**, **B**, and **C**, show how the annual and special grants have been utilized :—

A.

	Rs.	a.	p.
Natural History Specimens from Cashmere ...	352	0	0
Travelling and Batta Allowances to Stuffer and Skinner.	104	10	0
Heads and Horns from Cashmere, &c.....	135	14	0
Elephant Skeleton from Mysore	136	7	0
Natural History Specimens from Surat, Ahmedabad, and other places.	71	1	0
Fresh supply of Bottles from Germany	400	0	0
Total...Rs.	1,200	0	0

B.

Twenty-five cases for Insects.....	150	0	0
Nine cases for Insects and one for Dattatrya...	65	9	0
One hundred and sixty small Stands for Birds	51	10	0
Two Cabinets for Butterflies.....	132	13	0
Cases for exhibiting Mounted Birds.....	200	0	0
Total...Rs.	600	0	0

C.

(Art-ware grant, Rs. 2,400.)

Art-ware from Satara, Cloths, &c.	180	13	9
Horn-work from Rutnagiri.....	141	8	0
Kinkobs from Ahmedabad	201	0	0
Gokak Figures from Belgaum.....	61	0	0
Silver-work from Ahmednagar	400	0	0
Silk-cloths, &c., from Surat	200	0	0
Austrian *traypla* representing Æneas and Venus in gold painting.	125	0	0
Local Silver-work and other Art-ware Specimens.	260	0	0
Miscellaneous Art-ware Specimens from Cashmere, Jeypore, and other places.	230	10	3
For cases to exhibit the Specimens	600	0	0
Total...Rs.	2,400	0	0

V. & A. MUSEUM:
BOMBAY, 24*th June* 1886.

D. MACDONALD, M. D.,
Secretary and Curator.

TWENTIETH ANNUAL REPORT OF THE HEALTH OFFICER.

MUNICIPAL COMMISSIONER'S OFFICE,
Public Health Department,
BOMBAY, 25*th April* 1886.

From

T. S. WEIR, Surgeon-Major,
Executive Officer of Health,

To

E. C. K. OLLIVANT, ESQ., C.S.,
Municipal Commissioner
for the City of Bombay.

SIR,

I have the honour to submit the Annual Report for 1885.

2. On returning from leave, I took over charge from Dr. Davidson and resumed my duties in the beginning of December.

3. The mortality of the year commenced with a low incidence in January, and, increasing in February, attained its greatest proportions in March and April.

4. The mortality in the two last quarters progressively decreased. While the total deaths are 692 less than in the year before, they are only 58 less than the average deaths of the 5 preceding years. Exclusive of still-born, 21,850 deaths were registered, giving a death-rate of 25·8 per 1,000 of population. The mortality exhibits a high female, but a comparatively low male, death-rate; the preponderance of female mortality is in accordance with the experience of previous years. While the mortality of females is as high as 33·8 to each 1,000 of population, the death-rate of males is only 24·5.

5. The total deaths, the rate of mortality of males and females, and the proportion of male to female deaths in each year from 1881 to 1885 are contrasted in the table following :—

Years.	Total Deaths.	Death-rate.*		Proportion of Male to Female Deaths.
		Males	Females.	
1881	21,856	24·94	33·27	112·97
1882	20,468	23·36	31·14	113·05
1883	23,530	26·62	36·16	119·00
1884	22,542	25·29	34·96	109·01
1885	21,850	24·58	33·80	109·57

6. It must be remembered in appraising the female mortality of this City that the proportion of female children under 1 year of age found in this City in 1881 was a very large one, and exceeded the proportion in London. This excess of female infants must greatly influence the female mortality, and that it does influence it is shown by the excess female mortality in childhood, for, of the total female deaths

* In calculating the death-rate of males and females the increment of population is not calculated.

27 per cent. occurred in the first year of life. The proportion of females, under 1 year and from 1 to 5 years of age, in London, Calcutta and Bombay is shown in the table following, and which has been extracted from my Report on the Census of Bombay taken in 1881 :—

	Under 1 year.	1 to 5 years.
London ...	2·8	9·4
Calcutta ...	2·1	7·5
Bombay ...	3·7	9·6

In the Census Report the increase of the infant population since 1872 and the balance of the sexes in 1881, as contrasted with the population found by the Census of 1872, are thus referred to:—"One of the most remarkable results," it is said, "of this Census is the enormous increase of the infant population. Children under 1 year of age have increased from 11,512 by the Census of 1872 to 22,636 in 1881, or an increase of 96·62 per cent. Between 6 and 12 the population has increased 62·96 per cent." And again in another part of the Report the increase of the female population is referred to as follows :—"Yet the increase of the male population, prosperous and vigorous as this City has been, has not been in proportion and in rapidity equal to the increase of the female population; for instance, the male population has increased 16·27 per cent. and the female 26·05 since 1872; but the most curious fact is that, the proportion of females born in Bombay to total females in 1881 is only 32·62 to 37·92 per cent. in 1872; and I may now mention that the percentage of males in 1881 born in Bombay is 24·54 to 26·98 in 1872. These facts throw some light on the extraordinary increase of the infant population, and show that the immigration—chief disturbing cause in the sex proportion and in other conditions—is not solely an adult male immigration. They indicate the elements now amalgamating into the population; and an annual female immigration, is of obvious social and sanitary import. It is a result which might be expected from easy and quick communication by land and sea. In 1872 in the indigenous population, there were 860 females to each 1,000 males, and in 1881 there are 882 females to 1,000 males; and amongst the immigrant population there were 520 females to 1,000 males in 1872, but in 1881 there are 592 females to 1,000 males."

THE NUMBER OF DEATHS AND RATE OF MORTALITY AT DIFFERENT PERIODS OF LIFE UNDER FIVE YEARS OF AGE.

	Deaths, 1884.	Per 1,000 of Population.	Deaths, 1885.	Per 1,000 of Population.
Under 1 year	6,393	282·42	6,309	278·71
„ 1 to 2 years	1,888	119·53	1,785	113·01
„ 2 to 3 „	762	54·08	770	54·65
„ 3 to 4 „	418	30·54	367	26·81
„ 4 to 5 „	289	18·58	273	17·55
Total...	9,750	119·26	9,504	116·25

7. The important question arises—What is this high infant mortality excited by? The chief causes appear to be—intense concentration of population and fearful room crowding and the pollutions and impurities stifling to infant life of crowded population. When we compare the number of persons to the area of Bombay with the density of the population in London, we find the general pressure of population greater in this City and the pressure fearfully more intense in the districts of most human concentration. The density of population in the most dense section of London is less than the density in any of the 12 most densely-crowded sections of Bombay, representing a population of 429,566, and which have 458·57 persons to each acre. In London the average is about 49 persons to each acre, in Bombay 52; but the extreme pressure in London is 222, whereas in Bombay it rises to 759 persons to an acre. The chances of infant life amidst so much over-crowding are weak. The population of the sections in which the crowding is double that of the most crowded divisions of London is equal to more than 37 per cent. of the total population, but the area of these sections is only 3½ per cent. of the area of the Island; 37 per cent. of the population over 3½ per cent. of the surface. Deducting the space occupied by the 4 suburban sections of Parel, Sewree, Sion and Worlee, the area left for the Urban Sections—the town—amounts to 6,981·64 square acres to a population of 692,336, that is, 99 persons to each acre, or 48·80 square yards, including all open public spaces to each person. The minimum space to each person in the Urban Sections is only 6·37 square yards. As in the Urban Sections are included parade or open recreation grounds, the average space to each person conveys a faint idea of the fearful and appalling compression within the town. The minimum of house population in any one district is apparently higher than the maximum in London. The highest average to a house in any of the smaller towns of this Presidency is about 7 persons; whereas the number of persons to a house in the City of Bombay varies from 12 in Sion to 67 in 2nd Nagpada. The density of the population is very much greater than in Calcutta, although the size of families is a little less. Bombay is, therefore, in a very much more crowded state, and its population in a very much more unfavourable position than in Calcutta. On referring to the Calcutta Report, I find that the maximum density in any one section is 208 persons to an acre, whereas in Bombay the density rises as high as 759 to an acre.

8. The excess of female deaths during the nubile period between 12 and 40 bears nearly the ratio to the male mortality recorded in former years; this excess increases the total female mortality; the influence of the high rate of mortality amongst females during childhood on the total female mortality is not affected, as in the male ratio, by a low mortality in adult life; the female mortality from 12 to 40 is 7·01 per 1000 higher than the male fatality, whereas the total female mortality is 9·22 higher; and it must be remembered

that during the first year of life, the female mortality is 55·86 less than the male.

9. The influences affecting female vitality in this City and diminishing the chances of female life are numerous and in continual operation; the most active are, hard toil—much of which is of a nature specially fatal to womanhood—and the vitality of offspring—on poor nourishment and amidst conditions of air impurity and pollution, over-crowding—within houses and rooms,—and the impurities of over-crowding, and conditions and diseases connected with and arising out of child-birth. These are some of the factors in continual operation, injuring female health and diminishing the chances of female life within this City.

10. It is an important question, as to the degree in which the female mortality is influenced by the early marriages of this country. The evidence appears to indicate that the mortality is not so much directly influenced by early marriage as by conditions which early marriage necessitates amidst certain classes at the present time.

11. While the mortality of male children under 1 year of age is 3 to each 1,000 more than in 1884, the death-rate of females is 11 less; the fatality of both male and female children from 1 to 2 years is less than in 1884. Under 2 years of age the relative ratio of the male and female mortality is in accordance with the proportion of previous years. The total infant deaths under 1 year are 84 less than in the preceding year, and in 1884 they were 188 less than in 1883. The percentage of deaths under 1 year to population of that age is equal to 27·87, and to total deaths 28·87, while the percentage of deaths to births is 42·16, this high ratio of deaths to births is, in a great measure, ascribable to imperfect birth registration.

12. While contrasting the mortality at early periods of life with the fatality in the previous year, it is observed that, whereas the mortality of male children between 2 and 3 years is less, the rate of mortality of females is higher and that a higher female mortality is recorded between 3 to 4 in 1885 than in 1884, but that from 4 to 5 it falls in favour of 1885.

13. It may be noted that from 4 to 5 is the last life period, until 40 is reached, when the mortality of females is less than males. The excess of female mortality above the male death-rate between 12 to 40 amounts to 7·01 per 1000. Between 9 to 10 is the last life period until 35 to 40 is reached, when the male and female mortality nearly approach.

14. I have already referred briefly to the density and compression of the population within this City. The density of the population is very much greater than in 1872, notwithstanding the extension and increase of building and dwelling space between 1872 and 1881. This City has changed greatly since 1872; the number of persons to a house has

increased from 20 in 1872 to 25 in 1881. In Sections, the house density and the house crowding are intense ; in the 6 most crowded sections, there are 24 houses to an acre ; in the section of Khara Talao, there are as many as 35 buildings to an acre ; this indicates fearful compression.

15. In a former report, I gave some statistics of the extent of room crowding ; the extent of room crowding in this City is appalling ; it can scarcely be more fearful. The danger from house crowding increases with the continuous house piling, and this proceeds with the increase of the population.

The high rate of infant mortality is deplorable, but it is possible of reduction ; it has been reduced and, I believe, will still be considerably reduced by measures of drainage and house sanitation that have been carried out and are still being effected. But in the warfare with disease, sanitary measures must be continuous. House and room crowding must greatly influence the mortality of children. Of the conditions coming within the scope of the Municipal Law, they are probably the most active and fatal to child life. There are other conditions of potency which, though not capable of amelioration through Municipal organization, are possible of reduction. Amongst a population in which the daily wage leaves so small a balance for comfort—for it is barely enough for subsistence—I am afraid a high child mortality is a result that cannot be completely avoided. From necessitous conditions arise these numerous causes of infant mortality, which are so difficult of prevention, and of removal, by ordinary measures of relief.

16. If concentration of the population, crowding of house and room is a powerful factor—the most powerful, I believe, in influencing the mortality, especially the fataliy of weakly child life, measures for diminishing the concentration and relieving the pressure of the population, and for lessening the effects and removing the impurities—most numerous—of concentration will be the most effective towards a reduction of mortality.

17. It is sufficient for me now to state that, sanitary aims and measures, such as are possible by the utmost straining of the present law, have been steadily followed and adopted for many years ; measures to remove the increasing impurities of an increasing population, for greater cleanliness, have been progressive and enlarging. The progressive execution of drainage works, the initiation of a scheme for a greater supply of water, the improvement and enlargement of the departmental organization for the removal of refuse, are all measures directed towards the diminution of the forces actively and continuously detrimental to the public health. The rapid expansion of the City has been apparent, more especially to Municipal Officers, for many years past. In the Report for 1882, I pointed out that the City was changing to a

degree, which those who lived in its midst scarcely observed. The measures that have been successively adopted during some years for the improvement of the public health have not yet been fully understood; their value will only be appreciated after years hence.

18. In the last Annual Report, you have appraised clearly the two great measures necessary to the conservation of the public health. These are measures which can be completed, and every resource should be strained to complete them. My views so nearly agree with the conclusions you have come to that I repeat your words. After referring to the unwholesome condition of portions of the City, you write:—"The combination of a copious water-supply with efficient drainage will, it may be foretold with some confidence, lay the foundation of a permanent improvement in the public health of these insanitary portions of the City. It may be hoped that six years hence the Tansa scheme will have given us the first, and that in less than six years the second may have been completed. With regard to this, some words in the Health Officer's Report for the first Quarter may appropriately be quoted: 'It is right to remember, as I have before been pointed out, that the admission of more water necessitates the construction of more channels to remove it, or, in other words, progress in drainage operations. Water delivered in the City must be carried or drawn out of it; for if the water remains in the soil, the most serious dangers from soil moisture, saturation and humidity to the public health may be apprehended. As a dry foundation is to house sanitation, so is a dry soil to public health.' The advantages of a water-supply are more obvious to a superficial view than those of drainage. About the latter, there is but a half-hearted energy in the people of this City, but it will be well when they realize the soundness of the scientific opinion that the value of a thorough system of drainage stands second only—if in two absolute essentials of health one can be said to be second to the other—to that of a pure and copious supply of water."

19. In connection with these measures, I would refer to the great sanitary importance of the new roads which have been opened out from the City across the Byculla Section. These roads are most valuable sanitary works, which will have the effect of attracting population from the dense Urban Sections, in which the fearful concentration has been referred to, and from the pollutions which ever arise amidst crowded population.

20. The table following, showing the mortality by place of birth, is suggestive, and it is of value in the appraisement of the annual fluctuation of the population; the deaths of the indigenous population are exceeded by the mortality of the immigrants—the population not born in Bombay. The excess of immigrant mortality is higher than in 1884. The fluctuation of the immigrant mortality nearly

follows the seasonal fluctuation of population, whereas the incidence of the indigenous mortality does not.

Total...	10,731	10,910	209	21,850

21. The mortality arranged in groups of important death causes is exhibited in the table following. Contrasted with the preceding year, there is a reduction in the mortality from the following chief death causes :—fevers 182, small-pox 57, phthisis 186, diarrhœa 144, and dysentery 27 ; and an increase from—cholera 22, affections of the respiratory system 43, and all other causes, except still-born, 50. Of the affections classed under the head of diseases of the respiratory system, an increase of 293 is referred to bronchitis, while a decrease of 314 in the deaths from pneumonia is registered.

22. Contrasted with the mean of the 5 years preceding, there is an increase from—fevers 221, chiefly under the head of simple continued and amounting to 348, cholera 124, diseases of the respiratory system 525, and phthisis 124 ; (amongst diseases of the respiratory system is included an increase of 622 deaths in the mortality from bronchitis and a decrease of 173 from pneumonia) ; and a decrease from—small-pox 326, measles 233, diseases of the nervous system 178, diarrhœa 145, and dysentery 96.

23. The decrease in the mortality from diarrhœa and dysentery is remarkable for having occurred in the same year in which an increase in the mortality from cholera was observed. It is possible that the mortality from these diseases has been influenced by the system of channels constructed to remove sewage and to carry away the rain-waters and drainage, but which for a considerable period acted as sub-soil drains and channels. The new rain-water channels with the disused—empty of sewage—underground sewers of past systems and expedients must prove valuable soil-purifiers. An enhanced mortality from cholera coincident with a reduced mortality from diarrhœa and dysentery is an occurrence remarkable enough to be noted in the review of our statistics, for it has generally been observed that in a period in which cholera is prevalent, there is an increased mortality from affections of the digestive system, more especially diarrhœa.

24. It must be noted that, in addition to the fall of water which has been noticed in wells in the city, a very remarkable decrease has occurred in the level of the water in tanks on the Flats, notably in the case of some mill tanks. In Camathipura a fall has in this year been observed in the mortality from diarrhœa and dysentery.

25. *Mortality by Districts.*—The incidence of the mortality by districts is shown in a table following. It will be observed that 1st Nagpada and Kamathipura, which occupied the highest places on the mortality list in 1884, now take lower places in 1885. The four sec-

tions of highest mortality are sections weighted with intense human concentration, and be it remembered that the density of population in those four districts is greater than the density of population in the most crowded districts of London. The influences hostile to vitality—the impurities arising out of this concentration, can only be resisted and overcome by breathing spaces around and within each building; and by channels to rapidly and safely carry away the liquid refuse of population; and hence the necessity for those measures of house sanitation and drainage which occupied so much attention in previous years and in previous reports.* But most unfortunately for the adoption of measures for the protection of the population in the dense districts, of buildings most crowded, from poisoning as certain as if fatal vapours were administered, the Municipal Law is impotent to help. I have been making demands, on builders of houses during many years, and very generally securing compliance with those demands, which were not clearly authorized by the present law, as we have had to admit on a careful examination of them, when their legality has been questioned; for there is in this City a public feeling which recognizes and supports tacitly measures and demands sanitary for the protection of the public health, and which does not approve of the erection of unwholesome buildings; but, with the increasing value of land and competition for rent the measures of house sanitation, adopted on suggestion but a few years ago, are now contested, unless that their validity is unquestionable; and during the last two years it must be confessed, judging from the records, that measures and demands for the improvement and ventilation of buildings have been more contested than ever, and their enforcement has been surrounded with greater difficulties. The impotency of the Law bearing on buildings is now so well understood that efforts to enforce demands which cannot be legally enforced only diminish such influence as may, in a friendly way, be brought to bear. There are, I am glad to be able to write, many landlords who are most ready to adopt sanitary suggestions in building, even at a sacrifice of building space, but when they now see others building over open space around or within their buildings and making all space productive in rent, which they would not have done, they come to be less ready than ever to leave ample breathing space, as the concession of such space is loss of rent to their buildings. From the table showing the mortality by districts, the portions of the City most needing improvement can easily be selected; the defects in those portions of the City have so often been described I need not refer further to them now than merely stating that the defects mainly consist of imperfect provision within the buildings for ventilation and imperfect facilities without for drainage, and overcrowding; in one district—Kamathipura—a system of drainage without complete house connections has been constructed, but the time has not yet come to appraise that drainage, although it may be observed that the incidence of mortality in that district has since 1883 been a lessening one; beyond the drainage—a vital improvement—there are other improvements to be carried out, especially in house ventilation in Kamathipura.

* Attention is drawn to the increased mortality from diseases of the respiratory system referred to in para. 54.

Non-Resident and Unknown		...	236	.....
	Total.....	773,196	21,850	25·88

26. There is a certain uniformity in the degree of incidence of the total mortality and the mortality under 1 year on districts; in the districts of the highest total mortality we find the highest fatality of children, the greatest destruction of infant life. The average mortality for the whole Island under 1 year of age is 27·88 per 100 (excluding the Harbour), and in the four districts of the highest total mortality we find the following proportion of children under 1 year of age dying :—

Chuckla	37·62	Kamathipura	42·01
2nd Nagpada ...	39.51	1st Nagpada	50·95

27. The practical question is, how is this large fatality to be reduced and lessened? The measures for the reduction of the excess mortality

are easy enough of recommendation—more easy than of adoption ; they are—improvement of house ventilation, reduction of density and concentration of population, formation of more breathing spaces, drainage-channels to safely carry away all the liquid refuse, cleanliness in its widest sense. These districts (excluding Kamathipura in which a reduction of mortality has been effected) are districts of ill-ventilation, of density and crowding, and of imperfect and faulty drainage, for not only are the drains bad and faulty and in ill-repair, but they are underground and have many direct house connections. In these 3 districts are the influences of ill-ventilation, of over-crowding, imperfect house ventilation, and defective or imperfect drainage in continual operation.

28. *Mortality by Class.*—The mortality exhibited in the table following shows that the death-rate of the four distinct and great classes selected in the table is not as low as in 1882, but that the death-rate of two of the classes—Mussalman and Parsee—is lower than in 1884 ; the increase of population, which would reduce a little the increment of mortality amongst Brahmins, Europeans, Mussalmans and Parsees in 1885, as compared with 1882, has not been calculated :—

RETURN SHOWING THE TOTAL NUMBER OF DEATHS AND THE RATE OF MORTALITY IN THE FOLLOWING CLASSES SINCE 1877 PER 1,000 OF POPULATION.

	Total No. of Deaths in the City.	Brahmin.	Parsee.	European.	Mussalman.	REMARKS.
1877...	33,511	29·93	23·04	30·33	45·26	These calculations are made on the population of 1872.
1878...	26,999	31·83	24.99	31.98	49·12	
1879...	22,527	27·99	20·45	24·81	41·57	
1880...	21,146	27·60	20·14	26.88	37·44	
1881...	21,856	19·05	20·10	22·77	31·05	These calculations are made on the population of 1881.
1882...	20,468	21·02	18·43	17·70	29·87	
1883...	23,530	23·06	22·96	18·94	34·53	
1884...	22,542	22·32	22·86	19·23	33·27	
1885...	21,850	24·69	20·43	19·23	32·02	Increment of population is not calculated.

29. In the table following a more complete view of the fatality amongst Europeans is presented than in the table preceding. There can be no question if this record is correct, that the prospects of life for Europeans in this City have improved ; the low rate of European mortality has been explained in two ways—1stly, the fact of a large proportion of European lives being selected adults, and, 2ndly, the opportunities Europeans have, and use of leaving Bombay during ill-health. Against the second explanation must be placed deaths of Europeans who have come to Bombay and died on the way to Europe or elsewhere ; it does not fully account for or explain the reason of the lower European mortality now than some years ago. The first explanation will account for a generally lower rate of mortality amongst Europeans, but not for more. It appears to me that the lower rate of mortality amongst the European race must be chiefly ascribed to the improved sanitary conditions under which Europeans now live in this City.

30. The variation in the Eurasian mortality appears to be chiefly affected by fluctuations of population.

TABLE EXHIBITING THE MORTALITY AMONGST EUROPEANS, EURASIANS AND PARSEES DURING A SERIES OF YEARS.

31. It may be seen from the table that the rate of mortality on a large Hindu population of 407,717 is 26·09 per 1,000, being very little lower than in 1884, and amongst a large and increasing class, Hindu Low-castes, 35·19 against 37·47 in the year before. The incidence of the race mortality amongst the great classes of the population varies from 19 to 57 per 1,000; at one turn are Europeans and Parsees with rates of 19 and 20 to each 1,000 of their populations, and at the other, Jains and Low-caste Hindus exhibiting death-rates of 57 and 35. The variation of the race mortality depends not only on surrounding conditions of air and soil purity, but on conditions arising out of manner of life and sustenance.

RETURN SHOWING THE NUMBER OF DEATHS AND THE RATE OF MORTALITY AMONGST DIFFERENT CLASSES IN 1885.

Total...	773,196	21,850	25·88

32. *Small-pox.*—The mortality from small-pox is small. 55 deaths were registered, being a little more than the mortality of 1881 and a little less than in 1882. An exceptionally long period elapsed between the serious epidemic of 1876 preceding the Famine, and the next visitation in 1883. The epidemic of 1883 was preceded during the last months of 1882 by indications, which have generally been observed in the period preceding an epidemic, pointing to a resuscitation of small-pox —such indications must be carefully looked for towards the end of the next year. It is believed that the epidemic of 1882-83 was influenced by the importation in December 1882 of cases on board ship. There are in this City, as I have previously pointed out, an increasing number of susceptible elements from unprotected adults and infants. To complete the measures now lawful for the prevention of small-pox, it is necessary that the vaccination of stranger-adults and re-vaccination should be made compulsory by law. Powers are needed to deal with the vaccination of stranger-adults, for the fatality of each epidemic is influenced by this susceptible element from immigration.

33. In 12 sections, the incidence of the small-pox mortality did not fall in 1885 ; the highest mortality in any one section amounted to 8 deaths in Kumbharwada.

34. It will be observed that no deaths occurred amongst Lingaets; Europeans, Eurasians and Jews.

35. *Measles.*—The mortality from measles is 33 less than in 1884, amounting to a reduction of ·03 amongst males and ·06 amongst females; the death-rate of males being ·46 and females ·67. The incidence in the last 3 years has been as follows:—

	Per 1,000 of Population.
1883	·39
1884	·55
1885	·51

The seasonal incidence of the mortality from measles follows the fluctuations observed in the periodical mortality from small-pox; both are diseases whose development is observed in the colder season: the possibility of a relation existing between the incidence of measles and small-pox will occur on examining the statistics, and its investigation needs study.

36. The highest mortality from measles occurred in the Byculla, Mahalakshmi, Girgam and Chuckla Sections.

37. It will be observed that, in the four classes amongst whom deaths from small-pox were not registered, deaths from measles occurred, the four classes are Europeans, Eurasians, Lingaets and Jews. Of the total deaths, 242 occurred in a group of Hindu classes representing 407,717 of the population and giving a mortality of ·59 per 1,000, that is, ·08 above the average of the death ratio on all classes. The mortality amongst the following classes is lower than in 1884—Jains, Bhatias, Mussalmans and Hindu Low-castes, amongst the latter it is ·63 less.

38. The highest mortality has occurred between the 7th and 12th months, and during the 1st year, the mortality of males at both periods being higher than females.

39. *Cholera.*—The mortality from cholera is 22 more than in 1884. During the year, 768 cases were reported and 598 proved fatal. The proportion of deaths to attacks is shown in the table following:—

	Attacked.	Died.
Males	489	376
Females	279	222

40. Of the 768 attacked, only 93 were born in Bombay, whereas 664 were born outside; 69 per cent. of those attacked born in Bombay and 79 per cent. of those born elsewhere died.

41. This indicates very clearly the influence of the immigrant population on the mortality of this City. The huge labouring mass which annually rolls towards this City is very susceptible of cholera influences. It must be remembered that the population which had emigrated to this City from Ratnagiri was found in 1881 to have increased enormously; in 1872 there were 56,879, but in 1881 there were as many as 126,190, that is, 121·8 per cent. more than in 1872. This influx is chiefly of labourers and toilers. A further indication of the degree in which the mortality is affected by immigration is given by the period of residence of those who suffered from cholera in our City; 257 of those attacked were under 3 months in this City, and 204 of them died, giving a mortality of a little over 79 per cent.; 75 were over 3 and under 6 months in this City, and 59 died.

42. The sources of water-supply immediately before attack are indicated in the statement following:—

	Attacked.	Died.
Vehar and Tulsi Water	589	465
Well Water	94	71

43. With the largest population, there are the largest number of cases and deaths amongst the Hindu population, but the highest proportional mortality—amounting to 1·43 per 1,000—has occurred amongst Europeans: 15 deaths occurred amongst Europeans. So high a mortality from cholera amongst Europeans is exceptional; in 1884, when 576 deaths occurred from cholera amongst the whole population, only 6 deaths happened amongst Europeans; of the 15 deaths, 6 occurred in one of the most magnificent buildings in this City —the Sailors' Home—I cannot speak from personal knowledge as to the cases and the circumstances under which they arose, not having been here, but the Assistant Health Officer, Mr. Leask, who conducted an inquiry at the time, reports to me that there was not any evidence to show that the occurrence of the cases was influenced by defects in the sanitary arrangements of the building.

44. The highest mortality from cholera has been registered in the following districts;—Fort (South), Mahim, Fanaswadi, Tarwadi,

Worlee and Girgam. On studying the records, I find that, as in previous years, the fatality from cholera has fallen heaviest on certain districts and in certain portions of districts which in former years were observed to have been most affected. Amongst other positions of cholera activity, I observe that 17 cases and 11 deaths occurred in a group of dwellings surrounding wells and open space called Antoba Gosawi's Oart. In 1875, a severe fatality from cholera occurred in this oart and, as the condition of the oart now is nearly the same as it was in 1875, I give the following extract from my report for 1875 describing that epidemic. There is no record to show the condition of the well water in 1885 at the exact time of the occurrence of the cases of cholera, but the description of the sanitary condition of the oart otherwise than in regard to the water-supply in 1875 is as applicable to it in 1885 as it was in 1875 :—

"The people living in the oart might be classed either according "to their circumstances in life or to the water they drank. Alto- "gether about 400 people lived in the oart, and about 23 of them "were in comparatively comfortable circumstances; and the rest "were very poor. 18 people out of the whole number in the oart "drank Vehar water, the remainder well water. Of the 18 Vehar "water drinkers, 3 belonged to the well-off class, the rest were poor. "There were 14 people in the oart attacked with cholera, and 10 "died. 11 of the 14 drank well water, and 3 Vehar water. They "were all very poor. Of the 11 well water drinkers, 9 died; and 1 "out of the 3 that used Vehar water.

"To put it in a tabular form :—

	Attacked.	Died.
Well water drinkers.....	11	9
Vehar „ „	3	1

"Antoba Gosawi's Oart is in the shape of a square, three sides of "which are built on. To the north of the east entrance are two "wells, the water of which is used by about 382 people. On the "north side of the oart is a one-storied house, and to the east three "two-storied houses. In the most northerly of the latter, there were "two cases of cholera. These buildings, although better ventilated "and less over-crowded than the chawls which I am about presently "to describe, were ill-ventilated and ill-lighted. To this portion of "the oart, the well-off were confined. The chawls to the south con- "sist of two ranges of dwellings: the most northerly is a two-storied "building having a double row of rooms on each floor. Few of the "rooms have windows. The people who live in them are in very "poor circumstances. About ten feet to the south is a single-storied "chawl. Running the length of the building is a passage four feet "wide, and on either side of this passage are the dwelling rooms. "Some of the rooms have windows, but many have none. They "are, on an average, about 8 feet high, 8 feet broad, and 7 feet long,

"and there were about five people living in each room. Although "the people were poor, like all Hindus they kept themselves and "their rooms clean. The privies are away from all buildings, in the "north-west corner of the compound. The well is 50 feet distant "from the privies. I have stated that two people were attacked in "the most northerly of the buildings to the east; one was Gopall "Vittoo, a Mahratta. He had been fifteen years in Bombay. He "was attacked on the 12th July at noon, and died on the 15th July. "He had not strength to rally from the disease. The room where he, "with five others, lived was 8 feet long, 8 feet broad, and 7 feet high, "and it was ventilated by one window. The other case was a Brahmin "woman; she was attacked at 5 p.m. on the 6th; she recovered. The "room she lived in was 12 × 12 × 12 feet, and was ventilated by "one window; three members of the family lived in it.

"I examined the water both of the east and west wells. The "results of my examination were—

East Well.				West Well.			
Grains per gallon.		Parts per million.		Grains per gallon.		Parts per million.	
		Free	Albuminoid			Free	Albuminoid
Solids.	Chlorine.	Ammonia.	Ammonia.	Solids.	Chlorine.	Ammonia.	Ammonia
84	11	·01	·10	84	10·5	·04	·19

"Both the waters were slightly turbid, and they had a very sweet "and soft taste, and were extremely pleasant to drink. The water "in the west well was contaminated by bathing-water, and probably "a little urine soaking into the well. The chlorides were principally "derived from the soil. The amount of total solid matter was "sufficient to condemn both the waters. But whether the water "exercised any direct influence in producing the outbreak of cholera "is an open question. My own opinion is that it did not. Looking "to the large number of people who used indiscriminately the "water of both these wells and were not attacked, it is inconceivable "that the water should have contained the "poison" of cholera, and "they have escaped. There is no evidence to warrant us in conclud- "ing that there was in this instance a connection between the water- "supply and the cholera outbreak; on the contrary, as the disease "attacked only the poor, irrespective of the water they consumed, and "spared the well-off who drank of the same water and lived "alongside."

45. An exemption from reported attacks of cholera during the first year of childhood has been observed in 1885, and this freedom has been noticed in previous years. Our records show that the early years of life are free from the fatality of advanced age. In 1885 the mortality amongst males and females at each life period under 15 has been below the average mortality of males and females at all periods of life; classified by age periods, the mortality falls most heavily on lives between from 12 to 40.

46. *Fevers.*—Whereas as we have seen there is a comparative immunity from cholera during the first year, the highest mortality from fevers is recorded in the first year of life, to some degree this may have arisen through imperfect registration. 6,648 deaths were referred to fevers, being 182 less than in the last year, but 221 more than the mean mortality of the 5 years preceding. Of the deaths from fevers, 5,186 were ascribed to remittent fever, 121 less than in the last year and 10 more than the average of the 5 preceding years ; and 281 to ague, being 1 less than in 1884 and 131 less than the quinquennial average ; 1,171 were referred to simple continued fever. 52 less than in the last

year, but 348 more than the average; 10 deaths were ascribed to enteric fever, being 8 less than the mortality in 1884. Therefore, compared with the previous year, there is a diminution in the total mortality under the four classes of fever, but an increase over the average of the 5 years preceding, from remittent fever, and simple continued types.

47. The mortality from typhoid fever merely indicates the number of cases of typhoid fever, which were attended by medical men and which proved fatal.

48. The mortality from fevers by sex follows the incidence of preceding years in showing a higher female than male death-rate. The death-rate of males is 7·56 and females 10·14 per 1,000. Both amongst males and females, the highest proportional mortality occurs under the 1st year and the incidence falls heaviest on males. Up to the 3rd year, the mortality amongst children from fever is very high; from the 3rd up to the 7th and 8th years it falls until a minimum of 1·12 of males and 2·76 of females is reached. From the 9th year till over 30, the mortality fluctuates little although falling heaviest on females.

49. The mortality from fevers falls unequally by classes of the population; while the mortality of Europeans is 2 per 1,000, and amongst the Parsee population 5·; it rises to over 17 amongst Jains and to over 12 in the Hindu low-caste population. The mortality of Mussalman and of the great mass of the Hindu population is nearly equal; whilst the mortality of Hindus, other than Brahmin and Bhatia, Hindu low-castes and Parsees is less than in 1884, the mortality of Brahmins, Bhatias, Mussalmans, Europeans and Native Christians is more than in 1884. From the table below may be seen the rate of mortality from fevers in ten great classes of the population in 1884 and 1885:—

Classes.	1884.	1885.
	Per 1,000 of Population.	Per 1,000 of Population.
Jains	17·65	17·65
Brahmins	6·80	7·19
Lingaets	12·85	11·99
Bhatias	10·40	11·68
Hindus of other Castes	8·39	8·09
Hindu Low Castes	14·49	12·60
Mussulmans	8·92	8·99
Parsees	6·48	5·71
Native Christians	7·48	8·66
Europeans	1·91	2·00

50. The mortality in the Hindu low-caste population has followed in 1885 more nearly than in 1884 the seasonal fluctuation of the total mortality.

51. The mortality has fallen heaviest as in the previous year in Parell and Sewree, although the death-rate in Parell is 1 per 1,000 less and in Sewree 3·6 less than in 1884. The factors influencing the incidence of the mortality by districts have been examined fully in most previous reports.

52. *Mortality in Kamathipura.*—It may be pointed out that the male mortality in Kamathipura this year is relatively low. The excess mortality in Kamathipura is chiefly due to fevers.

53. *Mortality from diseases of the digestive system, &c.*—The mortality from diseases of the digestive system is 149 less than in 1884 and 208 less than the average of the last 5 years. I have referred already to the reduction in the mortality from diarrhœa, which is 144 less than in the last year and 145 less than the average. The mortality from dysentery shows a less reduction than the mortality under the head of diarrhœa; 608 deaths were

registered, which is 27 less than in the last year and 96 less than the average. To all other diseases of the digestive system 594 deaths were ascribed, 22 more than in 1884 and 33 more than the average.

54. From diseases of the respiratory system 3,787 deaths, 43 more than in 1884 and 525 more than the average, were registered. Of the deaths from affections of the respiratory system, 2,479 were referred to bronchitis, 293 more than in 1884 and 622 more than the average; 874 were ascribed to pneumonia, 314 less than in 1884 and 173 less than the average. The increased mortality from diseases of the respiratory system indicates the necessity of greater power in dealing with unwholesome buildings. The impotency of the Municipal Law bearing on the ventilation of buildings has been pointed out in many previous reports, and I agree with the remarks on this subject in the last Annual Report by Dr. Davidson.

55. From diseases of the nervous system 2,242 deaths were registered, 180 less than in 1884 and 178 less than the average.

56. To diseases of the circulatory system 171 deaths were referred, 5 more than in 1884 and 38 more than the average.

57. To diseases of the generative system 164 deaths were referred, 23 less than in 1884 and 27 less than the average.

58. From diseases of the urinary system 49 deaths were registered, being the same mortality as in 1884 and 12 less than the average.

59. From diseases of the organs of locomotion and cellular tissue 89 deaths were registered, 1 more than in 1884 and 14 more than the average.

60. To diseases of the cutaneous system 43 deaths were referred, 22 more than in 1884 and 12 more than the average.

61. From leprosy 71 deaths were registered, 3 less than in the last year and 11 more than the average.

62. To dropsy 92 deaths were ascribed, 30 less than in 1884 and 38 less than the average.

63. There is a reduction since 1884 in the deaths from old age and debility of 18; 1,240 were ascribed to these two classes of death-causes, being 123 less than the average.

64. From accidents and violence 331 deaths were registered, 3 more than in the last year and 19 less than the average; 54 were referred to poisoning, 8 more than in 1884 and 4 more than the average; of the deaths from poisoning, 26 were reported to be accidental, 25 suicidal, 1 suffocation through mephitic gases, 2 from snake-bite; 87 were referred to drowning, 19 less than in 1884 and 9 less than the average; of the deaths from drowning, 38 were reported to be accidental, 32 suicidal and 4 homicidal; the suicides through drowning were reported to have occurred under the following circumstances:—

Jumping into wells	14
Do. do. tanks	16
Do. do. sea	1
Do. do. fountain	1

65. The number of premature births shows a considerable reduction since the last 5 years; 18 were registered, 11 less than in 1884 and 93 less than the average.

66. Of the dead 15,049 were buried, 7,060 burnt, and 1,088 conveyed to the Towers of Silence.

67. *Births.*—The registration of births shows a little improvement when compared with 1884, but the number of births registered is less than in 1880, 1881, 1882 and 1883; 14,964 living and 1,347 still-born births were registered; of the children born living, 7,762 were males and 7,202 females; the proportion of male to female births is as 107 to 100; the birth-rate is equal to 19·35 per 1,000.

68. In some classes the birth-rate is nearly correct; for instance, the birth-rate of Jains is 29 per 1,000, of Parsees 28, and of Hindoo low-castes 27; the birth-rate of some classes is manifestly influenced by fluctuation of population.

69. *Municipal Administration.*—It is well to hear the opinion of others engaged in Municipal administration in the other great City of India and in similar duties on our system and efforts. Mr. Harrison, the Chairman of the Calcutta Commissioners, has been studying our system and machinery, and this is the opinion he has arrived at, while contrasting the sanitary administration of this City and Calcutta.

"In Bombay, the refuse is removed daily very much as in Calcutta, but the fixed dust-bin system has been annually falling more and more into discredit; instead thereof, however, a system is growing up of moveable dust-bins, which is worthy of imitation in Calcutta if possible. The moveable dust-bin is nothing more than a refuse-cart propped up, with the cattle and pole taken out. This is placed in a convenient spot, and people are invited or compelled to deposit their refuse in it. When the refuse-cart comes round, all that is needed is to transfer the cattle to the cart which is waiting, and leave the empty cart in its place. This system seems calculated to provide all the advantages of the dust-bin system, and at the same time to avoid its inconvenience, *viz.*, the bad smell which is inseparable from fixed dust-bins; it saves the labour of filling the cart and of emptying the fixed bin. It seems well worthy of a trial, especially in all the wider streets where the carts would not interfere with traffic.

"The refuse is then taken to low-lands or flats within the island, where it is deposited, and as this place is so near the town as to threaten a nuisance, a separate establishment is maintained to cover over each day's deposit with dry earth. It is a question whether arrangements will not have to be made to transport it beyond the Island. There are comparatively few tanks within the island, and refuse is not used in filling them to so large an extent as in Calcutta during the cold and hot weather.

"Bearing in mind that at Bombay provision has to be made for the conservancy of 7,73,000 persons scattered over 22 square miles; while in Calcutta there are only 4,29,000 persons occupying six square miles, it is evident that the conservancy arrangements of the latter are on a more liberal scale than those of Bombay.

"In some respects, however, the Bombay organisation seems superior. Each ward has its own stables, and the Ward Inspector lives on the spot, and manages the cattle; this obviates the necessity of separate Gowkhanah Superintendents. Again, by allowing the Inspectors a large staff of subordinates, it is evident that they have more time for control, and the staff is consequently better in hand.

"As regards the Halalkhor Department, Bombay is at a considerable disadvantage as compared with Calcutta, owing to its having only one principal and two smaller night-soil depôts, to which all the carts from all parts of the island have to come. At the larger one, water is pumped in from the sea, and the sewage then flows by gravitation right through the town. In Calcutta, the depôts are numerous, and are all situated on main sewers where there is a copious supply of water, and the fœcal matter is carried outside the town within a few minutes of its being thrown into the sewer.

"The four last items of expenditure all indicate superior organisation in Bombay, and furnish us with examples for imitation. The excellent working of the public dhobiwada, or wash-house, has been already referred to. The staff for supervising offensive trades is maintained out of license-fees for these trades. No license-fees are taken in Calcutta and, as a consequence, no special staff is maintained to look after these trades. The subject is one well worthy of consideration. The Bombay public stalls for milch cattle are excellent buildings, long, lofty, roomy sheds, a vast improvement on the Gowalabarees in Calcutta.

"There are 48 Sub-Inspectors at Bombay, subordinate to the 7 Inspectors, on salaries varying from Rs. 15 to 80, to which there is no corresponding staff in Calcutta. I am disposed to think that, when we have our whole-time Health Officer, it should be practicable to re-organise the superintendence staff, and supply a much-needed link between the overseer and the rank and file of the labourers."

70. Mr. Harrison did not fail to notice one of the weakest points in our Municipal armour—the weakness of the law in dealing with the commission of nuisances on the public streets; the fouling of the streets—in the many ways in which they are fouled and in which children take a considerable part—is one of the most serious nuisances and hampers measures to keep some portions of the City constantly free from causes of nuisance. With the continuous casting of refuse on many streets they cannot at all times be kept free of impurities; in the intervals of cleansing, the fouling continues. I am glad, however that this defect has been removed in your Draft Act.

71. *Disposal of the dead.*—The question of places for the disposal of the dead is still a very important one. The Municipality have

been progressively adding to the cemetery space—near the open suburb—the Flats—reserved for the burial of low-caste Hindus. Since I joined the Municipal service, 1873, the burial space for low-caste Hindoos has been increased by 173,423 square yards, and it will have to be increased more after a few years. I think the wants of the low-castes have been liberally provided for by the Municipality; in doing so a heavy expenditure has been incurred. The burial-ground opened in 1875 at Arthur Road was buired in more than once between 1875 and 1883; its use has been discontinued, and I doubt whether it is advisable to open it again on account of the population of the locality. A few years ago, there were no buildings near the position; now there are some close to it. So far as the bodies interred, they have all passed into dust and harmless compounds; the cemetery was last used in 1882.

72. A portion of ground of about 60,000 square yards in area was purchased at Arthur Road for a Mussalman cemetery and a wall was built around it; it was specially intended to use this ground for the disposal of the dead when the cemetery at Grant Road, which has been condemned but which it has not been possible as yet to close, was legally declared to be a place in which the disposal of the dead was unlawful.

73. I would strongly recommend that all the low, but open vacant ground to the north of Haines Road be secured for cemeteries; this is the only position in which cemeteries can be opened now; it is not too far from the City, but it is far enough; it is in the open country. There are now on the south side of Haines Road low-caste cemeteries; of which one is being used; the ground for this cemetery was purchased in 1883. It will soon be impossible, except at great cost, to obtain ground for cemeteries in this portion of the Island; it may even soon be too late for, if population quickly extends in this direction, it will be impossible to open a cemetery when groups of buildings have occupied the ground; if the ground is purchased now, however, when it is vacant, interment will be possible in the outer lines, and as building and population approach, interment can be withdrawn from the outer line towards centre, leaving an open space within the outer margin and between the new buildings and greater portion of cemetery ground. In 1881 when I recommended that this vacant land I now recommend, should be taken, it might have been purchased for a small sum; now it will cost a large amount; every year its price will rise, but, at whatever cost, the land either now or a few years hence will have to be purchased, for new burial-ground must be provided as the City increases whatever the cost may be.

74. *Latrines, &c.*—I have, in previous reports, pointed out the impossibility of continuing the erection of latrines, urinals and dust-bins on the sides of the public streets; the public have become intolerant of nuisances which, they believe, need not exist; there is not only the greatest difficulty in keeping latrines, urinals and dust-bins in posi-

tions they have occupied for many years, but there is the greatest difficulty in obtaining positions for new ones; in many streets it is impossible to obtain positions, and in these streets nuisances must be numerous, and their removal more difficult than in streets in which there are latrines, urinals and dust-bins. I strongly recommend that, as opportunity occurs, open ground suitable for these wants be purchased, and that on these positions fitting buildings be erected, in which latrines, urinals and dust-bins may be placed, in which they will be little of a nuisance.

75. We have been endeavouring to reduce the nuisance from these public necessaries by placing around them shrubs and pots of flowers, where the positions will permit of such improvements being made. Looking at the increasing value of land, which is not likely to cease, I think opportunities of obtaining open ground off streets should not be allowed to pass.

76. *Birth Registration.*—The number of births, although greater than in 1884, is less than in 1883; this manifestly must be due to imperfect registration. The supervision of the staff engaged in birth registration must be continuous and stringent to maintain progressive efficiency: the assistance of inhabitants in different parts of the City would also be of great value, and I hope such assistance may be secured. I have designed a form of diary of work to be kept by the staff for registration, which will facilitate supervision and tighten control.

77. A case of some interest in connection with birth registration arose after my return. A person was prosecuted for having failed to register the birth of a child within the period fixed by law; information of this birth was only obtained through information given by another person; a birth report was then taken to the house of the parents, and the information required concerning the birth was inserted in it, and signed by a nephew of the parents; a summons was applied for against the father; the day fixed for the hearing came, and a defence was set up that the child had not been born within the City and Island; the person who signed the report stated that he had made a mistake in regard to the place of birth of the child and that he had wrongly entered it; the father stated that the child was born outside the City and Island of Bombay, and that in the information given in the report of birth the mistake had been made of entering the place of birth of the child as Bombay, where the place of birth of the parents was intended, the parents having, he stated, been born in Bombay; the case was, therefore, dismissed, the magistrate holding that we must produce the evidence of some person who had witnessed the birth in Bombay; as the father stated that the child was not born in Bombay, and as the person who had signed the report stated he had made a mistake, and as we could not produce any direct evidence of the birth of the child within the City and Island, the complaint had to be dismissed. We took advice as to whether the person who had signed the report could be prosecuted, but that advice was that he could not.

On an average, 3,804 men and women, and 585 scavengering and drain-cleaning carts, and 140 night-soil and cesspool carts were at work each day.

143,684·6 tons of garbage were collected, equal to 393·6 tons per day, against 142,164·7 tons in 1884.

123,331·3 tons equal to 337·8 tons per day of night-soil were collected, against 107,990·9 tons in 1884.

204·6 miles of covered drains were opened and cleaned, against 197 in 1884.

There has been a decrease in the number of notices and summonses, 5,749 notices and 7,978 summonses against 7,141 notices and 8,378 summonses in 1884 were issued ; the amount of fines recovered amounted to only Rs. 3,909 against Rs. 4,688 on account of fines in 1884.

The number of licenses issued amounted to 5,814 against 5,338 in 1884, and the amount of fees Rs. 30,381-12-0 against Rs. 29,361-12-0 in 1884.

T. S. WEIR, SURGEON-MAJOR,
Executive Officer of Health.

Appendix A.

AGGREGATE AND MEAN VELOCITIES AND RELATIVE FREQUENCY OF DIFFERENT WINDS, 1885.

TABLE showing for the year 1885 the Sums of Velocities, and the Mean Velocities, in miles per hour, of the Winds which blew in each month, from each of the Sixteen Principal Directions, and also the number of Observations which those sums comprise; the latter numbers indicating the Relative Frequency of the same Wind (as to directions) in the several months, and of different Winds during the same month.

LIBRARY OF THE BOMBAY

No. 348 of 1886-67.

From the SUPT. of MARKETS, SLAUGHTER HOUSES, &c.,
To the MUNICIPAL COMMISSIONER,
Bombay.

Arthur Crawford Market Office,
Bombay, 20*th May* 1886.

Sir,

I have the honor to forward herewith my annual report for the official year 1885-86, with tabulated statements showing the number of Municipal Markets and Private Markets throughout the city, the amounts of Markets and Slaughter House fees, &c., collected under the Municipal Acts and By-Laws of 1872 and 1878 in the different Municipal Markets and Slaughter Houses under my management during the year under report.

The accompanying statements Nos. 1, 2, 3, 4 and 5 show the increase and decrease in the Markets and Slaughter House and Fair Ground revenue, from the year 1876 to 1885-86 ; also showing the number of horned cattle, sheep, goats, &c., slaughtered at Bandra and in Bombay, and the number of pigs slaughtered at Sonapur for butchers' meat and for private purposes during the year, and also the quantity of unwholesome food destroyed by the Markets and Slaughter Houses Establishments, and by order of the Police Magistrates, the number of summonses issued and the number of convictions obtained under the Municipal Acts and By-Laws, with the amount of fines inflicted by the Presidency Police Magistrates during the year, and to state that there is a further net increase of Rs. 3,678-13-8 in the revenue collected from the Markets and Slaughter Houses as per accompanying Statements No. 1, which also shows that the total amount derived from all the Markets and Slaughter Houses for the twelve months, ending the 31st of March 1886, amounts to Rs. 2,86,855-9-6 against Rs. 2,83,176-11-10 for the same period last year. The markets were fairly well stocked with fruit and vegetable (excepting grapes, which was very small and scarce : black grapes we had none). There was a large quantity of Italian apples imported, but of very inferior quality. The mutton supply was, as usual, good and plentiful ; there was a slight improvement in the quality and supply of beef, but not up to former years.

The fish-supply was not up to the demand during the year, and the fishermen state that this was on account of their fishing-stakes having been removed by the Port Trust authorities from the old fishing grounds.

There is an increase of Rs. 334-2-6 in the A. C. Beef Market more than last year; in the A. C. Fish and Mutton Market, Rs. 70-11-10 more than last year; in the A. C. Fruit and Vegetable Market, Rs. 1,724-9-6 more than last year; in the Erskine Road Fruit and Vegetable Market, Rs. 255-13-9 more than last year; in the Bhuleshwar Vegetable Market, Rs. 632-3-5 more than last year; in Slaughter fees, Rs. 3,211-2-0 more than last year; in Butchers' license fees, Rs. 1,195 more than last year; in chawl rents, Rs. 457 more than last year; and in miscellaneous fees, Rs. 443-12-0. In the Fort Market there is a decrease of Rs. 48-10-10 less than last year. This is certainly on account of the number of squatters who congregate on the public streets in the vicinity of the Market. In godown rents there is Rs. 26-15-6 less than last year. This was caused by one godown (No. 13) being vacant for over two months. In the Erskine Road Fish and Mutton Market, Rs. 1,456-10 less than last year. This was caused through the squatters' fees, contractors bidding less than last year. In the Pedder Markets, Mazagon, there is Rs. 294-5-0 less than last year. This was also attributable to the same cause, and the population in this locality appears to be decreasing. In the Fair Ground rent Rs. 2,661 less than last year: the cause is same as above; and in miscellaneous receipts Rs. 158 less than last year. The quantity of unwholesome food destroyed during the year was 38 tons 17 cwts. 3 qrs. and 21 lbs., or 5 tons 16 cwts. 1 qr. and 1 lb. more than last year, and the number of convictions obtained before the Presidency Magistrates were 205, or 57 more than last year; and the amount of fines inflicted was just Rs. 3-10-0 more than last year.

I must point out again the very over-crowded state of the Arthur Crawford Fish and Mutton Market, the Bhuleshwar Vegetable Market and the Erskine Road Fish and Mutton Market. The above three markets should be enlarged and otherwise improved as soon as possible, and a small general market should be established at Colaba, the necessity for which is well known to the Municipal Commissioner. A Pork Slaughter House and a stall for the sale of pork is required at the Pedder Market, Mazagon.

The Municipality lost a very good officer at Bandra through the death of Cattle Inspector Vincent on the 12th November 1885. Mr. C. L. Smith, from the Bombay Police, was appointed Cattle Inspector at Bandra on the 1st December 1885 by the Municipal Commissioner.

Mr. Devlin, Meat Inspector, was dismissed on the 11th April 1885 for drunkenness, and Mr. P. Sullivan, from the Health Department, was appointed Meat Inspector instead on the 23rd April 1885, and appears to be a very suitable man for the work. The Private Market Inspector and peons have not brought up as many cases during the year as they might be expected to do. The total number of cases brought up by them during the year was only 16, and the fines inflicted was only Rs. 40, and I have had to speak to them repeatedly on the subject.

All the Public Market dealers, &c., appear to be well contented, excepting the beef and mutton butchers, who are not at all satisfied with the present meat conveyance system.

In conclusion, I beg to state that all the Public Markets and Slaughter Houses establishments in Bombay and at Bandora have worked well and satisfactorily during the year, and the only complaint that I heard of was that one which appeared in the *Bombay Gazette* of the 16th January 1886, and which, after very strict inquiry, turned out to be groundless.

I have, &c.,

P. C. HIGGINS,

Superintendent of Markets & Slaughter Houses, &c.

No. 349

W. H. WILSON, Lieut.-Col.,
Acting Commissioner of Police.

BOMBAY, 1st *May* 1886.

ANNUAL REPORT

OF THE

MUNICIPAL AUDITORS.

To

H. W. BARROW, Esq.,

Secretary, Town Council, and Clerk, Municipal Corporation,

Bombay.

Sir,

In accordance with the XXXII section of the Bombay Municipal Acts of 1872 and 1878, we have the honour to send in our Report of Municipal Accounts for the year 1885-86 for submission to the Town Council and Corporation.

We have the honour to be,

Sir,

Your most obedient servants,

ARDASEER FRAMJEE MOOS,

NÁNÁBHÁI RASTAMJI RÁNINÁ,

Municipal Auditors.

Bombay, 25*th August* 1886.

REPORT OF THE CONCURRENT AUDITORS ON THE MUNICIPAL ACCOUNTS FOR THE YEAR 1885-86.

THE Municipal Corporation at their Special General Meeting, held on the 10th day of December 1885, having appointed us Concurrent Auditors to audit the accounts of the Municipality for the year 1885-86, we have the honour to submit our Report thereon for the information of the Town Council and Corporation.

2. The official year under report comprises twelve months, commencing from 1st April 1885 to 31st March 1886.

3. We have examined the whole of the vouchers and papers relating to receipts and disbursements, and have compared the Day-book with General Ledger and Subsidiary Ledgers, Journal, &c., and found them all in order.

4. We have been able, from our attendance given daily for four consecutive hours, owing to the work having, since the last nine years, greatly increased, to keep the concurrent audit of the daily accounts as close up to date as they were booked.

5. The number of vouchers which have passed our scrutiny amounted to, in 1885-86, 37,350 against 39,458 in 1884-85.

6. In addition to the concurrent audit, we have examined Weekly statements of receipts and expenditure of Municipal accounts at the end of each week, and before they were published in the *Government Gazette*. The accuracy of this weekly audit was further tested at the end of each month, by our preparing a summary of all accounts directly from the General Ledger and independently of the weekly statements. The summary contained totals of receipts and expenditure of each account as it stood in the Ledger at the end of the last week of the month, and which totals were tallied with the aggregate total of each head of accounts given in the weekly statements of the month added together. By this method of scrutiny, any omission, or a wrong posting of an item, could not remain undetected for more than a month at the most.

7. The summary so prepared by us was regularly forwarded every month, to the Secretary for submission to the Town Council.

RECEIPTS.

8. The total receipts of the Municipal Funds for twelve months, ending 31st March 1886, including receipts for Water Rate, amounted to Rs. 44,73,973-0-4 against Rs. 42,13,867-13-7 in 1884-85, or Rs. 2,60,105-2-9 more than the receipts of the last year.

Expenditure.

9. Exclusive of Rs. 30,000 paid towards the reduction of the New Drainage Loan of Rs. 27 *lakhs*, Rs. 1,13,399-3-4 paid towards the reduction of Consolidated Loan, and Rs. 48,469-13-2 paid towards the reduction of the New Sanitary Works Loan of Rs. 44 *lakhs*, making a total of Rs. 1,91,869-0-6, the total expenditure for twelve months, ending 31st March 1886, amounted to Rs. 37,49,497-2-0 (including the amount of Sinking Fund on account of House and Market Loans and expenditure on account of Water Works) against Rs. 37,44,057-4-2, being only Rs. 5,439-13-10 more than the expenditure of the last year.

10. Taking the whole of the ordinary receipts of the twelve months of the year 1885-86 at Rs. 44,73,973-0-4, and the whole expenditure at Rs. 37,49,497-2-0, *inclusive* of the receipts and expenditure of Water Works account, there was on the 31st day of March 1886, a credit balance of Rs. 7,24,475-14-4, being Rs. 2,54,665-4-11 more than the credit balance of the last year.

Particulars of Receipts.

11. *Water Rate* realized Rs. 6,65,370-3-5 in 1885-86 after paying refunds amounting to Rs. 2,236-9-11, and including Rs. 1,000, being proceeds of sale of grass growing on the lands about the Vehar Lake, and Rs. 5,000 on account of water supplied for extinguishing fires, and Rs. 2-8-3 on account of water used by the Executive Engineer, Municipality, against Rs. 5,96,123-3-5 realized in 1884-85, being Rs. 69,247 more than the receipts of the past year.

Budget Estimate, Rs. 6,68,000.

Total expenditure on account of Vehar Water Works amounted to Rs. 5,23,201-10-7 in 1885-86 against Rs. 5,12,589-11-0 in 1884—86, being Rs. 10,611-15-7 more than expended last year. For particulars of expenditure, *vide* para. 66 of this Report.

12. *Consolidated Rate at* 8 *per cent.*—The total revenue under this head, comprising *House*, *Police*, and *Lighting* rates, and contributions from Government and Port Trust, amounted in 1885-86 to Rs. 14,61,304-10-10 against Rs. 11,80,307-0-6 in 1884-85, being Rs. 2,80,997-10-4 more than the net revenue realized last year.

Budget Estimate, Rs. 12,10,000.

13. Refunds amounted to Rs. 3,931-10-8 against Rs. 4,286-2-2, being Rs. 354-7-6 less paid in 1885-86.

14. Collections recovered on account of arrears of 1880 to the end of 1884-85 amounted to Rs. 1,70,838-15-3, and for the year

1885-86 to Rs. 10,22,017-6-3. Government and Port Trust contributed Rs. 50,000 and Rs. 2,22,380 respectively.

15. *Government Contribution towards Police Expenses* amounted to Rs. 90,000, which was fully paid up.

Budget Estimate, Rs. 90,000.

16. *Wheel Tax* amounted to Rs. 3,17,123-0-3 in 1885-86 against Rs. 2,92,766-7-0 in 1884-85, being Rs. 24,356-9-3 more than the receipts of the last year.

Budget Estimate, Rs. 2,96,400.

17. Collections on account of arrears from the year 1880 to the end of 1884-85 amounted to Rs. 23,013-6-3, and for the year 1885-86 to Rs. 2,94,489-10-0.

Refunds during the year amounted to Rs. 380 against Rs. 323-12-0 in the past year.

18. *Toll Tax* levied on carts which pass the Sion and Mahim Causeway, and collected by the officers of the Port Trust Department, amounted in 1885-86 to Rs. 15,362-4-0 against Rs. 16,785-12-0, being Rs. 1,423-8-0 less than the receipts of the past year.

Budget Estimate, Rs. 16,000.

Establishment for collecting Toll Fees under the Traffic Manager of Port Trust Bunders amounted to Rs. 1,680, same as paid last year.

19. *Liquor Licenses* amounted to Rs. 1,43,750, the amount fixed by Government to be paid to the Municipality.

Budget Estimate, Rs. 1,43,750.

20. *Land Conveyance Licenses.*—Under this head were collected and paid by the Police Commissioner Rs. 4,524-13-11 for the year 1884-85, against Rs. 4,304-14-11 for 1883-84, being Rs. 219-15-0 more than the receipts of the last year.

Budget Estimate, Rs. 2,300.

21. *Halalkhore Cess* yielded Rs. 3,16,786-9-3 against Rs. 2,89,616-1-6 in 1884-85, being Rs. 27,170-7-9 more than the receipts of the last year.

Budget Estimate, Rs. 2,70,000.

Collections on account of arrears from the year 1880 to the end of 1884-85 amounted to Rs. 24,054-8-11 and for the year 1885-86 were collected Rs. 2,93,963-0-7.

Refunds paid in 1885-86 amounted to Rs. 1,231-0-3 against Rs. 1,323-3-2 paid last year.

22. *Town Duties.*—The receipts under this head for 1885-86 amounted to Rs 13,65,035-9-0 against Rs. 14,28,526-8-0 in 1884-85, giving a decrease of Rs. 63,490-15-0 over the receipts of the past year.

Budget Estimate, Rs. 6,70,000.

This decrease is explained as follows :—

	Increase. Rs. a. p.	Decrease. Rs. a. p.
Port Trust yielded	.....	1,34,889 10 2
B. B. & C. I.	1,10,010 13 2	.....
G. I. P.	.....	38,612 2 0
Total ...Rs.	.....	1,73,501 12 2
Less ... „	.....	1,10,010 13 2
Decrease ...Rs.	.....	63,490 15 0

23. *Refunds of Town Duties* amounted to Rs. 6,85,742-10-0 in 1885-86 against Rs. 6,55,095-15-0 in 1884-85, being Rs. 30,646-11-0 more than refunds paid last year.

24. Similarly, charges on account of commission paid for collecting Town Duties were also proportionately less, amounting in 1885-86 to Rs. 48,482-2-2 against Rs. 49,253-3-1, being Rs. 771-0-11 less paid than last year.

25. Figures given below will show comparative increase or decrease in the receipt of Town Duties levied on articles in 1885-86 compared with the receipts of 1884-85 :—

	Increase in 1885-86. Rs.	Decrease in 1885-86. Rs.
Grain	65,660	.....
Wines and Spirits...	24,005	.....
Beer...	1,542	.....
Sugar	.....	1,57,662
Ghee	.....	5,459
Timber	10,727	.....
Firewood	.....	4,277
Total...Rs.	1,01,934	1,67,398
Deduct ... „	.....	1,01,934
Decrease...Rs.	.....	65,464

26. *Tobacco Duty Licenses.*—Receipts for 1885-86 amounted to Rs. 1,79,177-0-6 against Rs. 1,72,622-1-3 collected in 1884-85, being Rs. 6,554 more than the receipts of the last year. Rs. 17,526-14-6 were paid to the Commissioner of Customs on account of Tobacco Duty Establishment against Rs. 15,962-3-9 in 1884-85, being Rs. 1,564-10-9 more than the sum paid in the last year.

Budget Estimate, Rs. 1,70,000.

27. *Market and Slaughter-house Receipts.*—The receipts amounted to Rs. 2,86,865-9-6 in 1885-86 against Rs. 2,83,176-11-10 in 1884-85, being Rs. 3,688-13-8 more than the income of the last year.

Budget Estimate, Rs. 2,57,000.

28. The increase in the receipts of Market and Slaughter-house of Rs. 3,688-13-8 is explained below :—

	Increase.	Decrease.
	Rs. a. p.	Rs. a. p.
Slaughter Fees yielded	3,211 2 0	.....
Stall Rent	2,573 11 3	.....

	Deduct ... „	1,029 13 11	
	Increase...Rs.	3,937 5 2	

30. *Contributions from Municipal Servants towards Pension, &c., Fund* amounted in 1885-86 to Rs. 10,009-4-1 against Rs. 9,187-5-11 in 1884-85, being Rs. 821-14-2 more than receipts of the last year.

Budget Estimate, Rs. 9,600.

31. *Tramway Rent* yielded Rs. 28,366-13-8 in 1885-86, the same sum as in the last year.

Budget Estimate, Rs. 28,400.

32. *Contribution from Insurance Companies* amounted to Rs. 29,914 in 1885-86 against Rs. 25,517 in 1884-85, being Rs. 4,397 more than the income of the last year owing to additional Companies having been assessed in 1885-86.

Budget Estimate, Rs. 25,000.

33. *Miscellaneous Fines and Penalties* amounted to Rs. 9,520-12-9 in 1885-86 against Rs. 10,641-14-7 in 1884-85, being Rs. 1,121-1-10 less than the receipts of the last year's, as per following particulars :—

Budget Estimate, Rs. 10,100.

	Increase. Rs. a. p.	Decrease. Rs. a. p.

Increase...Rs.	10,721 13 9	

35. *Miscellaneous Savings* amounted to Rs. 4,143-8-6 in 1885-86 against Rs. 3,020-14-2 in 1884-85, being Rs. 1,122-10-4 more than the savings of the last year.

Budget Estimate, Rs. 3,000.

This increase was chiefly received from the Executive Engineer and Health Departments.

36. *Miscellaneous Receipts* amounted to Rs. 92,681-8-5 in 1885-86 against Rs. 88,984-6-4 in 1884-85, being Rs. 3,697-2-1 more than the receipts of the last year.

Budget Estimate, Rs. 80,000.

This increase is explained as below :—

	More.	Less.
	Rs. a. p.	Rs. a. p.
Sale of Land yielded	.....	1,339 13 6
Health Department.....	7,335 11 7	.....

Total...Rs.	8,541 12 9	4,844 10 8
Less ... „	4,844 10 8	
Increase... Rs.	3,697 2 1	

37. *Public Gardens.*—Receipts under the head of Victoria Garden amounted to Rs. 7,642-4-1, Bazar Gate to Rs. 3-10-0, and Elphinstone Circle to Rs. 2-4-0, in all to Rs. 7,648-2-11 in 1885-86 against Rs. 8,930-12-11, being receipts of the Victoria Garden alone in 1884-85, showing a decrease of Rs. 1,288-8-0 in the receipts of the Victoria Garden in the year 1885-86.

Budget Estimate, Rs. 8,500.

For the expenditure relating to Public Gardens, *vide* para. 50 under the head of Expenditure given in this Report.

38. *Profit and Loss on Stores.*—A credit of Rs. 50,049-11-6 is shown in the Statement of Total Receipts and Disbursements for the year 1885-86 against Rs. 99,841-12-1 in 1884-85.

Adjusted Profit on Stores.

This is a mere entry of adjustment account, representing the value of dead and live stock purchased during the year 1885-86, as allowed by the Budget grant, after deducting the value of live-stock which have died and for the depreciation of unserviceable live and dead stock.

39. *Municipal Workshops.*—The total receipts of the Workshops for the year 1885-86 amounted to Rs. 2,17,094-14-5 against Rs. 1,57,045-1-5 in 1884-85, being Rs. 60,040-13-0 more than the receipts of the last year ; and the total expenditure for the year 1885-86 amounted to Rs. 2,02,072-6-7 against Rs. 1,57,739-0-7 in 1884-85, being Rs. 44,333-6-0 more than the expenditure of the last year.

Comparing the receipts of the Workshops with the expenditure for the year 1885-86, there has been a profit of Rs. 15,022-7-10 against Rs. 240-10-6 in 1884-85.

The following are the details :—

Total recoveries during 1885-86 amounted to Rs. 2,03,369-12-3, which included Rs. 32,278-13-7, being the balance of outstandings for 1885-86.

Deducting the amount of the balance from the amount of total recoveries, the net recovery for twelve months, ending 31st day of March 1886, amounted to Rs. 1,71,090-14-8, and Rs. 46,003-15-9 were to be recovered from private and departmental works and for works which were completed and some works left incomplete, making an aggregate total of Rs. 2.17,094-14-5 for work executed in 1885-86.

Against this credit for work performed during the year, there was incurred an expenditure of Rs. 2,02,072-6-7, being the amount of payments on account of Establishment, Rs. 53,291-0-6, and of Stores, Rs. 1,18,781-6-1, used during the year, leaving a credit balance of Rs. 15,022-7-10 as profits of the Workshops for 1885-86 against Rs. 240-6-10 last year.

Of the Rs. 15,022-7-10 profits, Rs. 5,867-10-0 were made on private works, particularly executed for Government on the occasion of the North-west Frontier Expedition in February 1885, and Rs. 18,167-3-6 were made on Departmental Works, from which about Rs. 9,400 were expended in the repairs of machinery and tools, &c., of the Workshops.

EXPENDITURE.

40. *General Superintendence.*—Under this head, the total expenditure amounted to Rs. 1,66,827-3-10 against Rs. 1,65,257-14-10 in 1884-85, being Rs. 1,569-0-5 more than the expenditure of the last year.

Budget Amended Grant, Rs. 1,71,144-4-9.

This increase of expenditure is explained as follows :—

		More expended.	Less expended.
Town Council and Corporation Establishment—		Rs. a. p.	Rs. a. p.
Budget Grant, Rs. 43,977-12-9.	Expended Rs. 42,065 0 3 in 1885-86

	1,338 0 11	Rs. 184 6 0
Deduct... Rs.	184 6 0	
Increase... Rs.	1,153 10 11	

Town Council and Corporation Department.—The increase of Rs. 374-6-4, under Section II., Office Establishment, was due to a new appointment of a clerk on Rs. 30 per mensem having been budgetted for in 1885-86, and to an increment of Rs. 4 per mensem given to a peon boy, he having been promoted as a peon.

The decrease of Rs. 960, under Section III., Fees of Councillors, is due to some of the Councillors having not attended all the meetings of the Council held during the year.

The increase of Rs. 331-10-3, under Section IV., publishing Weekly Accounts, was due to additional cost of printing minutes of proceedings of the Town Council, &c.

The decrease of Rs. 3,425-15-6, under Section V., Contingencies, Stationery, Printing, &c., was due to charges for printing the papers on the question of the Vehar Water debt, &c., having been paid during 1884-85.

Municipal Commissioner's Department.—The increase of Rs. 2,954-13-5, under Section I., salary of the Municipal Commissioner, was solely due to the payment of the salary of the Deputy Municipal Commissioner from 29th June to 28th August 1885, during which period the Municipal Commissioner was on special duty to Poona in connection with the Amendment of the Municipal Act. The increase of Rs. 1,265-7-2, under Section II., Office Establishment, was due to two new appointments of clerks (one on Rs. 50 and one on Rs. 40) having been budgetted for in 1885-86, and to the annual increments given to certain clerks in the Commissioner's office. The increase of Rs. 824-9-8, under Section III., Contingencies, Stationery, Printing, &c., was due to increased cost of printing the Municipal Administration Report for 1884-85 and to sundry printing charges.

Municipal Controller's Department.—The increase of Rs. 610-2-1, under Section II., Office Establishment, was due to the annual increments having been allowed to the Assistant to the Controller and to the Assistant, Audit Branch. The increase of Rs. 120-0-11, under Section IV., Contingencies, Stationery, Printing, &c., was due to extra charges for printing the Sanitary Works loan receipt, interest books, &c.

41. *Assessor and Collector's Department.*—This department expended Rs. 1,12,282-1-7 in 1885-86 against Rs. 93,708-6-5 in 1884-85, being

Budget A, Grant, Rs. 1,16,964-1-8.

Rs. 18,573-11-2 more than the expenditure of the past year, as per particulars given below :—

	More expended. Rs. a. p.	Less expended. Rs. a. p.
1. Salary, Assessor and Collector, with horse allowance— amounted to ...Rs. 12,487 11 10 in 1885-86 against ..... „ 11,575 7 9 in 1884-85 *i.e.*	912 4 1	.....
2. Office and Out-door Establishment— amounted to ...Rs. 32,355 1 1 in 1885-86 against ..... „ 28,868 12 3 in 1884-85 *i.e.*	3,486 4 10	.....
3. Ward Inspection Office— expended..... Rs 41,679 4 10 in 1885-86 against ..... „ 39,651 1 4 in 1884-85 *i.e.*	2,028 3 6	.....
4. Contingencies— amounted to... Rs. 16,441 11 7 in 1885-86 against ..... „ 10,498 7 5 in 1884-85 *i.e.*	5,943 4 2	.....
5. Receipt Stamps— amounted to... Rs. 1,767 4 3 in 1885-86 against ..... „ 1,551 3 0 in 1884-85 *i.e.*	216 1 3	.....
6. Furniture for New Ward Offices— amounted to... Rs. 351 0 0 in 1885-86 against ..... „ *Nil.* in 1884-85 *i.e.*	351 0 0	.....
7. Salary of the Special Assistant to the Municipal Commissioner for examination of the Revenue Accounts and for checking Refunds— transferred to this department Rs. 7,200 0 0 in 1885-86 against „ 7,200 0 0 debited to the Municipal Commissioner's Department in 1884-85 *i.e.*	7,200 0 0	.....
8. Peons' Clothing— no charge in 1885-86 against ..... Rs. 844 6 0 in 1884-85 *i.e.*	.....	844 6 0
9. Extra Establishment for preparation of New Register of Properties— no charge in 1885-86 against..... Rs. 719 0 8 in 1884-85	.....	719 0 8
	20,137 1 10	1,563 6 8
Deduct...Rs.	1,563 6 8	
Increase...Rs.	18,573 11 2	

Assessment and Collection Department.—The increase of Rs. 912-4-1 in Section I., Salary of the Assessor and Collector, was partly due to the increment of Rs. 50 per mensem allowed to the Assessor and Collector, and partly to the acting allowance paid to Rao Saheb Virprasad Tapiprasad during the time he acted for Mr. Brunton while the latter was on privilege leave for 83 days from 20th October 1885.

The increases of Rs. 3,486-4-10 and Rs. 2,028-3-6, under Sections II. and III., Office and Out-door Establishment and Ward Inspection Offices, were due to full budgetted salaries being allowed during the year to most of the subordinates, who were not allowed their full budgetted salaries since the re-organization of the department.

The increase of Rs. 5,943-6-2, under Section IV., Contingencies, Stationery, Printing, &c., was due to increased printing, &c., charges.

42. *Public Health Department.*—The total expenditure of the Health Department in 1885-86 amounted to Rs. 9,10,619-6-0 against Rs. 8,38,547-14-10 in 1884-85, being Rs. 72,071-7-2 more than the expenditure of the past year.

Budget Amended Grant, Rs. 9,32,491-1-2.

This increase of expenditure is shown in the following particulars :—

			More expended.	Less expended.
			Rs. a. p.	Rs. a. p.
1. General Supervision—

		i.e.	26 2 0	.....
10.	Halalkhoie Branch—			
	expended...Rs.	3,09,737 14 0 in 1885-86		
	against ... „	2,81,820 9 7 in 1884-85		
		i.e.	27,917 4 5	.....
11.	Temporary Cholera—			
	Hospital ...Rs.	2,890 11 8 in 1885-86		
	against ... „	147 0 0 in 1884-85		
		i.e.	2,743 11 0	.....
12.	Extra cost for the better scavengering			
	of the City.Rs.	6,500 0 0 in 1885-86		
	against ... „	9,519 7 7 in 1884-85		
		i.e.		3,019 7 7
	Total... Rs.		86,332 9 1	18,256 9 11
	Deduct... „		18,256 9 11	
	Increase...Rs.		68,075 15 2	

From the above comparative statement of expenditure under various heads, it will be seen that the principal items of the increase of expenditure were Rs. 52,825-14-3 under the head of Conservancy Branch, and Rs. 27,917-4-5 in the Halalkhore Branch, the first expending Rs. 32,620-15-6 more in Scavengering and Rs. 20,204-14-11 in Drain Cleaning of the City; the second expending Rs. 11,464-1-7 more in rendering Halalkhore labour and Rs. 14,023-4-11 in the feed of cattles of this particular department.

43. *Municipal Engineer's Department.*—Expended Rs. 51,011-9-0 against Rs. 53,209-2-7, Rs. 2,197-9-7 less than the expenditure of the past year, as per particulars given below :—

Budget Amended Grant, Rs. 71,293-12-5.

	Rs. a. p.		More expended. Rs. a. p.	Less expended. Rs. a. p.
1. Salary—Deputy and Assistant Engineer—				
amounted to	18,931 0 0	in 1885-86		
against	23,428 6 3	in 1884-85		
		i.e.	.....	4,497 6 3

		Deduct... „	.....	2,606 14 8
		Decrease ...Rs.	.....	2,197 9 7

Municipal Engineer's Department.—The decrease of Rs. 4,497-6-3, under Section I., salaries of Deputy and Assistant Engineers, was due partly to no acting arrangement having been made during the time the Assistant Engineer was on sick leave on half pay, from 16th June to 14th December 1885, and since his subsequent transfer to the Tansa Water Works Staff, from January 1886, and partly to acting allowances having been paid during 1884-85 during the time the Deputy and Assistant Engineers were on privilege leave, from 3rd September to 14th November 1884, and from 28th May to 26th August 1884, respectively.

The increase of Rs. 1,084-7-2, under Section III., Surveyors and Draftsmen, was due to the full staff of Surveyors having been employed during 1885-86, whereas during the previous year the full staff was not employed in consequence of the temporary transfer of some of the permanent incumbents to Loan Works, &c., and during their absence on leave.

The increase of Rs. 518-15-0, under Section IV., Out-door Establishment (Roads and Buildings), was almost due to the Superintendent of Roads (Mr. Kaikhoshru) having been allowed the full salary of his appointment, viz., Rs. 275, from 15th June 1885, instead of only Rs. 225, which sum was paid to him since his appointment to that post in March 1884.

The increase of Rs. 641-4-11, under Section V., Contingencies, Stationery, Printing, &c., was due to increased charges on account of printing, advertisements, and stationery incurred during the year.

44. The following is a comparative statement of contract rates between the years 1883-84, 1884-85, and 1885-86 :—

Clothing	Rs. 40 per Havaldar and Rs. 24 per Peon per each.		Rs. 40 per Havaldar & Rs. 20-10-0 per Peon per each

45. *Watering Roads.*—Expenditure for watering roads amounted to Rs. 68,366-8-11 against Rs. 67,236-5-3 in 1884-85, being Rs. 1,130-3-8 more than expended last year.

Budget Amended Grant, Rs. 69,625-13-11.

The increase is chiefly due to the *departmental* watering of additional roads owing to the increased mileage of roads to be watered.

46. *Road Repairs.*—Under the head of Road Repairs were expended Rs. 2,88,371-5-9 against Rs. 2,84,558-0-0 in 1884-85, being Rs. 3,813-5-9 more than expended last year, as per particulars given below :—

Budget Amended Grant, Rs. 3,15,661-12-9.

		More expended.	Less expended.
		Rs. a. p.	Rs. a. p.
1.	Road Metal—		
	cost ..... Rs. 94,599 14 4 in 1885-86		
	against... „ 51,579 3 3 in 1884-85		
	i.e.	43,020 11 1	.....
2.	Sand Stone—		
	cost ..... Rs. 1,44,673 10 1 in 1885-86

Increase...Rs.	31,412 3 0	

53. *Primary Education.*—A sum of Rs. 22,500 and Rs. 1,200 was expended as Municipal contributions towards Primary Education and Victoria and Albert Museum and School of Art, respectively, against Rs. 22,500 expended in 1884-85 as a contribution towards Primary Education alone, being Rs. 1,200 more than expended last year.

Budget Amended Grant, Rs. 26,200.

54. *Goculdas Tejpal Hospital.*—Rs. 25,349-0-6 were paid for the hospital expenses the year under report against Rs. 30,011-8-7 expended in 1884-85, being Rs. 4,662-8-1 less than expended last year.

Budget Amended Grant, Rs. 36,000.

The unexpended balance returned by the Hospital Superintendent amounted to Rs. 1,924-7-6 in 1885-86 against Rs. 6,608-1-5 in 1884-85, being Rs. 4,683 less than the receipts of the last year.

55. *Jaffer Suleiman's Dispensary for Women.*—The whole grant of Rs. 6,000 allowed by the Municipality was expended in 1885-86 against Rs. 4,500 in 1884-85.

Budget Amended Grant, Rs. 6,000.

56. *Pensions* amounted to Rs. 18,009-14-9 against Rs. 17,995-13-6, being only Rs. 14-1-3 more, or very nearly the same sum expended last year.

Budget Amended Grant, Rs. 18,289-9-4.

57. *Gratuity and Compassionate Allowance.*—Rs. 307-13-6 were paid under this head during the year.

Budget Amended Grant, Rs. 3,853-0-10.

58. *Discretional Contingencies.*—Rs. 5,308-5-5 were expended in 1885-86 against Rs. 4,576-14-2 spent last year.

Budget Gran., Rs. 5,387-9-7.

59. *Auditors' Allowance.*—The whole grant was expended in payment of this allowance. We think it proper to repeat our observation once more, that neither the Corporation nor the Town Council have paid any attention to the suggestion of the Auditors for the employment of a clerk to assist them in doing certain clerical work.

Budget Grant, Rs. 5,000.

60. *Rent of Municipal Office.*—The whole of this grant was expended in payment of rent of the Municipal Office at Rs. 1,400 per mensem.

Budget Grant, Rs. 16,800.

61. The following sundry expenditure was incurred during the year 1885-86, and was paid by additional grants sanctioned by the Town Council and Corporation :—

			Rs.	a.	p
Cost of illuminating an address voted to His Excellency Lord Reay, Governor of Bombay			150	0	0
Fees of professional advisers consulted by the Municipal Commissioner for the selection of the competitive designs and specification			45	0	0
Cost of entertaining the Indian Contingent on their return from Suakim	Rs. 3,000 0 0				
Less—Unexpended balance returned by the Committee of Entertainment to the Municipality	„ 1,653 11 5				
			1,346	4	7
Municipal Building Fund			42	6	10
Nesbit Road Bridge			25,000	0	0
Repairs to Falkland Road—					
Drain	Rs. 7,239 15 8				
Less—Receipts	„ 112 2 6				
			7,127	13	2

62. *New Works.*—Rs. 1,87,991-5-9 were expended on New Works in 1885-86 against Rs. 1,41,664-5-6 in 1884-85, being Rs. 46,327-0-3 less than expended last year.

Budget Amended Grant, Rs. 4,14,580-14-7

The following are some of the principal New Works :—

	Rs.	a.	p.
Purchase of ground to the south of Haines Road and east of the existing cemeteries, &c.	42,673	2	9
Improvement of Gunbow Street ..... Rs. 51,000 0 0			
Less—Receipts ..... „ 1,169 14 5			
	49,830	1	7
Improvement of other roads	17,543	7	6
Construction of new road from Parel Station to the Junction of Haines and Worlee Roads	18,991	11	1
Raising a portion of the Low-caste Hindu Burial-ground at Haines Road	8,823	1	4
Erection of new latrines and urinals	7,122	5	5
Purchase of land for new road from Parel Station level-crossing to the junction of Haines and Worlee Roads	6,884	9	6
Lighting with gas road from Wellington Fountain to Parsi sanitarium at Colaba	6,472	8	0
Diverting experimentally the sewerage outfall from Carnac Bundar to Worlee	5,894	1	0
Charney Road Extension	4,929	7	1
Metalling Municipal road recently taken from the Port Trust.	4,459	12	9
Construction of drain at Coppersmith Cross Lane	3,178	7	8
Street lighting with oil	3,089	12	8
Construction of night-soil Depôt at Girgaum and Kamatipura.	1,533	1	2
Construction of pipe sewer from Dhobiwada to Clarke Road Junction	1,349	9	4
Metalling new road from Bhandarwada to Wari Bundar	1,173	5	6
Compensation paid to W. F. Farrow in settlement of all demands against the Municipality on account of his land at Arthur Road	1,000	0	0
	1,84,948	8	4
For sundry small works, amounting to	3,042	13	5
Total Cost of New Works...Rs.	1,87,991	5	9

63. Of the total sum expended on New Works, about Rs. 1,00,145 were appropriated in the purchase of lands for the improvement of streets and construction of new roads; about Rs. 10,500 in giving additional gas and oil lights on roads; Rs. 947 for street signboards; Rs. 5,633 in metalling roads; about Rs. 51,496 for improvement of cemeteries and burial-ground; Rs. 19,245 for the construction of stables at Mody Bay, Night-soil Depôt at Girgaum and Kamatipura, Pipe sewers at Dhobiwada, Latrines and Urinals in the City, Drain and side drains at Coppersmith Cross Lane and at Wari Bundar, and experimental diversion of sewage outfall from Carnac Bundar to Worlee.

64. *Police Account*, including Police Hospital and Fire Brigade. The expenditure under this head amounted to Rs. 4,03,076-14-5 in 1885-86 against Rs. 4,26,725-12-0 in 1884-85, being Rs. 23,648-13-7 less than expended last year.

Budget Amended Grant—
Rs. 3,61,752 *Police*.
„ 88,159-1-7 *Fire Brigade*.

The decrease of Rs. 23,648-13-7 is particularized as follows :—

		More Expended. Rs. a. p.	Less Expended. Rs. a. p.

68. *Surface Drainage Works.*—The total expenditure during the year on these works, 1885-86, amounted to Rs. 1,52,655-8-0, making, with the amount expended up to 31st March 1885, Rs. 7,90,955, an aggregate total of Rs. 9,43,610-8-0 on the 31st day of March 1886.

69. The following works were executed in 1885-86 :—

	Rs.	a.	p.
3. Branch Drains in Khetwady and Storm-water Entrances—			
Intercepting drain, Tardeo District, and storm-water entrances	5,801	15	0
Intercepting drain from Pydhoni to Bellasis Road and storm-water entrances	61,687	8	1
Enlarging old open main drain	16,404	5	0
Constructing storage reservoir on the Flats and raising level of man-holes in sewers	51 002	0	0
Cleaning the storm-water drain	4 015	7	6
Contingencies, &c.	13,744	4	5
Total...Rs.	1,52,655	8	0

70. *New Drainage Works.*—Further payments were made, amounting to Rs. 1,65,124-6-0, on account of New Drainage Works executed in 1885-86, making, with the amount expended from the commencement of the works, a total of Rs. 28,70,640-0-7 up to the 31st day of March 1886.

71. The total of receipts under this head, being the value of materials sold, amounted to Rs. 1,709-5-9 in 1885-86 : this sum, when added to the amount of receipts from the beginning of the work, amounted to Rs. 5,05,976-5-9. Deducting the amount of the receipts, the net expenditure on account of New Drainage Works amounted to Rs. 23,64,663-10-10.

72. The following works were executed in 1885-86 :—

	Rs.	a.	p.
Pipe sewer, Clerk Road ovoid sewer, and repairs to old main drain at Falkland Road	6,285	8	2
House connections (Kamatipura drainage) without privy fittings	9,454	1	7
Queen's Road intercepting sewer	20,630	7	1
House connection survey in this locality	1,306	10	2
Pipe sewer from Clare Road along the southern portion of Haines and DeLisle Roads	26,499	6	1
Pipe sewer from Parel Workshops to Clerk Road and ovoid sewer	23,928	7	8
Extension of Clerk Road ovoid sewer to Parel Road	9.878	7	0
Ovoid sewer across the Old Race course	20,208	0	11
Ovoid sewer from the Crawford Market down Hornby Road to Bazar Gate ; thence to the Mint	26,409	10	2
Fort drainage	20,396	3	0
Contingencies	127	8	2
Total...Rs.	1,65,124	6	0

73. *Assets and Liabilities.*—The total assets of the Municipality amounted on the 31st day of March 1886 to Rs. 2,40,47,704-3-2, including Rs. 63,53,976-11-7 on account of Water Works Fund.

74. The total assets are summarized as follows :—

76. Scrutiny of collections and of outstanding bills of rates and taxes for the year 1885-86 and of previous years.

Collections.—During the year under report there were issued by the Assessor and Collector 71,931 net demand assessment bills, amounting in value to Rs. 22,14,668-10-3.

To the above number of bills were added 311 additional bills for the year 1884-85 and for previous years up to 1880 inclusive of the value of Rs. 8,542-9-5, including Government and Port Trust bills, making the total of all collection bills to 72,242, and amounting to Rs. 24,34,401-3-8. Add to this the amount of the outstandings for the year 1884-85, amounting to Rs. 2,79,925-14-2, the total amount of collection bills for the year 1885-86 then amounted to Rs. 27,14,327-1-10.

Out of the above-mentioned Rs. 27,14,327-1-10, Rs. 23,43,898-2-7 were collected by the Assessor and Collector, and Rs. 2,11,190 were paid by Government and Port Trust direct to the Municipality, making a total of collections received of Rs. 25,55,088-2-7, which left a balance of Rs. 1,59,238-15-3.

From this balance, deducting Rs. 811-7-3, being the amount of time-barred bills, and Rs. 3,366-14-7, being the amount of old irrecoverable bills up to the year 1883-84, cancelled by order of the Municipal Commissioner, and Rs. 7,217-13-9, being the amount of reduction made in demand bills for 1884-85, there remained Rs. 1,47,842-11-8 as the outstandings on the 31st day of March 1886.

We give details in the annexed four appendices, marked A, B, C, and D, the result of our scrutiny of the outstanding balances for the year 1885-86 and of previous years.

Appendix A shows outstandings for 1885-86, amounting to 4,330 bills of the value of Rs. 1,18,531-5-9.

Appendix B shows outstandings for the years 1884-85 and of previous years, up to 1880 inclusive, amounting to 2,237 bills of the value of Rs. 27,517-2-7.

Appendix C shows outstandings of disputed and law-suit bills, amounting to 114, of the value of Rs. 1,794-3-4.

Appendix D is a summary of the above-mentioned three appendices, which shows the grand total of all outstandings on the 31st day of March 1886, being 6,681 bills of the aggregate value of Rs. 1,47,842-11-8, being Rs. 1,32,083-2-6 less than the outstandings of the past year, which we consider very creditable to the diligence and activity of the Assessor and Collector's Department and to the Ward Clerks, and especially to the Newly-organized system of assessment and collection, with which the department is now becoming familiar and seem to work smoothly and in full swing.

We give below a *resume* of the above in figures :—
